#### NOTES TO CONSOLIDATED INTERIM FINANCIAL STATEMENTS (UNAUDITED)

#### For the Three and Six Months Ended June 30, 2024 and 2023

#### 1. GENERAL

Everest Group, Ltd. ("Group"), a Bermuda company, through its subsidiaries, principally provides reinsurance and insurance in the U.S., Bermuda and other international markets. As used in this document, "Company" and "Everest" mean Group and its subsidiaries.

Unless noted otherwise, all tabular dollar amounts are in millions of United States ("U.S.") dollars ("U.S. dollars" or "\$"). Some amounts may not reconcile due to rounding.

#### 2. BASIS OF PRESENTATION

The unaudited consolidated financial statements of the Company as of June 30, 2024 and December 31, 2023 and for the three and six months ended June 30, 2024 and 2023 include all adjustments, consisting of normal recurring accruals, which, in the opinion of management, are necessary for a fair statement of the results on an interim basis. Certain financial information, which is normally included in annual financial statements prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP"), has been omitted since it is not required for interim reporting purposes. The December 31, 2023 consolidated balance sheet data was derived from audited financial statements but does not include all disclosures required by GAAP. The results for the three and six months ended June 30, 2024 and 2023 are not necessarily indicative of the results for a full year. These financial statements should be read in conjunction with the audited consolidated financial statements and notes thereto for the years ended December 31, 2023, 2022 and 2021, included in the Company's most recent Form 10-K filing.

The Company consolidates the results of operations and financial position of all voting interest entities ("VOE") in which the Company has a controlling financial interest and all variable interest entities ("VIE") in which the Company is considered to be the primary beneficiary. The consolidation assessment, including the determination as to whether an entity qualifies as a VIE or VOE, depends on the facts and circumstances surrounding each entity.

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities (and disclosure of contingent assets and liabilities) at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Ultimate actual results could differ, possibly materially, from those estimates.

All intercompany accounts and transactions have been eliminated.

#### Adoption of New Accounting Standards

The Company did not adopt any new accounting standards that had a material impact during the three and six months ended June 30, 2024.

#### **Future Adoption of Recently Issued Accounting Standards**

The Company assessed the adoption impacts of recently issued accounting standards that are effective after 2024 by the Financial Accounting Standards Board on the Company's consolidated financial statements. Additionally, the Company assessed whether there have been material updates to previously issued accounting standards that are effective after 2024. There were no accounting standards identified, other than those directly referenced below, that are expected to have a material impact to Group.

Improvements to Income Tax Disclosures. In December 2023, the Financial Accounting Standards Board issued Accounting Standard Update No. 2023-09, which requires expanded income tax disclosures, including the disaggregation of existing disclosures related to the tax rate reconciliation and income taxes paid. The guidance is effective for annual periods beginning after December 15, 2024. Prospective application is required, with retrospective application permitted. The Company is currently evaluating the effect the updated guidance will have on the Company's financial statement disclosures.

The \$234 million of unrealized losses related to fixed maturity securities - available for sale that have been in an unrealized loss position for less than one year were generally comprised of domestic and foreign corporate securities, agency residential and commercial mortgage-backed securities and foreign government securities. Of these unrealized losses, \$227 million were related to securities that were rated investment grade by at least one nationally recognized rating agency. The \$1.0 billion of unrealized losses related to fixed maturity securities - available for sale in an unrealized loss position for more than one year related primarily to domestic and foreign corporate securities, agency residential mortgage-backed securities, foreign government securities and commercial mortgage-backed securities. Of these unrealized losses, \$1.0 billion were related to securities that were rated investment grade by at least one nationally recognized rating agency. In all instances, there were no projected cash flow shortfalls to recover the full book value of the investments and the related interest obligations. The mortgage-backed securities still have excess credit coverage and are current on interest and principal payments. Based upon the Company's current evaluation of securities in an unrealized loss position as of June 30, 2024, the unrealized losses are due to changes in interest rates and non-issuer-specific credit spreads and are not credit-related. In addition, the contractual terms of these securities do not permit these securities to be settled at a price less than their amortized cost.

The tables below display the aggregate fair value and gross unrealized depreciation of fixed maturity securities - available for sale by security type and contractual maturity, in each case subdivided according to length of time that individual securities had been in a continuous unrealized loss position for the periods indicated:

The aggregate fair value and gross unrealized losses related to fixed maturity - available for sale investments in an unrealized loss position at December 31, 2023 were \$14.8 billion and \$1.1 billion, respectively. The fair value of securities for the single issuer (the United States government), whose securities comprised the largest unrealized loss position at December 31, 2023, amounted to less than 3.0% of the overall fair value of the Company's fixed maturity securities available for sale. The fair value of the securities for the issuer with the second largest unrealized loss comprised less than 0.7% of the Company's fixed maturity securities - available for sale. In addition, as indicated on the above table, there was no significant concentration of unrealized losses in any one market sector. The \$102 million of unrealized losses related to fixed maturity securities - available for sale that have been in an unrealized loss position for less than one year were generally comprised of domestic and foreign corporate securities, asset-backed securities, agency residential mortgage-backed securities and foreign government securities. Of these unrealized losses, \$86 million were related to securities that were rated investment grade by at least one nationally recognized rating agency. The \$1.0 billion of unrealized losses related to fixed maturity securities - available for sale in an unrealized loss position for more than one year related primarily to domestic and foreign corporate securities, agency residential mortgage-backed securities and foreign government securities. Of these unrealized losses, \$1.0 billion were related to securities that were rated investment grade by at least one nationally recognized rating agency. In all instances, there were no projected cash flow shortfalls to recover the full book value of the investments and the related interest obligations. The mortgagebacked securities still have excess credit coverage and are current on interest and principal payments.

The Company records results from limited partnership investments on the equity method of accounting with changes in value reported through net investment income. The net investment income from limited partnerships is dependent upon the Company's share of the net asset values ("NAVs") of interests underlying each limited partnership. Due to the timing

of receiving financial information from these partnerships, the results are generally reported on a one month or quarter lag. If the Company determines there has been a significant decline in value of a limited partnership during this lag period, a loss will be recorded in the period in which the Company identifies the decline.

The Company had contractual commitments to invest up to an additional \$2.8 billion in limited partnerships and private placement loan securities at June 30, 2024. These commitments will be funded when called in accordance with the partnership and loan agreements, which have investment periods that expire, unless extended, through 2034.

In 2022, the Company entered into corporate-owned life insurance ("COLI") policies, which are invested in debt and equity securities. The COLI policies are carried within other invested assets at policy cash surrender value of \$1.4 billion and \$1.3 billion as of June 30, 2024 and December 31, 2023, respectively.

#### **Variable Interest Entities**

The Company is engaged with various special purpose entities and other entities that are deemed to be VIEs primarily as an investor through normal investment activities but also as an investment manager. A VIE is an entity that either has investors that lack certain essential characteristics of a controlling financial interest, such as simple majority kick-out rights, or lacks sufficient funds to finance its own activities without financial support provided by other entities. The Company performs ongoing qualitative assessments of its VIEs to determine whether the Company has a controlling financial interest in the VIE and therefore is the primary beneficiary. The Company is deemed to have a controlling financial interest when it has both the ability to direct the activities that most significantly impact the economic performance of the VIE and the obligation to absorb losses or right to receive benefits from the VIE that could potentially be significant to the VIE. Based on the Company's assessment, if it determines it is the primary beneficiary, the Company consolidates the VIE in the Company's Consolidated Financial Statements. As of June 30, 2024 and December 31, 2023, the Company did not hold any securities for which it is the primary beneficiary.

