SECURITIES AND EXCHANGE COMMISSION  
Washington, D.C. 20549  
**FORM 10-K**

Annual Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934  
For the fiscal year ended December 31, 2012

Commission file number 1-15731  
**EVEREST RE GROUP, LTD.**  
(Exact name of registrant as specified in its charter)

**Bermuda**  
(State or other jurisdiction of  
incorporation or organization)

**98-0365432**  
(I.R.S. Employer  
Identification No.)

Wessex House - 2<sup>nd</sup> Floor  
45 Reid Street  
PO Box HM 845  
Hamilton HM DX, Bermuda  
441-295-0006

(Address, including zip code, and telephone number, including area code, of registrant's principal executive office)

Securities registered pursuant to Section 12(b) of the Act:

<u>Title of Each Class</u>	<u>Name of Each Exchange on Which Registered</u>
Common Shares, \$.01 par value per share	New York Stock Exchange

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.

YES  NO

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act.

YES  NO

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

YES  NO

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

YES  NO

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of the registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K. [ ]

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer	<input checked="" type="checkbox"/>	Accelerated filer	<input type="checkbox"/>
Non-accelerated filer	<input type="checkbox"/>	Smaller reporting company	<input type="checkbox"/>

(Do not check if smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

YES  NO

The aggregate market value on June 30, 2012, the last business day of the registrant's most recently completed second quarter, of the voting shares held by non-affiliates of the registrant was \$5,366,686 thousand.

At February 1, 2013, the number of shares outstanding of the registrant's common shares was 51,097,630.

**DOCUMENTS INCORPORATED BY REFERENCE**

Certain information required by Items 10, 11, 12, 13 and 14 of Form 10-K is incorporated by reference into Part III hereof from the registrant's proxy statement for the 2012 Annual General Meeting of Shareholders, which will be filed with the Securities and Exchange Commission within 120 days of the close of the registrant's fiscal year ended December 31, 2012.

## **PART I**

Unless otherwise indicated, all financial data in this document have been prepared using accounting principles generally accepted in the United States of America ("GAAP"). As used in this document, "Group" means Everest Re Group, Ltd.; "Holdings Ireland" means Everest Underwriting Group (Ireland) Limited; "Ireland Re" means Everest Reinsurance Company (Ireland), Limited; "Holdings" means Everest Reinsurance Holdings, Inc.; "Everest Re" means Everest Reinsurance Company and its subsidiaries (unless the context otherwise requires); and the "Company", "we", "us", and "our" means Everest Re Group, Ltd. and its subsidiaries.

### **ITEM 1. BUSINESS**

#### **The Company.**

Group, a Bermuda company, was established in 1999 as a wholly-owned subsidiary of Holdings. On February 24, 2000, a corporate restructuring was completed and Group became the new parent holding company of Holdings. Holdings continues to be the holding company for the Company's U.S. based operations. Holders of shares of common stock of Holdings automatically became holders of the same number of common shares of Group. Prior to the restructuring, Group had no significant assets or capitalization and had not engaged in any business or prior activities other than in connection with the restructuring.

In connection with the February 24, 2000 restructuring, Group established a Bermuda-based reinsurance subsidiary, Everest Reinsurance (Bermuda), Ltd. ("Bermuda Re"), which commenced business in the second half of 2000. Group also formed Everest Global Services, Inc., a Delaware subsidiary, to perform administrative functions for Group and its U.S. based and non-U.S. based subsidiaries.

On December 30, 2008, Group contributed Holdings to its Irish holding company, Holdings Ireland. Holdings Ireland is a direct subsidiary of Group and was established to serve as a holding company for the U.S. and Irish reinsurance and insurance subsidiaries.

Holdings, a Delaware corporation, was established in 1993 to serve as the parent holding company of Everest Re, a Delaware property and casualty reinsurer formed in 1973. Until October 6, 1995, Holdings was an indirect wholly-owned subsidiary of The Prudential Insurance Company of America ("The Prudential"). On October 6, 1995, The Prudential sold its entire interest in Holdings in an initial public offering.

The Company's principal business, conducted through its operating segments, is the underwriting of reinsurance and insurance in the U.S., Bermuda and international markets. The Company had gross written premiums, in 2012, of \$4.3 billion with approximately 75% representing reinsurance and 25% representing insurance. Shareholders' equity at December 31, 2012 was \$6.7 billion. The Company underwrites reinsurance both through brokers and directly with ceding companies, giving it the flexibility to pursue business based on the ceding company's preferred reinsurance purchasing method. The Company underwrites insurance principally through general agent relationships, brokers and surplus lines brokers. Group's active operating subsidiaries, excluding Mt. McKinley Insurance Company ("Mt. McKinley"), which is in run-off, are each rated A+ ("Superior") by A.M. Best Company ("A.M. Best"), a leading provider of insurer ratings that assigns financial strength ratings to insurance companies based on their ability to meet their obligations to policyholders.

Following is a summary of the Company's principal operating subsidiaries:

- Bermuda Re, a Bermuda insurance company and a direct subsidiary of Group, is registered in Bermuda as a Class 4 insurer and long-term insurer and is authorized to write property and casualty and life and annuity business. Bermuda Re commenced business in the second half of 2000. Bermuda Re's UK branch writes property and casualty reinsurance to the United Kingdom and European markets. At December 31, 2012, Bermuda Re had shareholder's equity of \$3.0 billion.

- Everest International Reinsurance, Ltd. (“Everest International”), a Bermuda insurance company and a direct subsidiary of Group, is registered in Bermuda as a Class 4 insurer and is authorized to write property and casualty business. Through 2012, all of Everest International’s business has been inter-affiliate quota share reinsurance assumed from Everest Re, the UK branch of Bermuda Re and Ireland Re. At December 31, 2012, Everest International had shareholder’s equity of \$428.6 million.
- Ireland Re, an Ireland reinsurance company and an indirect subsidiary of Group, is licensed to write non-life reinsurance, both directly and through brokers, for the London and European markets.
- Everest Re, a Delaware insurance company and a direct subsidiary of Holdings, is a licensed property and casualty insurer and/or reinsurer in all states, the District of Columbia and Puerto Rico and is authorized to conduct reinsurance business in Canada, Singapore and Brazil. Everest Re underwrites property and casualty reinsurance for insurance and reinsurance companies in the U.S. and international markets. At December 31, 2012, Everest Re had statutory surplus of \$2.6 billion.
- Everest Insurance Company of Canada (“Everest Canada”), a Canadian insurance company and direct subsidiary of Holdings Ireland, is licensed to write property and casualty insurance in all Canadian provinces.
- Everest National Insurance Company (“Everest National”), a Delaware insurance company and a direct subsidiary of Everest Re, is licensed in 50 states and the District of Columbia and is authorized to write property and casualty insurance on an admitted basis in the jurisdictions in which it is licensed. The majority of Everest National’s business is reinsured by its parent, Everest Re.
- Everest Indemnity Insurance Company (“Everest Indemnity”), a Delaware insurance company and a direct subsidiary of Everest Re, writes excess and surplus lines insurance business in the U.S. on a non-admitted basis. Excess and surplus lines insurance is specialty property and liability coverage that an insurer not licensed to write insurance in a particular jurisdiction is permitted to provide to insureds when the specific specialty coverage is unavailable from admitted insurers. Everest Indemnity is licensed in Delaware and is eligible to write business on a non-admitted basis in all other states, the District of Columbia and Puerto Rico. The majority of Everest Indemnity’s business is reinsured by its parent, Everest Re.
- Everest Security Insurance Company (“Everest Security”), a Georgia insurance company and a direct subsidiary of Everest Re, writes property and casualty insurance on an admitted basis in Georgia and Alabama. The majority of Everest Security’s business is reinsured by its parent, Everest Re.
- Mt. McKinley, a Delaware insurance company and a direct subsidiary of Holdings, was acquired by Holdings in September 2000 from The Prudential. In 1985, Mt. McKinley ceased writing new and renewal insurance and commenced a run-off operation to service claims arising from its previously written business. Effective September 19, 2000, Mt. McKinley and Bermuda Re entered into a loss portfolio transfer reinsurance agreement, whereby Mt. McKinley transferred, for arm’s-length consideration, all of its net insurance exposures and reserves to Bermuda Re.
- Heartland Crop Insurance, Inc. (“Heartland”), a Kansas based managing general agent and a direct subsidiary of Holdings, was acquired on January 2, 2011. Heartland specializes in crop insurance, which is written mainly through Everest National.

**Reinsurance Industry Overview.**

Reinsurance is an arrangement in which an insurance company, the reinsurer, agrees to indemnify another insurance or reinsurance company, the ceding company, against all or a portion of the insurance risks underwritten by the ceding company under one or more insurance contracts. Reinsurance can provide a ceding company with several benefits, including a reduction in its net liability on individual risks or classes of risks, catastrophe protection from large and/or multiple losses and/or a reduction in operating leverage as measured by the ratio of net premiums and reserves to capital. Reinsurance also provides a ceding company with additional underwriting capacity by permitting it to accept larger risks and write more business than would be acceptable relative to the ceding company's financial resources. Reinsurance does not discharge the ceding company from its liability to policyholders; rather, it reimburses the ceding company for covered losses.

There are two basic types of reinsurance arrangements: treaty and facultative. Treaty reinsurance obligates the ceding company to cede and the reinsurer to assume a specified portion of a type or category of risks insured by the ceding company. Treaty reinsurers do not separately evaluate each of the individual risks assumed under their treaties, instead, the reinsurer relies upon the pricing and underwriting decisions made by the ceding company. In facultative reinsurance, the ceding company cedes and the reinsurer assumes all or part of the risk under a single insurance contract. Facultative reinsurance is negotiated separately for each insurance contract that is reinsured. Facultative reinsurance, when purchased by ceding companies, usually is intended to cover individual risks not covered by their reinsurance treaties because of the dollar limits involved or because the risk is unusual.