The Company, through normal investment activities, makes passive investments in general and limited partnerships and other alternative investments. For these non-consolidated VIEs, the Company has determined it is not the primary beneficiary as it has no ability to direct activities that could significantly affect the economic performance of the investments. The Company's maximum exposure to loss as of June 30, 2024 and December 31, 2023 is limited to the total carrying value of \$5.0 billion and \$4.8 billion, respectively, which are included in general and limited partnerships, COLI policies and other alternative investments in other invested assets in the Company's Consolidated Balance Sheets. Exposure relating specifically to general and limited partnerships as of June 30, 2024 and December 31, 2023 is limited to the total carrying value of \$3.6 billion and \$3.4 billion. As of June 30, 2024, the Company has outstanding commitments totaling \$2.2 billion whereby the Company is committed to fund these investments and may be called by the partnership during the commitment period to fund the purchase of new investments and partnership expenses. These investments are generally of a passive nature in that the Company does not take an active role in management.

In addition, the Company makes passive investments in structured securities issued by VIEs for which the Company is not the manager. These investments are included in asset-backed securities, which includes collateralized loan obligations and are classified as fixed maturities, available for sale. The Company has not provided financial or other support with respect to these investments other than its original investment. For these investments, the Company determined it is not the primary beneficiary due to the relative size of the Company's investment in comparison to the principal amount of the structured securities issued by the VIEs, credit subordination that reduces the Company's obligation to absorb losses or right to receive benefits or the Company's inability to direct the activities that most significantly impact the economic performance of the VIEs. The Company's maximum exposure to loss on these investments is limited to the amount of the Company's investment.

#### 4. FAIR VALUE

GAAP guidance regarding fair value measurements addresses how companies should measure fair value when they are required to use fair value measures for recognition or disclosure purposes under GAAP and provides a common definition of fair value to be used throughout GAAP. It defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly fashion between market participants at the measurement date. In addition, it establishes a three-level valuation hierarchy for the disclosure of fair value measurements. The valuation hierarchy is based on the transparency of inputs to the valuation of an asset or liability. The level in the hierarchy within which a given fair value measurement falls is determined based on the lowest level input that is significant to the measurement, with Level 1 being the highest priority and Level 3 being the lowest priority.

The levels in the hierarchy are defined as follows:

- Level 1: Inputs to the valuation methodology are observable inputs that reflect unadjusted quoted prices for identical assets or liabilities in an active market;
- Level 2: Inputs to the valuation methodology include quoted prices for similar assets and liabilities in active markets, and inputs that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the financial instrument;

Level 3: Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The Company's fixed maturity and equity securities are managed both internally and on an external basis by independent, professional investment managers using portfolio guidelines approved by the Company. The Company obtains prices from nationally recognized pricing services. These services seek to utilize market data and observations in their evaluation process. These services use pricing applications that vary by asset class and incorporate available market information, and when fixed maturity securities do not trade on a daily basis, the services will apply available information through processes such as benchmark curves, benchmarking of like securities, sector groupings and matrix pricing. In addition, they use model processes, such as the Option Adjusted Spread model to develop prepayment and interest rate scenarios for securities that have prepayment features.

The Company does not make any changes to prices received from the pricing services. In addition, the Company has procedures in place to review the reasonableness of the prices from the service providers and may request verification of the prices. The Company also continually performs quantitative and qualitative analysis of prices, including but not limited to initial and ongoing review of pricing methodologies, review of prices obtained from pricing services and third party investment asset managers, review of pricing statistics and trends, and comparison of prices for certain securities with a secondary price source for reasonableness. No material variances were noted during these price validation procedures. In limited situations, where financial markets are inactive or illiquid, the Company may use its own assumptions about future cash flows and risk-adjusted discount rates to determine fair value.

At June 30, 2024, \$2.0 billion of fixed maturities were fair valued using unobservable inputs. The majority of these fixed maturities were valued by investment managers' valuation committees and many of these fair values were substantiated by valuations from independent third parties. The Company has procedures in place to evaluate these independent third-party valuations. At December 31, 2023, \$2.0 billion of fixed maturities were fair valued using unobservable inputs.

Equity securities denominated in U.S. currency with quoted prices in active markets for identical assets are categorized as Level 1, since the quoted prices are directly observable. Equity securities traded on foreign exchanges are categorized as Level 2 due to the added input of a foreign exchange conversion rate to determine fair value. The Company uses foreign currency exchange rates published by nationally recognized sources.

Fixed maturity securities listed in the tables have been categorized as Level 2, since a particular security may not have traded but the pricing services are able to use valuation models with observable market inputs such as interest rate yield curves and prices for similar fixed maturity securities in terms of issuer, maturity and seniority. For foreign government securities and foreign corporate securities, the fair values provided by the third party pricing services in local currencies, and where applicable, are converted to U.S. dollars using currency exchange rates from nationally recognized sources.

In addition, some of the fixed maturities with fair values categorized as Level 3 result when prices are not available from the nationally recognized pricing services and are obtained from investment managers and are derived using unobservable inputs. The Company will value the securities with unobservable inputs using comparable market information or receive fair values from investment managers. The investment managers may obtain non-binding price quotes for the securities from brokers. The single broker quotes are provided by market makers or broker-dealers who are recognized as market participants in the markets in which they are providing the quotes. The prices received from brokers are reviewed for reasonableness by the third party asset managers and the Company. If the broker quotes are for foreign denominated securities, the quotes are converted to U.S. dollars using currency exchange rates from nationally recognized sources.

The composition and valuation inputs for the presented fixed maturities categories Level 1 and Level 2 are as follows:

- U.S. Treasury securities and obligations of U.S. government agencies and corporations are primarily comprised of U.S.
   Treasury bonds, and the fair value is based on observable market inputs such as quoted prices, reported trades, quoted prices for similar issuances or benchmark yields;
- Obligations of U.S. states and political subdivisions are comprised of state and municipal bond issuances, and the fair
  values are based on observable market inputs such as quoted market prices, quoted prices for similar securities,
  benchmark yields and credit spreads;
- Corporate securities are primarily comprised of U.S. corporate and public utility bond issuances, and the fair values
  are based on observable market inputs such as quoted market prices, quoted prices for similar securities, benchmark
  yields and credit spreads;
- Asset-backed and mortgage-backed securities fair values are based on observable inputs such as quoted prices, reported trades, quoted prices for similar issuances or benchmark yields and cash flow models using observable inputs such as prepayment speeds, collateral performance and default spreads;
- Foreign government securities are comprised of global non-U.S. sovereign bond issuances, and the fair values are
  based on observable market inputs such as quoted market prices, quoted prices for similar securities and models
  with observable inputs such as benchmark yields and credit spreads and then, where applicable, converted to U.S.
  dollars using an exchange rate from a nationally recognized source; and
- Foreign corporate securities are comprised of global non-U.S. corporate bond issuances, and the fair values are based
  on observable market inputs such as quoted market prices, quoted prices for similar securities and models with
  observable inputs such as benchmark yields and credit spreads and then, where applicable, converted to U.S. dollars
  using an exchange rate from a nationally recognized source.

#### Financial Instruments Disclosed, But Not Reported, at Fair Value

Certain financial instruments disclosed, but not reported, at fair value are excluded from the fair value hierarchy tables above. Fair values and valuation hierarchy of fixed maturity securities – held to maturity, senior notes and long-term subordinated notes can be found within Notes 3, 8 and 9, respectively. Short-term investments are stated at cost, which approximates fair value.

#### **Exempt from Fair Value Disclosure Requirements**

Certain financial instruments are exempt from the requirements for fair value disclosure, such as limited partnerships accounted for under the equity method and pension and other postretirement obligations. The Company's investments in COLI policies are recorded at their cash surrender value and are therefore not required to be included in the tables above. See Note 3 of the Notes to these Consolidated Financial Statements for details of investments in COLI policies.

In addition, \$260 million and \$274 million of investments within other invested assets on the consolidated balance sheets as of June 30, 2024 and December 31, 2023, respectively, are not included within the fair value hierarchy tables, as the assets are measured at NAV as a practical expedient to determine fair value.

#### 6. SEGMENT REPORTING

The Company operates through two operating segments. The Reinsurance operation writes worldwide property and casualty reinsurance and specialty lines of business, on both a treaty and facultative basis, through reinsurance brokers, as well as directly with ceding companies. Business is written in the U.S., Bermuda and Ireland offices, as well as, through branches in Canada, Singapore, the United Kingdom ("UK") and Switzerland. The Insurance operation writes property and casualty insurance directly and through brokers, including for surplus lines, and general agents within the U.S., Bermuda, Canada, Europe, Singapore and South America through its offices in the U.S., Australia, Bermuda, Canada, Chile, Colombia, Mexico, Singapore, the UK, Ireland, and branches located in the UK, the Netherlands, France, Germany and Spain. The two segments are managed independently, but conform with corporate guidelines with respect to pricing, risk management, control of aggregate catastrophe exposures, capital, investments and support operations.

Our two operating segments each have executive leadership who are responsible for the overall performance of their respective segments and who are directly accountable to our chief operating decision maker ("CODM"), the Chief Executive Officer of Everest Group, Ltd., who is ultimately responsible for reviewing the business to assess performance, make operating decisions and allocate resources. We report the results of our operations consistent with the manner in which our CODM reviews the business.

During the fourth quarter of 2023, the Company revised the classification and presentation of certain products related to its accident and health business within the segment groupings. These products have been realigned from within the Reinsurance segment to the Insurance segment to appropriately reflect how the business segments are managed. These changes have been reflected retrospectively.

The Company does not review and evaluate the financial results of its operating segments based upon balance sheet data. Management generally monitors and evaluates the financial performance of these operating segments based upon their underwriting results. Underwriting results include earned premium less losses and LAE incurred, commission and brokerage expenses and other underwriting expenses. The Company measures its underwriting results using ratios, in particular, loss, commission and brokerage and other underwriting expense ratios, which, respectively, divide incurred losses, commissions and brokerage and other underwriting expenses by premiums earned. Management has determined that these measures are appropriate and align with how the business is managed. We continue to evaluate our segments as our business evolves and may further refine our segments and financial performance measures.

The following tables present the underwriting results for the operating segments for the periods indicated:

Recoveries under these collateralized reinsurance agreements with Kilimanjaro are primarily dependent on estimated industry-level insured losses from covered events, as well as the geographic location of the events. The estimated industry-level of insured losses is obtained from published estimates by an independent recognized authority on insured property losses.

As of June 30, 2024, the Company has up to \$350 million of catastrophe bond protection ("CAT Bond") that attaches at a \$48.1 billion Property Claims Services ("PCS") Industry loss threshold. This recovery would be recognized on a pro-rata basis up to a \$63.8 billion PCS Industry loss level. As a result of Hurricane Ian, PCS's current industry estimate of \$48.3 billion issued in June 2024 exceeds the attachment point. The current estimated recovery under the CAT Bond is not material.

Kilimanjaro has financed the various property catastrophe reinsurance coverages by issuing catastrophe bonds to unrelated, external investors. The proceeds from the issuance of the catastrophe bonds are held in reinsurance trusts throughout the duration of the applicable reinsurance agreements and invested solely in U.S. government money market funds with a rating of at least "AAAm" by Standard & Poor's. The catastrophe bonds' issue dates, maturity dates and amounts correspond to the reinsurance agreements listed above.

#### 11. COMMITMENTS AND CONTINGENCIES

In the ordinary course of business, the Company is involved in lawsuits, arbitrations and other formal and informal dispute resolution procedures, the outcomes of which will determine the Company's rights and obligations under insurance and reinsurance agreements. In some disputes, the Company seeks to enforce its rights under an agreement or to collect funds owing to it. In other matters, the Company is resisting attempts by others to collect funds or enforce alleged rights. These disputes arise from time to time and are ultimately resolved through both informal and formal means, including negotiated resolution, arbitration and litigation. In all such matters, the Company believes that its positions are legally and commercially reasonable. The Company considers the statuses of these proceedings when determining its reserves for unpaid loss and LAE.

Aside from litigation and arbitrations related to these insurance and reinsurance agreements, the Company is not a party to any other material litigation or arbitration.

#### 14. EARNINGS PER COMMON SHARE

Basic earnings per share are calculated by dividing net income by the weighted average number of common shares outstanding. Diluted earnings per share reflect the potential dilution that would occur if options granted under various share-based compensation plans were exercised resulting in the issuance of common shares that would participate in the earnings of the entity.

Net income (loss) per common share has been computed as shown below, based upon weighted average common basic and dilutive shares outstanding.

#### 15. INCOME TAXES

With the assent of the governor on December 27, 2023, the Bermuda Corporate Income Tax Act of 2023 ("The 2023 Act") became law. Beginning in 2025, a 15% corporate income tax will be applicable to Bermuda businesses that are part of multinational enterprise groups with annual revenue of €750 million or more. Group's Bermuda entities will be subject to the new corporate income tax. The Company has evaluated The 2023 Act and has recorded \$578 million of net deferred income tax benefits as of December 31, 2023. The net deferred income tax benefits relate primarily to a default provision in the law which allows for what is called an "Economic Transition Adjustment" ("ETA"). The ETA allowed companies to establish deferred tax assets or liabilities related to the revaluation of intangible assets, excluding goodwill and their other assets and liabilities, based on fair value as of September 30, 2023.

All of the income of Group's non-Bermuda subsidiaries is subject to the applicable federal, foreign, state and local taxes on corporations. Additionally, the income of the foreign branches of the Company's insurance operating companies is subject to various rates of income tax. Group's U.S. subsidiaries conduct business in and are subject to taxation in the U.S. Should the U.S. subsidiaries distribute current or accumulated earnings and profits in the form of dividends or otherwise, the Company would be subject to an accrual of 5% U.S. withholding tax. Currently, however, no withholding tax has been accrued with respect to such un-remitted earnings, as management has no intention of remitting them. The cumulative amount that would be subject to withholding tax, if distributed, is not practicable to compute. The provision for income taxes in the consolidated statement of operations and comprehensive income (loss) has been determined in accordance with the individual income of each entity and the respective applicable tax laws. The provision reflects the permanent differences between financial and taxable income relevant to each entity.

On August 16, 2022, the Inflation Reduction Act of 2022 ("IRA") was enacted. We have evaluated the tax provisions of the IRA, the most significant of which are the corporate alternative minimum tax and the share repurchase excise tax and do not expect the legislation to have a material impact on our results of operations.

# 16. SUBSEQUENT EVENTS

The Company has evaluated known recognized and non-recognized subsequent events. In July 2024, Hurricane Beryl impacted the southern half of the Caribbean and southern Texas. Due to the recency of this event, the Company is unable to estimate the magnitude of losses at this time. However, the Company does not expect loss exposure to be significant. No other material subsequent events or transactions have occurred that require recognition or disclosure in the financial statements.

#### ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

#### **Industry Conditions.**

The worldwide insurance and reinsurance businesses are highly competitive, as well as cyclical by product and market. As a result, financial results tend to fluctuate with periods of constrained availability, higher rates and stronger profits, followed by periods of abundant capacity, lower rates and constrained profitability. Competition in the types of insurance and reinsurance business that we underwrite is based on many factors, including the perceived overall financial strength of the reinsurer or insurer, ratings of the reinsurer or insurer by A.M. Best and/or Standard & Poor's, underwriting expertise, the jurisdictions where the reinsurer or insurer is licensed or otherwise authorized, capacity and coverages offered, premiums charged, other terms and conditions of the insurance and reinsurance business offered, services offered, speed of claims payment, and reputation and experience in lines written. Furthermore, the market impact from these competitive factors related to insurance and reinsurance is generally not consistent across lines of business, domestic and international geographical areas and distribution channels.

Financial instruments, such as side cars, catastrophe bonds and collateralized reinsurance funds, provide capital markets with access to insurance and reinsurance risk exposure. The capital markets demand for these products is primarily driven by the desire to achieve greater risk diversification and potentially higher returns on their investments. This competition generally has a negative impact on rates and terms and conditions; however, the impact varies widely by market and coverage. Based on recent competitive behaviors in the insurance and reinsurance industry, natural catastrophe events and the macroeconomic backdrop, there has been dislocation in the market which has had a positive impact on rates and terms and conditions, generally, though specifics in local markets can vary.

Specifically, recent market conditions in property, particularly catastrophe excess of loss, have resulted in rate increases. As a result of the rate increases, most of the lines within property have been affected. Other casualty lines have been experiencing rate increases, while some lines such as workers' compensation and directors and officers liability have been experiencing softer market conditions. The impact on pricing conditions is likely to change depending on the line of business and geography.

Our capital position remains a source of strength, with high quality invested assets, significant liquidity and a low operating expense ratio. Our diversified global platform with its broad mix of products, distribution and geography is resilient.

The ongoing Middle East war and the war in Ukraine continue to evolve. Economic and legal sanctions have been levied against Russia, specific named individuals and entities connected to the Russian government, as well as businesses located in the Russian Federation and/or owned by Russian nationals in numerous countries, including the United States. The significant political and economic uncertainty surrounding these wars and associated sanctions have impacted economic and investment markets both within Russia, Ukraine, the Middle East region, and around the world.

#### Revenues.

Premiums. Gross written premiums increased by 13.0% to \$4.7 billion for the three months ended June 30, 2024, compared to \$4.2 billion for the three months ended June 30, 2023, reflecting a \$462 million, or 16.8%, increase in our reinsurance business and a \$82 million, or 5.7%, increase in our insurance business. The increase in reinsurance premiums was primarily due to property pro rata, property catastrophe excess of loss and casualty pro rata lines of business. The increase in insurance premiums compared to the prior year period was primarily due to other specialty business, property/short tail business and professional liability business partially offset by reduction in accident and health and workers' compensation lines. Gross written premiums increased by 15.3% to \$9.1 billion for the six months

ended June 30, 2024, compared to \$7.9 billion for the six months ended June 30, 2023, reflecting a \$1.0 billion, or 18.9%, increase in our reinsurance business and a \$196 million, or 7.7%, increase in our insurance business. The increase in reinsurance premiums was primarily driven by property pro rata, property catastrophe excess of loss and casualty pro rata lines of business. The increase in insurance premiums was primarily due to other specialty business, property/short tail business and professional liability business. These increases were partially offset by reductions in accident and health and workers' compensation lines.

Net written premiums increased by 11.2% to \$4.1 billion for the three months ended June 30, 2024, compared to \$3.7 billion for the three months ended June 30, 2024, compared to \$7.0 billion for the six months ended June 30, 2024, compared to \$7.0 billion for the six months ended June 30, 2023. These increases were consistent with the percentage changes in gross written premiums. Premiums earned increased by 13.6% to \$3.7 billion during the three months ended June 30, 2024, compared to \$3.3 billion during the three months ended June 30, 2023. Premiums earned increased by 15.6% to \$7.3 billion for the six months ended June 30, 2024, compared to \$6.4 billion for the six months ended June 30, 2023. Premiums earned generally reflect the portion of net premiums written that was recognized as revenue for the period as the exposure period expires. The change in premiums earned relative to net written premiums was primarily the result of timing; premiums are earned ratably over the coverage period whereas written premiums are recorded at the initiation of the coverage period.

Other Income (Expense). We recorded other income of \$23 million and \$38 million for the three months ended June 30, 2024 and 2023, respectively. We recorded other income of \$54 million and other expense of \$42 million for the six months ended June 30, 2024 and 2023, respectively. The period over period changes were primarily the result of a \$9 million gain on pension curtailment as well as fluctuations in foreign currency exchange rates. During the three months ended June 30, 2024, the Company amended its defined benefit pension plan (the "Plan") to freeze all benefits accruals and terminate the Plan effective June 30, 2024, which resulted in a pension curtailment gain. We recognized foreign currency exchange income of \$9 million and \$36 million for the three months ended June 30, 2024 and 2023, respectively. We recognized foreign currency exchange income of \$41 million and foreign currency exchange expense of \$49 million for the six months ended June 30, 2024 and 2023, respectively.

Incurred losses and LAE increased by 17.9% to \$2.3 billion for the three months ended June 30, 2024, compared to \$2.0 billion for the three months ended June 30, 2023, primarily due to an increase of \$227 million in current year attritional losses and an increase of \$124 million in current year catastrophe losses. The increase in current year attritional losses was mainly due to the impact of the increase in underlying exposures due to increased premiums earned. The current year catastrophe losses of \$151 million for the three months ended June 30, 2024 related primarily to the 2024 Dubai floods (\$40 million), the 2024 Germany floods (\$40 million), the 2024 Brazil Floods (\$35 million), and the 2024 Taiwan earthquake (\$23 million). The \$27 million of current year catastrophe losses for the three months ended June 30, 2023 related primarily to the 2023 Turkey earthquakes (\$20 million), Typhoon Mawar (\$12 million), the 2023 Italian floods (\$10 million), and the 2023 second quarter U.S. storms (\$10 million), partially offset by \$30 million of reinsurance recoveries related to Hurricane Ian.

Incurred losses and LAE increased by 15.8% to \$4.5 billion for the six months ended June 30, 2024, compared to \$3.9 billion for the six months ended June 30, 2023, primarily due to an increase of \$528 million in current year attritional losses and an increase of \$94 million in current year catastrophe losses. The increase in current year attritional losses was mainly due to the impact of the increase in underlying exposures due to increased premiums earned. The current year catastrophe losses of \$236 million for the six months ended June 30, 2024 related primarily to the 2024 Baltimore bridge collapse (\$70 million), the 2024 Dubai floods (\$40 million), the 2024 Germany floods (\$40 million), the 2024 Brazil Floods (\$35 million), and the 2024 Taiwan earthquake (\$23 million). The \$142 million of current year catastrophe losses for the six months ended June 30, 2023 related primarily to the 2023 Turkey earthquakes (\$95 million) the 2023 New Zealand storms (\$45 million), Typhoon Mawar (\$12 million), the 2023 Italian floods (\$10 million) and the 2023 second quarter U.S. storms (\$10 million), partially offset by \$30 million of reinsurance recoveries related to Hurricane Ian.