Both treaty and facultative reinsurance can be written on either a pro rata basis or an excess of loss basis. Under pro rata reinsurance, the ceding company and the reinsurer share the premiums as well as the losses and expenses in an agreed proportion. Under excess of loss reinsurance, the reinsurer indemnifies the ceding company against all or a specified portion of losses and expenses in excess of a specified dollar amount, known as the ceding company's retention or reinsurer's attachment point, generally subject to a negotiated reinsurance contract limit.

In pro rata reinsurance, the reinsurer generally pays the ceding company a ceding commission. The ceding commission generally is based on the ceding company's cost of acquiring the business being reinsured (commissions, premium taxes, assessments and miscellaneous administrative expense and may contain profit sharing provisions, whereby the ceding commission is adjusted based on loss experience). Premiums paid by the ceding company to a reinsurer for excess of loss reinsurance are not directly proportional to the premiums that the ceding company receives because the reinsurer does not assume a proportionate risk. There is usually no ceding commission on excess of loss reinsurance.

Reinsurers may purchase reinsurance to cover their own risk exposure. Reinsurance of a reinsurer's business is called a retrocession. Reinsurance companies cede risks under retrocessional agreements to other reinsurers, known as retrocessionaires, for reasons similar to those that cause insurers to purchase reinsurance: to reduce net liability on individual or classes of risks, protect against catastrophic losses, stabilize financial ratios and obtain additional underwriting capacity.

Reinsurance can be written through intermediaries, generally professional reinsurance brokers, or directly with ceding companies. From a ceding company's perspective, the broker and the direct distribution channels have advantages and disadvantages. A ceding company's decision to select one distribution channel over the other will be influenced by its perception of such advantages and disadvantages relative to the reinsurance coverage being placed.

**Business Strategy.**

The Company's business strategy is to sustain its leadership position within targeted reinsurance and insurance markets, provide effective management throughout the property and casualty underwriting cycle and thereby achieve an attractive return for its shareholders. The Company's underwriting strategies seek to capitalize on its i) financial strength and capacity, ii) global franchise, iii) stable and experienced management team, iv) diversified product and distribution offerings, v) underwriting expertise and disciplined approach, vi) efficient and low-cost operating structure and vii) effective enterprise risk management practices.

The Company offers treaty and facultative reinsurance and admitted and non-admitted insurance. The Company's products include the full range of property and casualty reinsurance and insurance coverages, including marine, aviation, surety, errors and omissions liability ("E&O"), directors' and officers' liability ("D&O"), medical malpractice, other specialty lines, accident and health ("A&H") and workers' compensation.

The Company's underwriting strategies emphasizes underwriting profitability over premium volume. Key elements of this strategy include careful risk selection, appropriate pricing through strict underwriting discipline and adjustment of the Company's business mix in response to changing market conditions. The Company focuses on reinsuring companies that effectively manage the underwriting cycle through proper analysis and pricing of underlying risks and whose underwriting guidelines and performance are compatible with its objectives.

The Company's underwriting strategies emphasizes flexibility and responsiveness to changing market conditions, such as increased demand or favorable pricing trends. The Company believes that its existing strengths, including its broad underwriting expertise, global presence, strong financial ratings and substantial capital, facilitate adjustments to its mix of business geographically, by line of business and by type of coverage, allowing it to participate in those market opportunities that provide the greatest potential for underwriting profitability. The Company's insurance operations complement these strategies by accessing business that is not available on a reinsurance basis. The Company carefully monitors its mix of business across all operations to avoid unacceptable geographic or other risk concentrations.

#### **Marketing.**

The Company writes business on a worldwide basis for many different customers and lines of business, thereby obtaining a broad spread of risk. The Company is not substantially dependent on any single customer, small group of customers, line of business or geographic area. For the 2012 calendar year, no single customer (ceding company or insured) generated more than 5.7% of the Company's gross written premiums. The Company believes that a reduction of business from any one customer would not have a material adverse effect on its future financial condition or results of operations.

Approximately 63%, 25% and 12% of the Company's 2012 gross written premiums were written in the broker reinsurance, insurance markets and direct reinsurance, respectively.

The broker reinsurance market consists of several substantial national and international brokers and a number of smaller specialized brokers. Brokers do not have the authority to bind the Company with respect to reinsurance agreements, nor does the Company commit in advance to accept any portion of a broker's submitted business. Reinsurance business from any ceding company, whether new or renewal, is subject to acceptance by the Company. Brokerage fees are generally paid by reinsurers. The Company's ten largest brokers accounted for an aggregate of approximately 62% of gross written premiums in 2012. The largest broker, Aon Benfield Re, accounts for approximately 21% of gross written premiums. The second largest broker, Marsh and McLennan, accounted for approximately 20% of gross written premiums. The Company believes that a reduction of business assumed from any one broker would not have a material adverse effect on the Company.

The direct reinsurance market remains an important distribution channel for reinsurance business written by the Company. Direct placement of reinsurance enables the Company to access clients who prefer to place their reinsurance directly with reinsurers based upon the reinsurer's in-depth understanding of the ceding company's needs.

The Company's insurance business writes direct business targeting commercial, property and casualty. It also writes business through general agents, brokers and surplus lines brokers. In 2012, Arrowhead General Insurance Agency accounted for approximately 3% of the Company's gross written premium. No other single general agent generated more than 2% of the Company's gross written premiums.

The Company continually evaluates each business relationship, including the underwriting expertise and experience brought to bear through the involved distribution channel, performs analyses to evaluate financial security, monitors performance and adjusts underwriting decisions accordingly.

**Segment Results.**

During the quarter ended September 30, 2011, the Company realigned its reporting segments to reflect recent changes in the type and volume of business written. The Company previously reported the results of Marine & Aviation, Surety, Accident and Health (“A&H”) Reinsurance and A&H Primary operations as a separate segment—Specialty Underwriting. The A&H primary business, which is a relatively new line of business for the Company, has increased significantly, representing approximately 2% of premiums earned and is projected to continue to grow. The A&H primary business is better aligned with the Insurance reporting segment based on the similarities of this business with those businesses already reflected in the Insurance segment. The other operating units included in the Specialty Underwriting segment would have encompassed less than 5% of the Company’s premiums earned and their volume is projected to remain less than 5%. As a result of the size of these remaining operating units and their similarity to the business reported within U.S. Reinsurance, they have been reclassified to the U.S. Reinsurance segment. There has been no change to the International and Bermuda reporting segments. The Company has restated all segment information for prior years to conform to the new reporting segment structure.

The U.S. Reinsurance operation writes property and casualty reinsurance and specialty lines of business, including Marine, Aviation, Surety and A&H business, on both a treaty and facultative basis, through reinsurance brokers, as well as directly with ceding companies primarily within the U.S. The International operation writes non-U.S. property and casualty reinsurance through Everest Re’s branches in Canada and Singapore and through offices in Brazil, Miami and New Jersey. The Bermuda operation provides reinsurance and insurance to worldwide property and casualty markets through brokers and directly with ceding companies from its Bermuda office and reinsurance to the United Kingdom and European markets through its UK branch and Ireland Re. The Insurance operation writes property and casualty insurance, including medical stop loss insurance, directly and through general agents, brokers and surplus lines brokers within the U.S. and Canada.

These segments are managed independently, but conform with corporate guidelines with respect to pricing, risk management, control of aggregate catastrophe exposures, capital, investments and support operations. Management generally monitors and evaluates the financial performance of these operating segments based upon their underwriting results.

Underwriting results include earned premium less losses and loss adjustment expenses (“LAE”) incurred, commission and brokerage expenses and other underwriting expenses. Underwriting results are measured using ratios, in particular loss, commission and brokerage and other underwriting expense ratios, which, respectively, divide incurred losses, commissions and brokerage and other underwriting expenses by premiums earned. The Company utilizes inter-affiliate reinsurance, although such reinsurance does not materially impact segment results, as business is generally reported within the segment in which the business was first produced. For selected financial information regarding these segments, see ITEM 8, “Financial Statements and Supplementary Data” - Note 19 of Notes to Consolidated Financial Statements and ITEM 7, “Management’s Discussion and Analysis of Financial Condition and Results of Operation - Segment Results”.

## Underwriting Operations.

The following five year table presents the distribution of the Company's gross written premiums by its segments: U.S. Reinsurance, International, Bermuda and Insurance. The premiums for each segment are further split between property and casualty business and, for reinsurance business, between pro rata or excess of loss business:

(Dollars in millions)	Gross Written Premiums by Segment Years Ended December 31,

(1) For purposes of the presentation above, pro rata includes all insurance and reinsurance attaching to the first dollar of loss incurred by the ceding company.

(2) Certain totals and subtotals may not reconcile due to rounding.

U.S. Reinsurance Segment. The Company's U.S. Reinsurance segment writes property and casualty reinsurance and specialty lines of business, including Marine, Aviation, Surety and A&H business, on both a treaty and facultative basis, through reinsurance brokers, as well as directly with ceding companies within the U.S. The marine and aviation business is written primarily through brokers and contains a significant international component. Surety business consists mainly of reinsurance of contract surety bonds. The Company targets certain brokers and, through the broker market, specialty companies and small to medium sized standard lines companies. The Company also targets companies that place their business predominantly in the direct market, including small to medium sized regional ceding companies, and seeks to develop long-term relationships with those companies. In addition, the U.S. Reinsurance segment writes portions of reinsurance programs for large, national insurance companies.