Catastrophe losses and loss expenses typically have a material effect on our incurred losses and LAE results and can vary significantly from period to period. Losses from natural catastrophes contributed 4.1 percentage points to the combined ratio for the three months ended June 30, 2024, compared with 0.8 percentage points in the corresponding period of 2023, and 3.2 percentage points to the combined ratio for the six months ended June 30, 2024, compared with 2.2 percentage points in the corresponding period of 2023. The Company has up to \$350 million of catastrophe bond protection ("CAT Bond") that attaches at a \$48.1 billion Property Claims Services ("PCS") Industry loss threshold. This recovery would be recognized on a pro-rata basis up to a \$63.8 billion PCS Industry loss level. As a result of Hurricane lan, PCS's current industry estimate of \$48.3 billion issued in June 2024 exceeds the attachment point. The current estimated recovery under the CAT Bond is not material.

Commission, Brokerage, Taxes and Fees. Commission, brokerage, taxes and fees increased by 15.2% to \$790 million for the three months ended June 30, 2024 compared to \$686 million for the three months ended June 30, 2023. Commission, brokerage, taxes and fees increased by 16.7% to \$1.6 billion for the six months ended June 30, 2024, compared to \$1.3 billion for the six months ended June 30, 2023. The increases were primarily due to the impact of the

increase in premiums earned and changes in the mix of business. Refer to Ratios section for commission and brokerage ratio analysis discussion.

Other Underwriting Expenses. Other underwriting expenses were \$234 million and \$205 million for the three months ended June 30, 2024 and June 30, 2023, respectively. Other underwriting expenses were \$458 million and \$405 million for the six months ended June 30, 2024 and 2023, respectively. The increases in other underwriting expenses remained relative consistent with the growth in premium earned. Refer to Ratio section for other underwriting expense ratio analysis discussion.

<u>Corporate Expenses.</u> Corporate expenses, which are general operating expenses that are not allocated to segments, were \$22 million and \$17 million for the three months ended June 30, 2024 and 2023, respectively, and \$44 million and \$36 million for the six months ended June 30, 2024 and 2023, respectively. The increase in Corporate expenses for the three and six month periods ended June 30, 2024 are primarily due to information management related costs.

Interest, Fees and Bond Issue Cost Amortization Expense. Interest, fees and other bond amortization expense was \$37 million and \$33 million for the three months ended June 30, 2024 and 2023, respectively. Interest, fees and other bond amortization expense was \$75 million and \$65 million for the six months ended June 30, 2024 and 2023, respectively. The increases were mainly due to higher interest costs on the FHLBNY borrowing as a result of the rising interest rate environment. Interest expense was also impacted by the movements in the floating interest rate related to the Company's long-term Subordinated Notes Issued 2007, which is reset quarterly per the note agreement. The floating rate was 7.97% as of June 30, 2024.

Income Tax Expense (Benefit). We had income tax expense of \$108 million and \$80 million for the three months ended June 30, 2024, and 2023, respectively. We had income tax expense of \$207 million and \$122 million for the six months ended June 30, 2024, and 2023, respectively. The period over period increase in income tax expense is primarily a function of the geographic location of the Company's pre-tax income and the statutory tax rates in those jurisdictions. The effective tax rate ("ETR") is primarily affected by tax-exempt investment income, foreign tax credits and dividends. Variations in the ETR generally result from changes in the relative levels of pre-tax income, including the impact of catastrophe losses and net capital gains (losses), among jurisdictions with different tax rates.

With the assent of the governor on December 27, 2023, the Bermuda Corporate Income Tax Act of 2023 ( the "2023 Act") became law. Under the 2023 Act, beginning in 2025, a 15% corporate income tax will be applicable to Bermuda businesses that are part of multinational enterprise groups with annual revenue of €750 million or more. Group's Bermuda entities will be subject to the new corporate income tax. The Company has evaluated The 2023 Act and has recorded \$578 million of net deferred income tax benefits as of December 31, 2023. The net deferred income tax benefits relate primarily to a default provision in the law that allows for an Economic Transition Adjustment ("ETA"). The ETA allowed companies to establish deferred tax assets or liabilities related to the revaluation of intangible assets, excluding goodwill, and their other assets and liabilities, based on fair value as of September 30, 2023.

On August 16, 2022, the Inflation Reduction Act of 2022 ("IRA") was enacted. We have evaluated the tax provisions of the IRA, the most significant of which are the corporate alternative minimum tax and the share repurchase excise tax and do not expect the legislation to have a material impact on our results of operations.

#### Net Income (Loss).

Our net income was \$724 million and \$670 million for the three months ended June 30, 2024 and 2023, respectively. Our net income was \$1.5 billion and \$1.0 billion for the six months ended June 30, 2024 and 2023, respectively. The period over period changes in net income were primarily driven by the financial component fluctuations explained above.

#### Ratios.

Our combined ratio increased by 2.6 points to 90.3% for the three months ended June 30, 2024, compared to 87.7% for the three months ended June 30, 2023 and increased by 0.2 points to 89.6% for the six months ended June 30, 2024, compared to 89.4% for the six months ended June 30, 2023. The current year increase is primarily due to increased commission and brokerage expenses and higher catastrophe losses. Refer to analysis of combined ratio components below.

The loss ratio component increased by 2.3 points to 62.6% for the three months ended June 30, 2024, compared to 60.3% for the three months ended June 30, 2023 mainly due to a \$124 million increase in catastrophe losses partially offset by the impact of changes in the mix of business. The loss ratio component increased by 0.1 points to 61.9% for the six

months ended June 30, 2024 compared to 61.8% six months ended June 30, 2023 primarily due to an increase of \$94 million in current year catastrophe losses partially offset by the impact of changes in the mix of business.

The commission and brokerage ratio components increased to 21.4% for the three months ended June 30, 2024 compared to 21.1% for the three months ended June 30, 2023 and increased to 21.4% for the six months ended June 30, 2024 compared to 21.2% for the six months ended June 30, 2023. These changes were mainly due to changes in the mix of business.

The other underwriting expense ratios remained consistent at 6.3% for the three months ended June 30, 2024 and the three months ended June 30, 2023 and decreased to 6.2% for the six months ended June 30, 2024 compared to 6.4% for the six months ended June 30, 2023. The decrease for the six months comparative period was mainly due to higher earned premium base.

### Shareholders' Equity.

Shareholders' equity increased by \$1.0 billion to \$14.2 billion at June 30, 2024 from \$13.2 billion at December 31, 2023, principally as a result of \$1.5 billion of net income, partially offset by \$213 million of unrealized depreciation on the available for sale fixed maturity portfolio, net of tax, \$163 million of shareholder dividends, \$100 million of treasury share purchases and \$38 million of net foreign currency translation adjustments.

#### **Consolidated Investment Results**

#### Net Investment Income.

Net investment income increased by 47.9% to \$528 million for the three months ended June 30, 2024 compared with net investment income of \$357 million for the three months ended June 30, 2023. The increase for the three months ended June 30, 2024 was primarily the result of an increase of \$93 million in income from fixed maturity investments, an increase of \$40 million in limited partnership income, an increase of \$24 million in income from other alternative investments and an increase of \$10 million in income from short-term investments. Net investment income increased by 59.7% to approximately \$1.0 billion for the six months ended June 30, 2024, compared with investment income of \$617 million for the six months ended June 30, 2023. The increase for the six months ended June 30, 2024 was primarily the result of an increase of \$198 million of income from fixed maturity investments, an increase of \$110 million in limited partnership income, an increase of \$30 million from short-term investments and an increase of \$22 million in income from other alternative investments. The limited partnership income primarily reflects changes in reported net asset values. As such, until these asset values are monetized and the resultant income is distributed, they are subject to volatile results of future increases or decreases in the asset value.