In 2012, \$630.8 million of gross written premiums were attributable to U.S. treaty property business, of which 67.9% was written on an excess of loss basis and 32.1% was written on a pro rata basis. Included in gross written premiums for U.S. treaty property business was \$3.1 million related to the crop hail line of business. The Company's property underwriters utilize sophisticated underwriting methods to analyze and price property business. The Company manages its exposures to catastrophe and other large losses by limiting exposures on individual contracts and limiting aggregate exposures to catastrophes in any particular zone and across contiguous zones.

U.S. treaty casualty business accounted for \$391.6 million of gross written premiums in 2012, of which 61.9% was written on a pro rata basis and 38.1% was written on an excess of loss basis. The treaty casualty business consists of professional liability, D&O liability, workers' compensation, excess and surplus lines and other liability coverages. As a result of the complex technical nature of most of these risks, the Company's casualty underwriters tend to specialize by line of business and work closely with the Company's pricing actuaries.

The Company's facultative unit conducts business both through brokers and directly with ceding companies, and consists of four underwriting units representing property, casualty, specialty and national brokerage lines of business. Business is written from a facultative headquarters office in New York and satellite offices in Chicago and Oakland. In 2012, \$42.2 million, \$35.9 million and \$13.2 million of gross written premiums were attributable to the property, casualty and national brokerage lines of business, respectively.

The marine and aviation unit's 2012 gross written premiums totaled \$102.5 million, substantially all of which was written on a treaty basis and sourced through reinsurance brokers. Of the marine and aviation gross written premiums in 2012, marine treaties represented 65.6% and consisted mainly of hull and cargo coverage. In 2012, the marine unit's premiums were written 70.5% on an excess of loss basis and 29.5% on a pro rata basis. Of the marine and aviation gross written premiums in 2012, aviation premiums accounted for 34.4% and included reinsurance of airline and general aviation risks. In 2012, the aviation unit's premiums were written 88.5% on a pro rata basis and 11.5% on an excess of loss basis.

In 2012, gross written premiums of the surety unit totaled \$54.5 million, 95.8% of which was written on a pro rata basis. Most of the portfolio is reinsurance of contract surety bonds written directly with ceding companies, with the remainder being trade credit reinsurance, mostly in international markets.

In 2012, gross written premium of the A&H reinsurance unit totaled \$40.1 million, primarily written through brokers.

In 2012, 92.5% and 7.5% of the U.S. Reinsurance segment's gross written premiums were written in the broker reinsurance and direct reinsurance markets, respectively.

International Segment. The Company's International segment focuses on opportunities in the international reinsurance markets. The Company targets several international markets, including: Canada, with a branch in Toronto; Asia, with a branch in Singapore; and Latin America, Brazil, Africa and the Middle East, which business is serviced from Everest Re's Miami and New Jersey offices. The Company also writes from New Jersey "home-foreign" business, which provides reinsurance on the international portfolios of U.S. insurers. Of the Company's 2012 international gross written premiums, 83.6% represented property business, while 16.4% represented casualty business. As with its U.S. operations, the Company's International segment focuses on financially sound companies that have strong management and underwriting discipline and

expertise. Of the Company's international business, 69.0% was written through brokers, with 31.0% written directly with ceding companies.

Gross written premiums of the Company's Canadian branch totaled \$148.5 million in 2012 and consisted of 39.8% of excess casualty business, 35.5% of excess property business, 17.8% of pro rata casualty business and 6.9% of pro rata property business. Of the Canadian gross written premiums, 83.9% consisted of treaty reinsurance, while 16.1% was facultative reinsurance.

The Company's Singapore branch covers the Asian markets and accounted for \$268.1 million of gross written premiums in 2012 and consisted of 59.0% of pro rata property business, 37.9% of excess property business, 2.5% of pro rata casualty business and 0.6% of excess casualty business.

International business written out of Everest Re's Miami and New Jersey offices accounted for \$775.7 million of gross written premiums in 2012 and consisted of 59.6% of pro rata treaty property business, 25.9% of excess treaty property business, 9.0% of pro rata treaty casualty business, 4.0% of excess treaty casualty business and 1.5% of facultative property and casualty business. Of this international business, 69.7% was sourced from Latin America, 12.9% was sourced from the Middle East, 9.6% was sourced from Africa and 7.8% was home-foreign business.

Bermuda Segment. The Company's Bermuda segment writes property and casualty reinsurance through Bermuda Re and property and casualty reinsurance through its UK branch as well as through Ireland Re. In 2012, Bermuda Re had gross written premiums of \$363.8 million, virtually all of which was treaty reinsurance.

In 2012, the UK branch of Bermuda Re wrote \$274.4 million of gross treaty reinsurance premium consisting of 39.4% of excess casualty business, 21.5% of pro rata property business, 19.8% of excess property business and 19.3% of pro rata casualty business.

In 2012, Ireland Re wrote \$96.2 million of gross treaty reinsurance premium consisting of 49.7% of pro rata property business, 31.7% of excess property business, 9.7% of excess casualty business and 8.9% of pro rata casualty business.

Insurance Segment. The Insurance segment writes property and casualty insurance, including medical stop loss insurance, directly and through general agents, brokers and surplus lines brokers within the U.S. and Canada. In 2012, the Company's Insurance segment wrote \$1,073.1 million of gross written premiums, of which 57.2% was casualty and 42.8% was property, principally targeting commercial property and casualty business. Business written through general agents with program administrators represented 41.8% of the premium with the remainder written directly through the Company's offices. Workers' compensation business accounted for \$312.3 million, or 29.1%, of the total business written, including \$257.3 million, or 82.4%, of workers' compensation business written in California. In addition, crop insurance business written was \$276.0 million; professional liability business written was \$201.9 million; A&H insurance business written was \$91.3 million; other short-tail/package business written was \$86.9 million; other liability business written was \$78.7 million; and non-standard auto insurance business written through retail agents was \$26.1 million. With respect to insurance written through general agents and surplus lines brokers, the Company supplements the initial underwriting process with periodic claims, underwriting and operational reviews and ongoing monitoring.

Geographic Areas. The Company conducts its business in Bermuda, the U.S. and a number of foreign countries. For select financial information about geographic areas, see ITEM 8, "Financial Statements and Supplementary Data" - Note 19 of Notes to the Consolidated Financial Statements. Risks attendant to the foreign operations of the Company parallel those attendant to the U.S. operations of the Company, with the primary exception of foreign exchange risks. For more information about the risks, see ITEM 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations - Safe Harbor Disclosure".

**Underwriting.**

One of the Company's strategies is to "lead" as many of the reinsurance treaties it underwrites as possible. The Company leads on approximately two-thirds of its treaty reinsurance business as measured by premium. The lead reinsurer on a treaty generally accepts one of the largest percentage shares of the treaty and is in the strongest position to negotiate price, terms and conditions. Management believes this strategy enables it to obtain more favorable terms and conditions on the treaties on which it participates. When the Company does not lead the treaty, it may still suggest changes to any aspect of the treaty. The Company may decline to participate on a treaty based upon its assessment of all relevant factors.

The Company's treaty underwriting process involves a team approach among the Company's underwriters, actuaries and claim staff. Treaties are reviewed for compliance with the Company's general underwriting standards and most larger treaties are subjected to detailed actuarial analysis. The actuarial models used in such analyses are tailored in each case to the subject exposures and loss experience. The Company does not separately evaluate each of the individual risks assumed under its treaties. The Company does, however, evaluate the underwriting guidelines of its ceding companies to determine their adequacy prior to entering into a treaty. The Company may also conduct underwriting, operational and claim audits at the offices of ceding companies to monitor adherence to underwriting guidelines. Underwriting audits focus on the quality of the underwriting staff, pricing and risk selection and rate monitoring over time. Claim audits may be performed in order to evaluate the client's claims handling abilities and practices.

The Company's facultative underwriters operate within guidelines specifying acceptable types of risks, limits and maximum risk exposures. Specified classes of large premium U.S. risks are referred to Everest Re's New York facultative headquarters for specific review before premium quotations are given to clients. In addition, the Company's guidelines require certain types of risks to be submitted for review because of their aggregate limits, complexity or volatility, regardless of premium amount on the underlying contract. Non-U.S. risks exhibiting similar characteristics are reviewed by senior managers within the involved operations.

The Company's insurance operations principally write casualty coverages for homogeneous risks through select program managers. These programs are evaluated based upon actuarial analysis and the program manager's capabilities. The Company's rates, forms and underwriting guidelines are tailored to specific risk types. The Company's underwriting, actuarial, claim and financial functions work closely with its program managers to establish appropriate underwriting and processing guidelines as well as appropriate performance monitoring mechanisms.

**Risk Management of Underwriting and Retrocession Arrangements**

Underwriting Risk and Accumulation Controls. Each segment and business unit manages its underwriting risk in accordance with established guidelines. These guidelines place dollar limits on the amount of business that can be written based on a variety of factors, including ceding company profile, line of business, geographic location and risk hazards. In each case, the guidelines permit limited exceptions, which must be authorized by the Company's senior management. Management regularly reviews and revises these guidelines in response to changes in business unit market conditions, risk versus reward analyses and the Company's enterprise and underwriting risk management processes.

The operating results and financial condition of the Company can be adversely affected by catastrophe and other large losses. The Company manages its exposure to catastrophes and other large losses by:

- selective underwriting practices;
- diversifying its risk portfolio by geographic area and by types and classes of business;
- limiting its aggregate catastrophe loss exposure in any particular geographic zone and contiguous zones;
- purchasing reinsurance and/or retrocessional protection to the extent that such coverage can be secured cost-effectively. See "Reinsurance and Retrocession Arrangements".

Like other insurance and reinsurance companies, the Company is exposed to multiple insured losses arising out of a single occurrence, whether a natural event, such as a hurricane or an earthquake, or other catastrophe, such as an explosion at a major factory. A large catastrophic event can be expected to generate insured losses to multiple reinsurance treaties, facultative certificates and across lines of business.

The Company focuses on potential losses that could result from any single event or series of events as part of its evaluation and monitoring of its aggregate exposures to catastrophic events. Accordingly, the Company employs various techniques to estimate the amount of loss it could sustain from any single catastrophic event or series of events in various geographic areas. These techniques range from deterministic approaches, such as tracking aggregate limits exposed in catastrophe-prone zones and applying reasonable damage factors, to modeled approaches that attempt to scientifically measure catastrophe loss exposure using sophisticated Monte Carlo simulation techniques that forecast frequency and severity of expected losses on a probabilistic basis.

No single computer model or group of models is currently capable of projecting the amount and probability of loss in all global geographic regions in which the Company conducts business. In addition, the form, quality and granularity of underwriting exposure data furnished by ceding companies is not uniformly compatible with the data requirements for the Company's licensed models, which adds to the inherent imprecision in the potential loss projections. Further, the results from multiple models and analytical methods must be combined and interpolated to estimate potential losses by and across business units. Also, while most models have been updated to incorporate claims information from recent catastrophic events, catastrophe model projections are still inherently imprecise. In addition, uncertainties with respect to future climatic patterns and cycles add to the already significant uncertainty of loss projections from models using historic long term frequency and severity data.

Nevertheless, when combined with traditional risk management techniques and sound underwriting judgment, catastrophe models are a useful tool for underwriters to price catastrophe exposed risks and for providing management with quantitative analyses with which to monitor and manage catastrophic risk exposures by zone and across zones for individual and multiple events.

Projected catastrophe losses are generally summarized in terms of the probable maximum loss ("PML"). The Company defines PML as its anticipated loss, taking into account contract terms and limits, caused by a single catastrophe affecting a broad contiguous geographic area, such as that caused by a hurricane or earthquake. The PML will vary depending upon the modeled simulated losses and the make-up of the in force book of business. The projected severity levels are described in terms of "return periods", such as "100-year events" and "250-year events". For example, a 100-year PML is the estimated loss to the current in-force portfolio from a single event which has a 1% probability of being exceeded in a twelve month period. In other words, it corresponds to a 99% probability that the loss from a single event will fall below the indicated PML. It is important to note that PMLs are estimates. Modeled events are hypothetical events produced by a stochastic model. As a result, there can be no assurance that any actual event will align with the modeled event or that actual losses from events similar to the modeled events will not vary materially from the modeled event PML.

From an enterprise risk management perspective, management sets limits on the levels of catastrophe loss exposure the Company may underwrite. The limits are revised periodically based on a variety of factors, including but not limited to the Company's financial resources and expected earnings and risk/reward analyses of the business being underwritten.

Management estimates that the projected net economic loss from its largest 100-year event in a given zone represents approximately 10% of its projected 2013 shareholders' equity. Economic loss is the gross PML reduced by estimated reinstatement premiums to renew coverage and estimated income taxes. The impact of income taxes on the PML depends on the distribution of the losses by corporate entity, which is also affected by inter-affiliate reinsurance. Management also monitors and controls its largest PMLs at multiple points along the loss distribution curve, such as loss amounts at the 20, 50, 100, 250, 500 and 1,000 year return periods. This process enables management to identify and control exposure accumulations and to integrate such exposures into enterprise risk, underwriting and capital management decisions.

The Company's catastrophe loss projections, segmented by risk zones, are updated quarterly and reviewed as part of a formal risk management review process. The table below reflects the Company's gross PMLs at various return times for its top three zones/perils (as ranked by the largest 1 in 100 year events) based on loss projection data as of January 1, 2013:

Return Periods (in years)	1 in 20	1 in 50	1 in 100	1 in 250	1 in 500	1 in 1,000
Exceeding Probability	5.0%	2.0%	1.0%	0.4%	0.2%	0.1%
(Dollars in millions)						
Zone/Area, Peril						
Southeast U.S., Wind	\$ 472	\$ 840	\$ 1,084	\$ 1,358	\$ 1,545	\$ 1,685
California, Earthquake	127	416	767	1,028	1,309	1,572
Northeast U.S., Wind	76	305	663	1,014	1,298	1,521

The projected net economic losses for the top three zones/perils scheduled above are as follows:

Return Periods (in years)	1 in 20	1 in 50	1 in 100	1 in 250	1 in 500	1 in 1,000
Exceeding Probability	5.0%	2.0%	1.0%	0.4%	0.2%	0.1%
(Dollars in millions)						
Zone/Area, Peril						
Southeast U.S., Wind	\$ 297	\$ 521	\$ 671	\$ 835	\$ 958	\$ 1,045
California, Earthquake	98	289	511	670	854	1,024
Northeast U.S., Wind	57	220	433	643	822	966

The Company considers purchasing retrocessional protection by evaluating the underlying exposures in comparison to the availability of cost-effective protection. For the period from August 1, 2012 to July 31, 2013, the Company has catastrophe loss reinsurance protection in place for losses arising from earthquakes of 61% of \$100 million in excess of \$190 million, excluding the territories of the U.S., Japan and Europe. The Company continues to evaluate the availability and cost of various retrocessional products and loss mitigation approaches in the marketplace.

The Company believes that its methods of monitoring, analyzing and managing catastrophe exposures provide a credible risk management framework, which are integrated with its enterprise risk management, underwriting and capital management plans. However, there is much uncertainty and imprecision inherent in the catastrophe models and the catastrophe loss estimation process generally. As a result, there can be no assurance that the Company will not experience losses from individual events that exceed the PML or other return period projections, perhaps by a material amount. Nor can there be assurance that the Company will not experience events impacting multiple zones, or multiple severe events that could, in the aggregate, exceed the Company's PML expectations by a significant amount.

**Terrorism Risk.** The Company has limited exposure to losses from terrorism risk. While the Company writes some reinsurance contracts covering terrorism, the Company's risk management philosophy is to limit the amount of exposure by geographic region, and to strictly manage coverage for properties in areas that may be considered a target for terrorists. Although providing terrorism coverage on reinsurance contracts is negotiable, most insurance policies mandate inclusion of terrorism coverage. As a result, the Company is exposed to losses from terrorism on its Insurance book of business, particularly its workers' compensation and property policies. However, the Insurance book generally does not insure large corporations or corporate locations that represent large concentrations of risk.

Because of the limited nature of terrorism exposure, the U.S. Terrorism Risk Insurance Act of 2002 and its amendments do not have a significant impact on company operations.

Reinsurance and Retrocession Arrangements. The Company does not typically purchase significant retrocessional coverage for specific reinsurance business written, but it will do so when management deems it to be prudent and/or cost-effective to reinsure a portion of the risks being assumed. The Company participates in “common account” retrocessional arrangements for certain reinsurance treaties whereby a ceding company purchases reinsurance for the benefit of itself and its reinsurers under one or more of its reinsurance treaties. Common account retrocessional arrangements reduce the effect of individual or aggregate losses to all participating companies, including the ceding company, with respect to the involved treaties.

The Company typically considers the purchase of reinsurance to cover insurance program exposures written by the Insurance segment. The type of reinsurance coverage considered is dependent upon individual risk exposures, individual program exposures, aggregate exposures by line of business, overall segment and corporate wide exposures and the cost effectiveness of available reinsurance. Facultative reinsurance will typically be considered for large individual exposures and quota share reinsurance will generally be considered for entire programs of business.

The Company also considers purchasing corporate level retrocessional protection covering the potential accumulation of exposures. Such consideration includes balancing the underlying exposures against the availability of cost-effective retrocessional protection.

All of the Company’s reinsurance and retrocessional agreements transfer significant reinsurance risk and therefore, are accounted for as reinsurance in accordance with the Financial Accounting Standards Board (“FASB”) guidance.

At December 31, 2012, the Company had \$659.1 million in reinsurance receivables with respect to both paid and unpaid losses ceded. Of this amount, \$181.5 million, or 27.5%, was receivable from C.V. Starr (Bermuda) (“C.V. Starr”); \$79.9 million, or 12.1% was receivable from Federal Crop Insurance Company (“FCIC”); \$65.2 million, or 9.9%, was receivable from XL Reinsurance America (“XL”); \$58.0 million, or 8.8% was receivable from Berkley Insurance Company (“Berkley”); and \$54.1 million, or 8.2%, was receivable from Transatlantic Reinsurance Company (“Transatlantic”). The receivable from C.V. Starr is fully collateralized by a trust agreement. No other retrocessionaire accounted for more than 5% of the Company’s receivables. Although management carefully selects its reinsurers, the Company is subject to credit risk with respect to its reinsurance because the ceding of risk to reinsurers does not relieve the Company of its liability to insureds or ceding companies. See ITEM 7, “Management’s Discussion and Analysis of Financial Condition and Results of Operations – Financial Condition”.

**Claims.**

Reinsurance claims are managed by the Company’s professional claims staff whose responsibilities include reviewing initial loss reports and coverage issues, monitoring claims handling activities of ceding companies, establishing and adjusting proper case reserves and approving payment of claims. In addition to claims assessment, processing and payment, the claims staff selectively conducts comprehensive claim audits of both specific claims and overall claim procedures at the offices of selected ceding companies. Insurance claims, except those relating to Mt. McKinley’s business, are generally handled by third party claims service providers who have limited authority and are subject to oversight by the Company’s professional claims staff.