The realized losses from dispositions of investments mainly related to the execution of a Company strategy to sell lower yielding investments in order to reinvest the proceeds at higher interest rates.

Net gains (losses) on investments during the six months ended June 30, 2024 primarily relate to \$22 million of net losses due to the disposition of investments in fixed maturity securities, \$8 million of losses from fair value adjustments on equity securities as a result of equity market deterioration, partially offset by a decrease to the allowance for credit losses of \$6 million.

#### Segment Results.

The Company operates through two operating segments. The Reinsurance operation writes worldwide property and casualty reinsurance and specialty lines of business, on both a treaty and facultative basis, through reinsurance brokers, as well as directly with ceding companies. Business is written in the U.S., Bermuda, and Ireland offices, as well as, through branches in Canada, Singapore, the United Kingdom ("UK") and Switzerland. The Insurance operation writes property and casualty insurance directly and through brokers, including for surplus lines, and general agents within the U.S., Bermuda, Canada, Europe, Singapore and South America through its offices in the U.S., Australia, Bermuda, Canada, Chile, Colombia, Mexico, Singapore, the UK, Ireland, and branches located in the UK, the Netherlands, France, Germany and Spain. The two segments are managed independently, but conform with corporate guidelines with respect to pricing, risk management, control of aggregate catastrophe exposures, capital, investments and support operations.

Our two operating segments each have executive leadership who are responsible for the overall performance of their respective segments and who are directly accountable to our chief operating decision maker ("CODM"), the Chief Executive Officer of Everest Group, Ltd., who is ultimately responsible for reviewing the business to assess performance, make operating decisions and allocate resources. We report the results of our operations consistent with the manner in which our CODM reviews the business.

During the fourth quarter of 2023, the Company revised the classification and presentation of certain products related to its accident and health business within the segment groupings. These products have been realigned from within the Reinsurance segment to the Insurance segment to appropriately reflect how the business segments are managed. These changes have been reflected retrospectively.

The Company does not review and evaluate the financial results of its operating segments based upon balance sheet data. Management generally monitors and evaluates the financial performance of these operating segments based upon their underwriting results. Underwriting results include earned premium less losses and loss adjustment expenses ("LAE") incurred, commission and brokerage expenses and other underwriting expenses. The Company measures its underwriting results using ratios, in particular, loss, commission and brokerage and other underwriting expense ratios, which, respectively, divide incurred losses, commissions and brokerage and other underwriting expenses by premiums earned. Management has determined that these measures are appropriate and align with how the business is managed. We continue to evaluate our segments as our business evolves and may further refine our segments and financial performance measures.

The following discusses the underwriting results for each of our segments for the periods indicated.

Premiums. Gross written premiums increased by 5.7% to \$1.5 billion for the three months ended June 30, 2024 compared to \$1.4 billion for the three months ended June 30, 2023. The increase in insurance premiums was primarily due to increases in property/short tail business, professional liability business and other specialty lines of business partially offset by reductions in accident and health and workers' compensation lines of business. Net written premiums decreased by 0.2% to \$1.1 billion for the three months ended June 30, 2024, compared to \$1.1 billion for the three months ended June 30, 2023. The lower percentage change in net written premiums compared to gross written premiums is due to lower net retention resulting from changes in the mix of business and strategic portfolio actions executed on the accident and health and workers' compensation lines of business. Premiums earned increased by 8.4% to \$962 million for the three months ended June 30, 2024, compared to \$888 million for the three months ended June 30, 2023. The increase in premiums earned was driven by the expansion of international business offset by strategic portfolio actions executed on the accident and health line of business.

Gross written premiums increased by 7.7% to \$2.8 billion for the six months ended June 30, 2024, compared to \$2.6 billion for the six months ended June 30, 2023. The increase in insurance premiums was primarily due to increases in property/short tail business, professional liability business and other specialty lines of business partially offset by reductions in accident and health and workers' compensation lines of business. Net written premiums increased by 3.3% to \$2.0 billion for the six months ended June 30, 2024, compared to \$1.9 billion for the six months ended June 30, 2023. The lower percentage change in net written premiums compared to gross written premiums was mainly due to lower net

retention resulting from changes in the mix of business and strategic portfolio actions on the accident and health and workers' compensation lines of business. Premiums earned increased by 7.0% to \$1.9 billion for the six months ended June 30, 2024, compared to \$1.8 billion for the six months ended June 30, 2023. The change in premiums earned relative to net written premiums is the result of timing; premiums are earned ratably over the coverage period, whereas written premiums are recorded at the initiation of the coverage period.

Changes in premiums earned and business mix, reserve re-estimations, catastrophe losses and changes in catastrophe loss reserves and claim settlement activity all impact loss and LAE reserves by segment and in total.

Our carried loss and LAE reserves represent management's best estimate of our ultimate liability for unpaid claims. We continuously re-evaluate our reserves, including re-estimates of prior period reserves, taking into consideration all available information and, in particular, newly reported loss and claim experience. Changes in reserves resulting from such re-evaluations are reflected in incurred losses in the period when the re-evaluation is made. Our analytical methods and processes operate at multiple levels, including individual contracts, groupings of like contracts, classes and lines of business, internal business units, segments, accident years, legal entities, and in the aggregate. In order to set appropriate reserves, we make qualitative and quantitative analyses and judgments at these various levels. We utilize actuarial science, business expertise and management judgment in a manner intended to ensure the accuracy and consistency of our reserving practices. Management's best estimate is developed through collaboration with actuarial, underwriting, claims, legal and finance departments and culminates with the input of reserve committees. Each segment reserve committee includes the participation of the relevant parties from actuarial, finance, claims and segment senior management and has the responsibility for recommending and approving management's best estimate. Reserves are further reviewed by Everest's Chief Reserving Actuary and senior management. The objective of this process is to determine a single best estimate viewed by management to be the best estimate of its ultimate loss liability. Nevertheless, our reserves are estimates and are subject to variation, which may be significant.

There can be no assurance that reserves for, and losses from, claim obligations will not increase in the future, possibly by a material amount. However, we believe that our existing reserves and reserving methodologies lessen the probability that any such increase would have a material adverse effect on our financial condition, results of operations or cash flows.

<u>Asbestos and Environmental Exposures.</u> Asbestos and Environmental ("A&E") exposures represent a separate exposure group for monitoring and evaluating reserve adequacy. The following table summarizes the outstanding loss reserves with respect to A&E reserves on both a gross and net of retrocessions basis for the periods indicated.

	 At June 30,	Dece	At mber 31,
(Dollars in millions)	2024		2023
Gross reserves	\$ 226	\$	247
Ceded reserves	 (10)		(15)
Net reserves	\$ 215	\$	232

(Some amounts may not reconcile due to rounding.)

With respect to asbestos only, at June 30, 2024, we had net asbestos loss reserves of \$196 million, or 90.8%, of total net A&E reserves, all of which was for assumed business.

Ultimate loss projections for A&E liabilities cannot be accomplished using standard actuarial techniques. We believe that our A&E reserves represent management's best estimate of the ultimate liability; however, there can be no assurance that ultimate loss payments will not exceed such reserves, perhaps by a significant amount.