The Company intensively manages its asbestos and environmental (“A&E”) exposures through dedicated, centrally managed claim staffs for Mt. McKinley and Everest Re. Both are staffed with experienced claim and legal professionals who specialize in the handling of such exposures. These units actively manage each individual insured and reinsured account, responding to claim developments with evaluations of the involved exposures and adjustment of reserves as appropriate. Specific or general claim developments that may have material implications for the Company are regularly communicated to senior management, actuarial, legal and financial areas. Senior management and claim management personnel meet at least quarterly to review the Company’s overall reserve positions and make changes, if appropriate. The Company continually reviews its internal processing, communications and analytics, seeking to enhance the management of its A&E exposures, in particular in regard to changes in asbestos claims and litigation.

**Reserves for Unpaid Property and Casualty Losses and LAE.**

Significant periods of time may elapse between the occurrence of an insured loss, the reporting of the loss to the insurer and the reinsurer and the payment of that loss by the insurer and subsequent payments to the insurer by the reinsurer. To recognize liabilities for unpaid losses and LAE, insurers and reinsurers establish reserves, which are balance sheet liabilities representing estimates of future amounts needed to pay reported and unreported claims and related expenses for losses that have already occurred. Actual losses and LAE paid may deviate, perhaps substantially, from such reserves. To the extent reserves prove to be insufficient to cover actual losses and LAE after taking into account available reinsurance coverage, the Company would have to recognize such reserve shortfalls and incur a charge to earnings, which could be material in the period such recognition takes place. See ITEM 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations – Loss and LAE Reserves".

As part of the reserving process, insurers and reinsurers evaluate historical data and trends and make judgments as to the impact of various factors such as legislative and judicial developments that may affect future claim amounts, changes in social and political attitudes that may increase loss exposures and inflationary and general economic trends. While the reserving process is difficult and subjective for insurance companies, the inherent uncertainties of estimating such reserves are even greater for the reinsurer, due primarily to the longer time between the date of an occurrence and the reporting of any attendant claims to the reinsurer, the diversity of development patterns among different types of reinsurance treaties or facultative contracts, the necessary reliance on the ceding companies for information regarding reported claims and differing reserving practices among ceding companies. In addition, trends that have affected development of liabilities in the past may not necessarily occur or affect liability development in the same manner or to the same degree in the future. As a result, actual losses and LAE may deviate, perhaps substantially, from estimates of reserves reflected in the Company's consolidated financial statements.

Like many other property and casualty insurance and reinsurance companies, the Company has experienced adverse loss development for prior accident years, which has led to increases in losses and LAE reserves and corresponding charges to income (loss) in the periods in which the adjustments were made. There can be no assurance that adverse development from prior years will not continue in the future or that such adverse development will not have a material adverse effect on net income (loss).

**Changes in Historical Reserves.**

The following table shows changes in historical loss reserves for the Company for 2002 and subsequent years. The table is presented on a GAAP basis except that the Company's loss reserves for its Canadian branch operations are presented in Canadian dollars, the impact of which is not material. The top line of the table shows the estimated reserves for unpaid losses and LAE recorded at each year end date. The upper (paid) portion of the table presents the related cumulative amounts paid through each subsequent year end. The lower (liability re-estimated) portion shows the re-estimated amount of the original reserves as of the end of each succeeding year. The reserve estimates have been revised as more information became known about the actual claims for which the reserves were carried. The cumulative (deficiency)/redundancy line represents the cumulative change in estimates since the initial reserve was established. It is equal to the initial reserve less the latest estimate of the ultimate liability.

Since the Company has international operations, some of its loss reserves are established in foreign currencies and converted to U.S. dollars for financial reporting. Changes in conversion rates from period to period impact the U.S. dollar value of carried reserves and correspondingly, the cumulative deficiency line of the table. However, unlike other reserve development that affects net income (loss), the impact of currency translation is a component of other comprehensive income (loss). To differentiate these two reserve development components, the translation impacts for each calendar year are reflected in the table of Effects on Pre-tax Income Resulting from Reserve Re-estimates.

Each amount other than the original reserves in the top half of the table below includes the effects of all changes in amounts for prior periods. For example, if a loss settled in 2006 for \$100,000, was first reserved in 2003 at \$60,000 and remained unchanged until settlement, the \$40,000 deficiency (actual loss minus original estimate) would affect the cumulative deficiency for each of the years in 2003 through 2005. Conditions and trends that have affected development of the ultimate liability in the past are not indicative of future developments. Accordingly, it is not appropriate to extrapolate future redundancies or deficiencies based on this table.

Ten Year GAAP Loss Development Table Presented Net of Reinsurance with Supplemental Gross Data (1) (2)

(Dollars in millions)	2002	2003	2004	2005	2006	2007	2008	2009	2010	2011	2012
Net Reserves for unpaid loss and LAE	\$ 3,895.8	\$ 5,158.4	\$ 6,766.9	\$ 8,175.4	\$ 8,078.9	\$ 8,324.7	\$ 8,214.7	\$ 8,315.9	\$ 8,650.7	\$ 9,553.0	\$ 9,464.6
Paid (cumulative) as of:

(1) The Canadian Branch reserves are reflected in Canadian dollars.

(2) Some amounts may not reconcile due to rounding.

There has been minimal development in reserves since 2006. Three classes of business were the principal contributors to the deficiencies through 2006: 1) the run-off of asbestos claims for both direct and reinsurance business has significantly contributed to the cumulative deficiencies for all years presented through 2006; 2) professional liability reinsurance, general casualty reinsurance and workers' compensation insurance contributed to the deficiencies for years 2002 and 2003; and 3) property catastrophe adverse development contributed to the deficiency for 2005.

In 2007, the Company completed a detailed study of its asbestos experience and its cedants' asbestos exposures and also considered industry trends. As a result of the study, the Company increased its gross reinsurance asbestos reserves by \$250.0 million and increased its gross direct asbestos reserves by \$75.0 million. These reserve increases, as well as adverse development on asbestos in prior years, have a significant impact on the cumulative deficiencies. Subsequent to the study, the Company's loss activity has been in line with expectations per the reserves established at December 31, 2007. The Company's A&E reserves represent management's best estimate of the ultimate liability, however, there can be no assurance that ultimate loss payments will not exceed such reserves, perhaps by a significant amount. No additional gross A&E reserve strengthening was made during 2008 through 2010 and only an insignificant amount of development occurred in 2011 and 2012.

In the professional liability reinsurance class, the early 2000s saw a proliferation of claims relating to bankruptcies and other corporate, financial and/or management improprieties. This resulted in an increase in the frequency and severity of claims under the professional liability policies reinsured by the Company. In the general casualty area, the Company has experienced claim frequency and severity greater than expected in the Company's pricing and initial reserving assumptions.

In the workers' compensation insurance class, the majority of which was written in California, the Company has experienced adverse development primarily for accident year 2002 due to higher than expected claim frequency and severity. As a result of significant growth in this book of business in a challenging business environment, the Company's writings in this class were subject to more relative variability than in some of its established and/or stable lines of business. Although cumulative results through 2012 continue to be profitable for this book of business, there was some deterioration in claim frequency and severity related to accident year 2002.

The adverse development on the 2008 outstanding reserves was primarily attributable to foreign exchange rate movements resulting in an increase in the U.S. dollar reserves. In addition, the Company experienced adverse development on liability exposures for sub-prime for accident years 2006-2008 and contractors' liability exposures for accident years 2002-2005. The contractor liability exposures are currently in run-off. The Company also experienced adverse development on property lines but was offset by favorable development on other casualty lines.

The Company's loss and LAE reserves represent management's best estimate of the ultimate liability. While there can be no assurance that these reserves will not need to be increased in the future, management believes that the Company's existing reserves and reserving methodologies reduce the likelihood that any such increases would have a material adverse effect on the Company's financial condition, results of operations or cash flows. These statements regarding the Company's loss reserves are forward looking statements within the meaning of the U.S. federal securities laws and are intended to be covered by the safe harbor provisions contained therein. See ITEM 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations – Safe Harbor Disclosure".

The following table is derived from the Ten Year GAAP Loss Development Table above and summarizes the effect of reserve re-estimates, net of reinsurance, on calendar year operations by accident year for the same ten year period ended December 31, 2012. Each column represents the amount of net reserve re-estimates made in the indicated calendar year and shows the accident years to which the re-estimates are applicable. The amounts in the total accident year column on the far right represent the cumulative reserve re-estimates for the indicated accident years.

Since the Company has operations in many countries, part of the Company's loss and LAE reserves are in foreign currencies and translated to U.S. dollars for each reporting period. Fluctuations in the exchange rates for the currencies, period over period, affect the U.S. dollar amount of outstanding reserves. The translation adjustment line at the bottom of the table eliminates the impact of the exchange fluctuations from the reserve re-estimates.

Effects on Pre-tax Income Resulting from Reserves Re-estimates

(Dollars in millions)											Cumulative
	2003	2004	2005	2006	2007	2008	2009	2010	2011	2012	Re-estimates for Each Accident Year

<sup>(1)</sup> This adjustment converts Canadian dollars to U.S. dollars.

(Some amounts may not reconcile due to rounding.)

The reserve development by accident year reflected in the above table was generally the result of the same factors described above that caused the deficiencies shown in the Ten Year GAAP Loss Development Table. The unfavorable development experienced in the 2002 and prior accident years relate principally to the previously discussed asbestos development. Other business areas contributing to adverse development were casualty reinsurance, including professional liability classes, and workers' compensation insurance, where, in retrospect, the Company's initial estimates of losses were underestimated principally as the result of unanticipated variability in the underlying exposures. The favorable development for accident years 2003 through 2004 relates primarily to favorable experience with respect to property reinsurance business. In addition, casualty reinsurance has reflected favorable development for accident years 2003 to 2006.

The Company's loss reserving methodologies continuously monitor the emergence of loss and loss development trends, seeking, on a timely basis, to both adjust reserves for the impact of trend shifts and to factor the impact of such shifts into the Company's underwriting and pricing on a prospective basis.

The following table presents a reconciliation of beginning and ending reserve balances for the periods indicated on a GAAP basis:

(Dollars in millions)	Years Ended December 31,		
	2012	2011	2010
Gross reserves at beginning of period	\$ 10,123.2	\$ 9,340.2	\$ 8,937.9
Incurred related to:			
Current year	2,748.9	3,722.5	2,976.6
Prior years	(3.7)	3.7	(30.9)
Total incurred losses	2,745.3	3,726.2	2,945.7
Paid related to:			
Current year	633.9	810.5	568.3
Prior years	2,220.2	2,008.3	1,988.7
Total paid losses	2,854.1	2,818.8	2,557.1
Foreign exchange/translation adjustment	32.9	(15.9)	(34.5)
Change in reinsurance receivables on unpaid losses and LAE	21.8	(108.4)	48.2
Gross reserves at end of period	\$ 10,069.1	\$ 10,123.2	\$ 9,340.2

(Some amounts may not reconcile due to rounding.)

Incurred prior years' reserves decreased by \$3.7 million, increased by \$3.7 million and decreased by \$30.9 million for the years ended December 31, 2012, 2011 and 2010, respectively. The decrease for 2012 was attributable to a \$57.2 million decrease in reinsurance business, primarily related to favorable development on treaty casualty reserves, partially offset by a \$53.5 million increase in insurance business primarily related to development on contractors' liability and workers compensation reserves.

The increase for 2011 was attributable to a \$113.8 million increase in the insurance and US reinsurance business primarily related to development on contractors' liability, excess casualty and California workers compensation reserves, partially offset by a \$110.1 million decrease in non-US reinsurance business, primarily related to favorable development on non-catastrophe property reserves.

The decrease for 2010 was attributable to a \$140.8 million decrease in non-US reinsurance business (Bermuda and International), partially offset by the \$109.9 million increase in the insurance and US reinsurance business. The decrease in the non-US reinsurance business was due to reserve studies that indicated net favorable reserve development, as well as reductions in loss estimates for prior year catastrophes. The increase in the US reinsurance business is primarily due to reserve strengthening in casualty lines for construction liability claims and the increase in the insurance business is due to reserve strengthening on several terminated programs.

#### **Reserves for Asbestos and Environmental Losses and LAE.**

At December 31, 2012, the Company's gross reserves for A&E claims represented 4.4% of its total reserves. The Company's A&E liabilities stem from Mt. McKinley's direct insurance business and Everest Re's assumed reinsurance business. There are significant uncertainties in estimating the amount of the Company's potential losses from A&E claims and ultimate values cannot be estimated using traditional reserving techniques. See ITEM 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations - Asbestos and Environmental Exposures" and Item 8, "Financial Statements and Supplementary Data" - Note 3 of Notes to Consolidated Financial Statements.

Mt. McKinley's book of direct A&E exposed insurance policies is relatively small and homogenous. It arises from a limited period, from 1975 to 1984. The book was principally excess liability, thereby limiting exposure analysis to a limited number of policies and forms. As a result of this focused structure, the Company believes that it is able to comprehensively analyze its exposures, allowing it to identify, analyze and actively monitor those claims which have unusual exposure, including policies on which it may be exposed to pay expenses in addition to policy limits or on which non-products coverage may be contended.

The Company endeavors to actively engage with every insured account posing significant potential asbestos exposure to Mt. McKinley. Such engagement can take the form of pursuing a final settlement, negotiation, litigation, or the monitoring of claim activity under Settlement in Place (“SIP”) agreements. SIP agreements generally condition an insurer’s payment upon the actual claim experience of the insured and may have annual payment caps or other measures to control the insurer’s payments. The Company’s Mt. McKinley operation is currently managing four SIP agreements, one of which was executed prior to the acquisition of Mt. McKinley in 2000. The Company’s preference with respect to coverage settlements is to execute settlements that call for a fixed schedule of payments, because such settlements eliminate future uncertainty.

The Company has significantly enhanced its classification of insureds by exposure characteristics over time, as well as its analysis by insured for those it considers to be more exposed or active. Those insureds identified as relatively less exposed or active are subject to less rigorous, but still active management, with an emphasis on monitoring those characteristics, which may indicate an increasing exposure or levels of activity. The Company continually focuses on further enhancement of the detailed estimation processes used to evaluate potential exposure of policyholders.

Everest Re’s book of assumed A&E reinsurance is relatively concentrated within a limited number of contracts and for a limited period, from 1974 to 1984. Because the book of business is relatively concentrated and the Company has been managing the A&E exposures for many years, its claim staff is familiar with the ceding companies that have generated most of these liabilities in the past and which are therefore most likely to generate future liabilities. The Company’s claim staff has developed familiarity both with the nature of the business written by its ceding companies and the claims handling and reserving practices of those companies. This level of familiarity enhances the quality of the Company’s analysis of its exposure through those companies. As a result, the Company believes that it can identify those claims on which it has unusual exposure, such as non-products asbestos claims, for concentrated attention. However, in setting reserves for its reinsurance liabilities, the Company relies on claims data supplied, both formally and informally by its ceding companies and brokers. This furnished information is not always timely or accurate and can impact the accuracy and timeliness of the Company’s ultimate loss projections.

The following table summarizes the composition of the Company’s total reserves for A&E losses, gross and net of reinsurance, for the periods indicated:

	Years Ended December 31,		
	2012	2011	2010
(Dollars in millions)			
Case reserves reported by ceding companies	\$ 138.4	\$ 145.6	\$ 135.4
Additional case reserves established by the Company (assumed reinsurance) <sup>(1)</sup>	90.6	102.9	116.1
Case reserves established by the Company (direct insurance)	36.7	40.6	38.9
Incurred but not reported reserves	177.1	210.9	264.4
Gross reserves	442.8	499.9	554.8
Reinsurance receivable	(17.1)	(19.8)	(21.9)
Net reserves	\$ 425.7	\$ 480.2	\$ 532.9

(1) Additional reserves are case specific reserves established by the Company in excess of those reported by the ceding company, based on the Company’s assessment of the covered loss.

(Some amounts may not reconcile due to rounding.)

Additional losses, including those relating to latent injuries and other exposures, which are as yet unrecognized, the type or magnitude of which cannot be foreseen by either the Company or the industry, may emerge in the future. Such future emergence could have material adverse effects on the Company’s future financial condition, results of operations and cash flows.

### Future Policy Benefit Reserves.

The Company wrote a limited amount of life and annuity reinsurance in its Bermuda segment. Future policy benefit liabilities for annuities are reported at the accumulated fund balance of these contracts. Reserves for those liabilities include mortality provisions with respect to life and annuity claims, both reported and unreported. Actual experience in a particular period may be worse than assumed experience and, consequently, may adversely affect the Company's operating results for that period. See ITEM 8, "Financial Statements and Supplementary Data" - Note 1F of Notes to Consolidated Financial Statements.

Activity in the reserve for future policy benefits is summarized for the periods indicated:

(Dollars in millions)	At December 31,		
	2012	2011	2010
Balance at beginning of year	\$ 67.2	\$ 63.0	\$ 64.5
Liabilities assumed	0.1	0.2	0.2
Adjustments to reserves	2.4	8.4	2.9
Benefits paid in the current year	(3.6)	(4.4)	(4.7)
Balance at end of year	\$ 66.1	\$ 67.2	\$ 63.0

(Some amounts may not reconcile due to rounding.)

### Investments.

The board of directors of each of the Company's operating subsidiaries is responsible for establishing investment policy and guidelines and, together with senior management, for overseeing their execution.

The Company's principal investment objectives are to ensure funds are available to meet its insurance and reinsurance obligations and to maximize after-tax investment income while maintaining a high quality diversified investment portfolio. Considering these objectives, the Company views its investment portfolio as having two components: 1) the investments needed to satisfy outstanding liabilities (its core fixed maturities portfolio) and 2) investments funded by the Company's shareholders' equity.

For the portion needed to satisfy global outstanding liabilities, the Company generally invests in taxable and tax-preferenced fixed income securities with an average credit quality of Aa3. For the U.S. portion of this portfolio, our mix of taxable and tax-preferenced investments is adjusted periodically, consistent with the Company's current and projected U.S. operating results, market conditions and our tax position. This global fixed maturity securities portfolio is externally managed by an independent, professional investment manager using portfolio guidelines approved by the Company.

Over the past several years, the Company has expanded the allocation of its investments funded by shareholders' equity to include: 1) a greater percentage of publicly traded equity securities, 2) emerging market fixed maturities through mutual fund structures, as well as individual holdings, 3) high yield fixed maturities, 4) bank loan securities and 5) private equity limited partnership investments. The objective of this portfolio diversification is to enhance the risk-adjusted total return of the investment portfolio by allocating a prudent portion of the portfolio to higher return asset classes, which are also less subject to changes in value with movements in interest rates. The Company limits its allocation to these asset classes because of 1) the potential for volatility in their values and 2) the impact of these investments on regulatory and rating agency capital adequacy models. The Company uses investment managers experienced in these markets and adjusts its allocation to these investments based upon market conditions. At December 31, 2012, the market value of investments in these investment market sectors, carried at both market and fair value, approximated 63% of shareholders' equity.