Industry analysts use the "survival ratio" to compare the A&E reserves among companies with such liabilities. The survival ratio is typically calculated by dividing a company's current net reserves by the three-year average of annual paid losses. Hence, the survival ratio equals the number of years that it would take to exhaust the current reserves if future loss payments were to continue at historical levels. Using this measurement, our net three-year asbestos survival ratio was 6.5 years at June 30, 2024. These metrics can be skewed by individual large settlements occurring in the prior three years and therefore may not be indicative of the timing of future payments.

#### LIQUIDITY AND CAPITAL RESOURCES

<u>Capital.</u> Shareholders' equity at June 30, 2024 and December 31, 2023 was \$14.2 billion and \$13.2 billion, respectively. Management's objective in managing capital is to ensure that the Company's overall capital level, as well as the capital levels of its operating subsidiaries, exceed the amounts required by regulators, the amount needed to support our current financial strength ratings from rating agencies and our own economic capital models. The Company's capital has historically exceeded these benchmark levels.

Our two main operating companies, Bermuda Re and Everest Re, are regulated by the Bermuda Monetary Authority and the State of Delaware's Department of Insurance, respectively. Both regulatory bodies have their own capital adequacy models based on statutory capital as opposed to GAAP basis equity. Failure to meet the required statutory capital levels could result in various regulatory restrictions, including restrictions on business activity and the payment of dividends to their parent companies.

The regulatory targeted capital and the actual statutory capital for Bermuda Re and Everest Re were as follows:

		Bermuda Re <sup>(1)</sup>		Everest Re <sup>(2)</sup>			
		At December 31,		At December 3		per 31,	
(Dollars in millions)	2	.023	2022	2023		2022	
Regulatory targeted capital	\$	2,669 \$	2,217	\$	4,242	3,353	
Actual capital	\$	3,711 \$	2,759	\$	6,963	5,553	

<sup>(1)</sup> Regulatory targeted capital represents the target capital level from the applicable year's Bermuda Solvency Capital Requirement calculation.

Our financial strength ratings as determined by A.M. Best, Standard & Poor's and Moody's are important as they provide our customers and investors with an independent assessment of our financial strength using a rating scale that provides for relative comparisons. We continue to possess significant financial flexibility and access to debt and equity markets as a result of our financial strength, as evidenced by the financial strength ratings as assigned by independent rating agencies.

We maintain our own economic capital models to monitor and project our overall capital, as well as the capital at our operating subsidiaries. A key input to the economic models is projected income, and this input is continually compared to actual results, which may require a change in the capital strategy.

<sup>(2)</sup> Regulatory targeted capital represents 200% of the Risk Based Capital authorized control level calculation for the applicable year.

As part of our capital strategy, we model our potential exposure to catastrophe losses arising from a single event. Projected catastrophe losses are generally summarized in terms of probable maximum loss ("PML"). A full discussion on PMLs is included in our December 31, 2023 Form 10-K filing in Part 2, Item 7 (MD&A) in Liquidity and Capital Resources. We focus on the projected net economic loss from a catastrophe in a given zone as compared to our shareholders' equity. Economic loss is the PML exposure, net of third party reinsurance, reduced by estimated reinstatement premiums to renew coverage and estimated income taxes. In our December 31, 2023 Form 10-K, we reported that our projected net economic loss from our largest projected 100-year event represented approximately 7.8% of our December 31, 2023 shareholders' equity. During the first half of 2024, our net exposure to catastrophes has changed due to the market conditions and business decisions. As a result, our projected net economic loss from our largest 100-year event in a given zone represents approximately 9.0% of our June 30, 2024 shareholders' equity.

The table below reflects the Company's PML exposure, net of third party reinsurance at various return periods for its top zones/perils (as ranked by largest 1 in 100 year economic loss) based on projection data as of July 1, 2024.

Return Periods (in years)	1	l in 20	1 in 50	1 in 100	1 in 250	1 in 500

The projected economic losses, defined as PML exposures, net of third party reinsurance, reinstatement premiums and estimated income taxes, for the top zones/perils scheduled are as follows:

For the six months ended June 30, 2024, we repurchased 264,009 of our shares at a cost of \$100 million in the open market. We paid \$163 million in dividends to adjust our capital position and enhance long-term expected returns to our shareholders. As of December 31, 2023, we repurchased no shares in the open market and paid \$288 million in dividends. On May 22, 2020, our existing Board authorization to purchase up to 30 million of our shares was amended to authorize the purchase of up to 32 million shares. As of June 30, 2024, we had repurchased 31.0 million shares under this authorization. During the second quarter of 2024, the Company's Board of Directors declared an increase in the quarterly common stock dividend from \$1.75 to \$2.00 per share. The increase applied to the common stock dividend paid on June 14, 2024 for holders of record as of May 29, 2024. We paid \$86 million in dividends during the second quarter 2024.

We may continue, from time to time, to seek to retire portions of our outstanding debt securities through cash repurchases, in open-market purchases, privately negotiated transactions or otherwise. Such repurchases, if any, will be subject to and depend on prevailing market conditions, our liquidity requirements, contractual restrictions and other factors. The amounts involved in any such transactions, individually or in the aggregate, may be material.

On May 19, 2023, the Company completed the public offering of 4,140,000 common shares, which includes full exercise of the underwriters' option to purchase an additional 540,000 common shares, at a public offering price of \$360.00 per share. Total net proceeds from the public offering were \$1,445 million, after underwriting discount and expenses. The Company intends to use the net proceeds from this offering for long-term reinsurance opportunity and continuing build out of the global insurance business.

<u>Liquidity.</u> Our liquidity requirements are generally met from positive cash flow from operations. Positive cash flow results from reinsurance and insurance premiums being collected prior to disbursements for claims, which disbursements generally take place over an extended period after the collection of premiums, sometimes a period of many years. Collected premiums are generally invested, prior to their use in such disbursements, and investment income provides

additional funding for loss payments. Our net cash flows from operating activities were \$2.4 billion and \$2.2 billion for the six months ended June 30, 2024 and 2023, respectively. Additionally, these cash flows reflected net catastrophe loss payments of \$365 million and \$458 million for the six months ended June 30, 2024 and 2023, respectively, and net tax payments of \$203 million and \$73 million for the six months ended June 30, 2024 and 2023, respectively.

If disbursements for losses and LAE, policy acquisition costs and other operating expenses were to exceed premium inflows, cash flow from reinsurance and insurance operations would be negative. The effect on cash flow from insurance operations would be partially offset by cash flow from investment income. Additionally, cash inflows from investment maturities of both short-term investments and longer term maturities are available to supplement other operating cash flows. We do not expect to supplement negative insurance operations cash flows with investment dispositions.

As the timing of payments for losses and LAE cannot be predicted with certainty, we maintain portfolios of long-term invested assets with varying maturities, along with short-term investments that provide additional liquidity for payment of claims. At June 30, 2024 and December 31, 2023, we held cash and short-term investments of \$4.0 billion and \$3.6 billion, respectively. Our short-term investments are generally readily marketable and can be converted to cash. In addition to these cash and short-term investments, at June 30, 2024, we had \$1.4 billion of available for sale fixed maturity securities maturing within one year or less, \$7.3 billion maturing within one to five years and \$8.4 billion maturing after five years. We believe that these fixed maturity securities, in conjunction with the short-term investments and positive cash flow from operations, provide ample sources of liquidity for the expected payment of losses and LAE in the near future. We do not anticipate selling a significant amount of securities to pay losses and LAE. At June 30, 2024, we had \$1.1 billion of net pre-tax unrealized depreciation related to fixed maturity - available for sale securities, comprised of \$1.2 billion of pre-tax unrealized depreciation and \$188 million of pre-tax unrealized appreciation.