The duration of an investment is based on the maturity of the security but also reflects the payment of interest and the possibility of early prepayments. The Company's fixed income investment guidelines include a general duration guideline. This investment duration guideline is established and periodically revised by management, which considers economic and business factors, as well as the Company's average duration of potential liabilities, which, at December 31, 2012, is estimated at approximately 3.5 years, based on the estimated payouts of underwriting liabilities using standard duration calculations.

The duration of the fixed income portfolio at December 31, 2012 and 2011 was 3.0 years. The Company has shortened the duration of its portfolio in recent years in response to very low available yields, particularly on securities with longer maturities. As a result, the Company has focused on purchasing high quality, shorter duration investments and investments with floating rate yields. These investments will be less subject to decline in market value if interest rates rise in the future, as forecasted by most investment analysts.

For each currency in which the Company has established substantial loss and LAE reserves, the Company seeks to maintain invested assets denominated in such currency in an amount approximately equal to the estimated liabilities. Approximately 31% of the Company's consolidated reserves for losses and LAE and unearned premiums represent amounts payable in foreign currencies.

The Company's net investment income was \$600.2 million, \$620.0 million and \$653.5 million for the years ended December 31, 2012, 2011 and 2010, respectively. The decrease from 2011 to 2012 was primarily due to the decline in reported income from fixed maturity securities, primarily due to the effects of lower reinvestment rates over the past several years, partially offset by an increase in income from limited partnership investments.

The Company had net realized capital gains for 2012 of \$164.4 million. In 2012, the Company recorded \$118.1 million of gains due to fair value re-measurements on fixed maturity and equity securities and \$56.3 million of net realized capital gains from sales of fixed maturity and equity securities, partially offset by \$10.0 million of other-than-temporary impairments on fixed maturity securities. In 2011 net realized capital gains were \$6.9 million due to \$27.5 million of net realized capital gains from sales of fixed maturity and equity securities, partially offset by \$16.2 million of other-than-temporary impairments on fixed maturity securities and \$4.4 million of losses due to fair value re-measurements on fixed maturity and equity securities. The gains on the sales of fixed maturity securities in 2011 were primarily the result of selling securities in foreign currencies, which reduced exposure to future currency fluctuations. In 2010, net realized capital gains were \$101.9 million, due to \$70.4 million of gains due to fair value re-measurements on fixed maturity and equity securities and \$34.5 million of net realized capital gains from sales of fixed maturity and equity securities, partially offset by \$3.0 million of other-than-temporary impairments on fixed maturity securities. The gains on the sales of fixed maturity securities were primarily the result of selling securities in foreign currencies, which reduced exposure to future currency fluctuations.

The Company's cash and invested assets totaled \$16.6 billion at December 31, 2012, which consisted of 88.0% fixed maturities and cash, of which 90.1% were investment grade; 8.4% equity securities and 3.6% other invested assets. The average maturity of fixed maturity securities was 4.7 years at December 31, 2012, and their overall duration was 3.0 years.

As of December 31, 2012, the Company did not have any direct investments in commercial real estate or direct commercial mortgages or any material holdings of derivative investments (other than equity index put option contracts as discussed in ITEM 8, "Financial Statements and Supplementary Data" - Note 4 of Notes to Consolidated Financial Statements) or securities of issuers that are experiencing cash flow difficulty to an extent that the Company's management believes could threaten the issuer's ability to meet debt service payments, except where other-than-temporary impairments have been recognized.

The Company's investment portfolio includes structured commercial mortgage-backed securities ("CMBS") with a book value of \$294.6 million and a market value of \$320.1 million. CMBS securities comprising more than 59% of the December 31, 2012 market value are rated AAA by Standard & Poor's Financial Services LLC ("Standard & Poor's"). Furthermore, securities comprising more than 91% of the market value are rated investment grade by Standard & Poor's.

At December 31, 2012, the Company's fixed maturity portfolio included \$1.6 million in book value of asset-backed securities with sub-prime mortgage loan exposure and the market value of these investments was \$2.0 million. Sub-prime mortgage loans generally represent loans made to borrowers with limited or blemished credit records.

The following table reflects investment results for the Company for the periods indicated:

(Dollars in millions)	December 31,				
	Average Investments <sup>(1)</sup>	Pre-tax Investment Income <sup>(2)</sup>	Pre-tax Effective Yield	Pre-tax Realized Net Capital (Losses) Gains <sup>(3)</sup>	Pre-tax Unrealized Net Capital Gains (Losses)
2012	\$ 16,220.9	\$ 600.2	3.70%	\$ 164.4	\$ 161.0
2011	15,680.9	620.0	3.95%	6.9	106.6
2010	15,297.4	653.5	4.27%	101.9	48.4
2009	14,472.8	547.8	3.79%	(2.3)	636.7
2008	14,411.8	565.9	3.93%	(695.8)	(310.4)

(1) Average of the beginning and ending carrying values of investments and cash, less net funds held, future policy benefit reserve, and non-interest bearing cash. Bonds, common stock and redeemable and non-redeemable preferred stocks are carried at market value. Common stock which are actively managed are carried at fair value.

(2) After investment expenses, excluding realized net capital gains (losses).

(3) Included in 2012, 2011, 2010, 2009 and 2008, are fair value re-measurements of \$118.1 million, (\$4.4) million, \$70.4 million, \$40.2 million and (\$276.0) million, respectively. (Some amounts may not reconcile due to rounding.)

The amortized cost, market value and gross unrealized appreciation and depreciation of available for sale, fixed maturity and equity security investments, carried at market value, are as follows for the periods indicated:

(Some amounts may not reconcile due to rounding.)

### Financial Strength Ratings.

The following table shows the current financial strength ratings of the Company's operating subsidiaries as reported by A.M. Best, Standard & Poor's and Moody's. These ratings are based upon factors of concern to policyholders and should not be considered an indication of the degree or lack of risk involved in a direct or indirect equity investment in an insurance or reinsurance company.

All of the below-mentioned ratings are continually monitored and revised, if necessary, by each of the rating agencies. The ratings presented in the following table were in effect as of February 28, 2013.

The Company believes that its ratings, in general, are important to its operations because they provide the Company's customers and investors with an independent assessment of the Company's underlying financial strength using a scale that provides for relative comparisons. Strong financial ratings are particularly important for reinsurance companies. Ceding companies must rely on their reinsurers to pay covered losses well into the future. As a result, a highly rated reinsurer is generally preferred.

<u>Operating Subsidiary:</u>	<u>A.M. Best</u>	<u>Standard &amp; Poor's</u>	<u>Moody's</u>
Everest Re	A+ (Superior)	A+ (Strong)	Aa3 (Excellent)
Bermuda Re	A+ (Superior)	A+ (Strong)	Aa3 (Excellent)
Ireland Re	A+ (Superior)	A+ (Strong)	Not Rated
Everest International	A+ (Superior)	Not Rated	Not Rated
Everest National	A+ (Superior)	A+ (Strong)	Not Rated
Everest Indemnity	A+ (Superior)	Not Rated	Not Rated
Everest Security	A+ (Superior)	Not Rated	Not Rated
Everest Canada	A+ (Superior)	Not Rated	Not Rated
Mt. McKinley	Not Rated	Not Rated	Not Rated

A.M. Best states that the "A+" ("Superior") rating is assigned to those companies which, in its opinion, have a superior ability to meet their ongoing insurance policy and contract obligations based on A.M. Best's comprehensive quantitative and qualitative evaluation of a company's balance sheet strength, operating performance and business profile. Standard & Poor's states that the "A+" rating is assigned to those insurance companies which, in its opinion, have strong financial security characteristics with respect to their ability to pay under its insurance policies and contracts in accordance with their terms. Moody's states that insurance companies rated "Aa" offer excellent financial security. Together with the "Aaa" rated companies, "Aa" rated companies constitute what are generally known as high-grade companies, with "Aa" rated companies generally having somewhat larger long-term risks. On January 24, 2012, Moody's affirmed the ratings of the Company's operating subsidiaries but changed the outlook on the ratings from stable to negative reflecting their opinion of the potential direction of the ratings over the medium term (12 to 18 months). The Company will continue to work with Moody's over this time to address their concerns but it is not possible to predict the potential outcome. The Company does not believe that a one notch downgrade would have a material adverse affect on the Company's business.

Subsidiaries other than Everest Re and Bermuda Re may not be rated by some or any rating agencies because such ratings are not considered essential by the individual subsidiary's customers or because of the limited nature of the subsidiary's operations. In particular, Mt. McKinley is not rated because it is in run-off status.

### Debt Ratings.

The following table shows the debt ratings by A.M. Best, Standard & Poor's and Moody's of the Holdings' senior notes due October 15, 2014, long term notes due May 1, 2067 and Everest Re Capital Trust II's ("Capital Trust II") trust preferred securities due March 29, 2034, all of which are considered investment grade. Debt ratings are the rating agencies' current assessment of the credit worthiness of an obligor with respect to a specific obligation.