Management generally expects annual positive cash flow from operations, which reflects the strength of overall pricing. However, given catastrophic events observed in recent periods, cash flow from operations may decline and could become negative in the near term as significant claim payments are made related to the catastrophes. However, as indicated above, the Company has access to ample liquidity to settle its catastrophe claims and also may receive payments under the catastrophe bond program and the Mt. Logan Re collateralized reinsurance arrangement.

In addition to our cash flows from operations and liquid investments, we also have multiple active credit facilities that provide commitments of up to \$1.7 billion of collateralized standby letters of credit to support business written by our Bermuda operating subsidiaries. In addition, the Company has the ability to request access to an additional \$240 million of uncommitted credit facilities, which would require approval from the applicable lender. There is no guarantee the uncommitted capacity will be available to us on a future date. See Note 7 – Credit Facilities for further details.

#### **Market Sensitive Instruments.**

The SEC's Financial Reporting Release #48 requires registrants to clarify and expand upon the existing financial statement disclosure requirements for derivative financial instruments, derivative commodity instruments and other financial instruments (collectively, "market sensitive instruments"). We do not generally enter into market sensitive instruments for trading purposes.

Our current investment strategy seeks to maximize after-tax income through a high quality, diversified, fixed maturity portfolio, while maintaining an adequate level of liquidity. Our mix of investments is adjusted periodically, consistent with our current and projected operating results and market conditions. The fixed maturity securities in the investment portfolio are comprised of available for sale and held to maturity securities. Additionally, we have invested in equity securities.

The overall investment strategy considers the scope of present and anticipated Company operations. In particular, estimates of the financial impact resulting from non-investment asset and liability transactions, together with our capital structure and other factors, are used to develop a net liability analysis. This analysis includes estimated payout characteristics for which our investments provide liquidity. This analysis is considered in the development of specific investment strategies for asset allocation, duration and credit quality. The change in overall market sensitive risk exposure principally reflects the asset changes that took place during the period.

<u>Interest Rate Risk.</u> Our \$39.1 billion investment portfolio at June 30, 2024 is principally comprised of fixed maturity securities, which are generally subject to interest rate risk and some foreign currency exchange rate risk, and some equity securities, which are subject to price fluctuations and some foreign exchange rate risk. The overall economic impact of the foreign exchange risks on the investment portfolio is partially mitigated by changes in the dollar value of foreign currency denominated liabilities and their associated income statement impact.

Interest rate risk is the potential change in value of the fixed maturity securities portfolio, including short-term investments, from a change in market interest rates. In a declining interest rate environment, interest rate risk includes prepayment risk on the \$6.6 billion of mortgage-backed securities in the \$29.8 billion fixed maturity portfolio. Prepayment risk results from potential accelerated principal payments that shorten the average life and thus the expected yield of the security.

The table below displays the potential impact of market value fluctuations and after-tax unrealized appreciation on our fixed maturity portfolio (including \$2.5 billion of short-term investments) for the period indicated based on upward and downward parallel and immediate 100 and 200 basis point shifts in interest rates. For legal entities with a U.S. dollar functional currency, this modeling was performed on each security individually. To generate appropriate price estimates on mortgage-backed securities, changes in prepayment expectations under different interest rate environments were taken into account. For legal entities with a non-U.S. dollar functional currency, the effective duration of the involved portfolio of securities was used as a proxy for the market value change under the various interest rate change scenarios.

	Impact of Interest Rate Shift in Basis Points At June 30, 2024								
	 -200		-100		0		100		200
(Dollars in millions)									
Total Fair Value	\$ 34,490	\$	33,386	\$	32,283	\$	31,179	\$	30,075
Fair Value Change from Base (%)	6.8 %		3.4 %		- %		(3.4)%		(6.8)%
Change in Unrealized Appreciation									
After-tax from Base (\$)	\$ 1,899	\$	950	\$	_	\$	(950)	\$	(1,899)

We had \$25.9 billion and \$24.6 billion of gross reserves for losses and LAE as of June 30, 2024 and December 31, 2023, respectively. These amounts are recorded at their nominal value, as opposed to present value, which would reflect a discount adjustment to reflect the time value of money. Since losses are paid out over a period of time, the present value of the reserves is less than the nominal value. As interest rates rise, the present value of the reserves decreases and, conversely, as interest rates decline, the present value increases. These movements are the opposite of the interest rate impacts on the fair value of investments. While the difference between present value and nominal value is not reflected in our financial statements, our financial results will include investment income over time from the investment portfolio until the claims are paid. Our loss and loss reserve obligations have an expected duration of approximately 3.9 years, which is reasonably consistent with our fixed income portfolio. If we were to discount our loss and LAE reserves, net of ceded reserves, the discount would be approximately \$4.6 billion resulting in a discounted reserve balance of approximately \$19.2 billion, representing approximately 59.3% of the value of the fixed maturity investment portfolio funds.

Foreign Currency Risk. Foreign currency risk is the potential change in value, income and cash flow arising from adverse changes in foreign currency exchange rates. Each of our non-U.S./Bermuda operations maintains capital in the currency of the country of its geographic location consistent with local regulatory guidelines. Each non-U.S. operation may conduct business in its local currency, as well as the currency of other countries in which it operates. The primary foreign currency exposures for these non-U.S. operations are the Canadian Dollar, the Singapore Dollar, the British Pound Sterling and the Euro. We mitigate foreign exchange exposure by generally matching the currency and duration of our assets to our corresponding operating liabilities. In accordance with FASB guidance, the impact on the fair value of available for sale fixed maturities due to changes in foreign currency exchange rates, in relation to functional currency, is reflected as part of other comprehensive income. Conversely, the impact of changes in foreign currency exchange rates, in relation to functional currency, on other assets and liabilities is reflected through net income as a component of other income (expense). In addition, we translate the assets, liabilities and income of non-U.S. dollar functional currency legal entities to the U.S. dollar. This translation amount is reported as a component of other comprehensive income.

### ITEM 4. CONTROLS AND PROCEDURES

As of the end of the period covered by this report, our management carried out an evaluation, with the participation of the Chief Executive Officer and Chief Financial Officer, of the effectiveness of our disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934, as amended (the "Exchange Act")). Based on their evaluation, the Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures

are effective to ensure that information required to be disclosed by the Company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms. Our management, with the participation of the Chief Executive Officer and Chief Financial Officer, also conducted an evaluation of our internal control over financial reporting to determine whether any changes occurred during the quarter covered by this report that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting. Based on that evaluation, there has been no such change during the quarter covered by this report.

#### PART II. OTHER INFORMATION

#### ITEM 1. LEGAL PROCEEDINGS

In the ordinary course of business, the Company is involved in lawsuits, arbitrations and other formal and informal dispute resolution procedures, the outcomes of which will determine the Company's rights and obligations under insurance and reinsurance agreements. In some disputes, the Company seeks to enforce its rights under an agreement or to collect funds owing to it. In other matters, the Company is resisting attempts by others to collect funds or enforce alleged rights. These disputes arise from time to time and are ultimately resolved through both informal and formal means, including negotiated resolution, arbitration and litigation. In all such matters, the Company believes that its positions are legally and commercially reasonable. The Company considers the statuses of these proceedings when determining its reserves for unpaid loss and LAE.

Aside from litigation and arbitrations related to these insurance and reinsurance agreements, the Company is not a party to any other material litigation or arbitration.