	A.M. Best	Standard & Poor's	Moody's
Senior Notes	a- (Strong)	A- (Strong)	A3 (Good)
Trust Preferred Securities	bbb+ (Adequate)	BBB (Adequate)	Baa1 (Adequate)
Long Term Notes	bbb (Adequate)	BBB (Adequate)	Baa1 (Adequate)

A debt rating of "a-" is assigned by A.M. Best where the issuer, in A.M. Best's opinion, has a strong ability to meet the terms of the obligation. A.M. Best assigns a debt rating in the "bbb" range where the issuer, in A.M. Best's opinion, has adequate ability to meet the terms of the obligation. Standard & Poor's assigns a debt rating in the "A" range to issuers that exhibit strong capacity and willingness to meet its financial commitments on obligations as they come due. A debt rating in the "BBB" range is assigned by Standard & Poor's where the issuers exhibit adequate protection parameters although adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitment on the obligation. According to Moody's, a debt rating of "A3" is assigned to issues that are considered upper-medium-grade obligations and subject to low credit risk. Obligations rated "Baa1" are subject to moderate credit risk and are considered medium-grade and as such may possess certain speculative characteristics. On January 24, 2012, Moody's affirmed the ratings of the Company's operating subsidiaries but changed the outlook on the ratings from stable to negative reflecting their opinion of the potential direction of the ratings over the medium term (12 to 18 months). The Company will continue to work with Moody's over this time to address their concerns but it is not possible to predict the potential outcome. The Company does not believe that a one notch downgrade would have a material adverse affect on the Company's business.

### Competition.

The worldwide reinsurance and insurance businesses are highly competitive, as well as cyclical by product and market. As such, financial results tend to fluctuate with periods of constrained availability, high rates and strong profits followed by periods of abundant capacity, low rates and constrained profitability. Competition in the types of reinsurance and insurance business that the Company underwrites is based on many factors, including the perceived overall financial strength of the reinsurer or insurer, ratings of the reinsurer or insurer by A.M. Best and/or Standard & Poor's, underwriting expertise, the jurisdictions where the reinsurer or insurer is licensed or otherwise authorized, capacity and coverages offered, premiums charged, other terms and conditions of the reinsurance and insurance business offered, services offered, speed of claims payment and reputation and experience in lines written. Furthermore, the market impact from these competitive factors related to reinsurance and insurance is generally not consistent across lines of business, domestic and international geographical areas and distribution channels.

The Company competes in the U.S., Bermuda and international reinsurance and insurance markets with numerous global competitors. The Company's competitors include independent reinsurance and insurance companies, subsidiaries or affiliates of established worldwide insurance companies, reinsurance departments of certain insurance companies and domestic and international underwriting operations, including underwriting syndicates at Lloyd's. Some of these competitors have greater financial resources than the Company and have established long term and continuing business relationships, which can be a significant competitive advantage. In addition, the lack of strong barriers to entry into the reinsurance business and the potential for securitization of reinsurance and insurance risks through capital markets provide additional sources of potential reinsurance and insurance capacity and competition.

Worldwide insurance and reinsurance market conditions continued to be very competitive, particularly in the casualty lines of business. Generally, there was ample insurance and reinsurance capacity relative to demand. Competition and its effect on rates, terms and conditions vary widely by market and coverage yet continued to be most prevalent in the U.S. casualty insurance and reinsurance markets.

However, during the fourth quarter of 2012, the industry sustained significant losses from Superstorm Sandy and also sustained significant losses during 2011 from Australian floods, the New Zealand earthquake, the earthquake and tsunami in Japan, storms in the U.S., and the Thailand floods. It is too early to determine the longer term impact on market conditions as a result of these events. While the 2011 events have resulted in meaningful rate increases for catastrophe coverages in some global catastrophe prone regions, particularly areas impacted by these losses, whether the magnitude of these 2012 and 2011 losses is sufficient to increase rates and improve market conditions for other lines of business remains to be seen.

Overall, the Company believes that current marketplace conditions, particularly for catastrophe coverages, provide profit opportunities for it given its strong ratings, distribution system, reputation and expertise. The Company continues to employ its strategy of targeting business that offers the greatest profit potential, while maintaining balance and diversification in its overall portfolio.

#### **Employees.**

As of February 1, 2013, the Company employed 1,039 persons. Management believes that employee relations are good. None of the Company's employees are subject to collective bargaining agreements, and the Company is not aware of any current efforts to implement such agreements.

#### **Regulatory Matters.**

The Company and its insurance subsidiaries are subject to regulation under the insurance statutes of the various jurisdictions in which they conduct business, including essentially all states of the U.S., Canada, Singapore, Brazil, the United Kingdom, Ireland and Bermuda. These regulations vary from jurisdiction to jurisdiction and are generally designed to protect ceding insurance companies and policyholders by regulating the Company's conduct of business, financial integrity and ability to meet its obligations. Many of these regulations require reporting of information designed to allow insurance regulators to closely monitor the Company's performance.

Insurance Holding Company Regulation. Under applicable U.S. laws and regulations, no person, corporation or other entity may acquire a controlling interest in the Company, unless such person, corporation or entity has obtained the prior approval for such acquisition from the insurance commissioners of Delaware and the other states in which the Company's insurance subsidiaries are domiciled or deemed domiciled, currently California and Georgia. Under these laws, "control" is presumed when any person acquires, directly or indirectly, 10% or more of the voting securities of an insurance company. To obtain the approval of any change in control, the proposed acquirer must file an application with the relevant insurance commissioner disclosing, among other things, the background of the acquirer and that of its directors and officers, the acquirer's financial condition and its proposed changes in the management and operations of the insurance company. U.S. state regulators also require prior notice or regulatory approval of material inter-affiliate transactions within the holding company structure.

The Insurance Companies Act of Canada requires prior approval by the Minister of Finance of anyone acquiring a significant interest in an insurance company authorized to do business in Canada. In addition, the Company is subject to regulation by the insurance regulators of other states and foreign jurisdictions in which it is authorized to do business. Certain of these states and foreign jurisdictions impose regulations regulating the ability of any person to acquire control of an insurance company authorized to do business in that jurisdiction without appropriate regulatory approval similar to those described above.

Dividends. Under Bermuda law, Group is prohibited from declaring or paying a dividend if such payment would reduce the realizable value of its assets to an amount less than the aggregate value of its liabilities and its issued share capital and share premium (additional paid-in capital) accounts. Group's ability to pay dividends and its operating expenses is partially dependent upon dividends from its subsidiaries. The payment of dividends by insurance subsidiaries is limited under Bermuda law as well as the laws of the various U.S. states in which Group's insurance and reinsurance subsidiaries are domiciled or deemed domiciled. The limitations are generally based upon net income (loss) and compliance with applicable policyholders' surplus or minimum solvency and liquidity requirements as determined in accordance with the relevant statutory accounting practices. Under Irish corporate and regulatory law, Holdings Ireland and its subsidiaries are limited as to the dividends they can pay based on retained earnings and net income (loss) and/or capital and minimum solvency requirements. As Holdings has outstanding debt obligations, it is

dependent upon dividends and other permissible payments from its operating subsidiaries to enable it to meet its debt and operating expense obligations and to pay dividends.

Under Bermuda law, Bermuda Re and Everest International are unable to declare or make payment of a dividend if they fail to meet their minimum solvency margin or minimum liquidity ratio. As a long term insurer, Bermuda Re is also unable to declare or pay a dividend to anyone who is not a policyholder unless, after payment of the dividend, the value of the assets in their long term business fund, as certified by their approved actuary, exceeds their liabilities for long term business by at least the \$250,000 minimum solvency margin. Prior approval of the Bermuda Monetary Authority is required if Bermuda Re's or Everest International's dividend payments would exceed 25% of their prior year end statutory capital and surplus. At December 31, 2012, Bermuda Re and Everest International exceeded their solvency and liquidity requirements by a significant margin.

The payment of dividends to Holdings by Everest Re is subject to limitations imposed by Delaware law. Generally, Everest Re may only pay dividends out of its statutory earned surplus, which was \$2,613.0 million at December 31, 2012, and only after it has given 10 days prior notice to the Delaware Insurance Commissioner. During this 10-day period, the Commissioner may, by order, limit or disallow the payment of ordinary dividends if the Commissioner finds the insurer to be presently or potentially in financial distress. Further, the maximum amount of dividends that may be paid without the prior approval of the Delaware Insurance Commissioner in any twelve month period is the greater of (1) 10% of the insurer's statutory surplus as of the end of the prior calendar year or (2) the insurer's statutory net income (loss), not including realized capital gains (losses), for the prior calendar year. Accordingly, the maximum amount that will be available for the payment of dividends by Everest Re in 2013 without triggering the requirement for prior approval of regulatory authorities in connection with a dividend is \$359.0 million.

Insurance Regulation. Neither Bermuda Re nor Everest International is admitted to do business in any jurisdiction in the U.S. Both conduct their insurance business from their offices in Bermuda, and in the case of Bermuda Re, its branch in the UK. In Bermuda, Bermuda Re and Everest International are regulated by the Insurance Act 1978 (as amended) and related regulations (the "Act"). The Act establishes solvency and liquidity standards and auditing and reporting requirements and subjects Bermuda Re and Everest International to the supervision, investigation and intervention powers of the Bermuda Monetary Authority. Under the Act, Bermuda Re and Everest International, as Class 4 insurers, are each required to maintain a principal office in Bermuda, to maintain a minimum of \$100 million in statutory capital and surplus, to have an independent auditor approved by the Bermuda Monetary Authority conduct an annual audit and report on their respective statutory and U.S. GAAP financial statements and filings and to have an appointed loss reserve specialist (also approved by the Bermuda Monetary Authority) review and report on their respective loss reserves annually.

Bermuda Re is also registered under the Act as long term insurer and is thereby authorized to write life and annuity business. As a long term insurer, Bermuda Re is required to maintain \$250,000 in statutory capital separate from their Class 4 minimum statutory capital and surplus, to maintain long term business funds, to separately account for this business and to have an approved actuary prepare a certificate concerning their long term business assets and liabilities to be filed annually. Bermuda Re's operations in the United Kingdom and worldwide are subject to regulation by the Financial Services Authority (the "FSA"). The FSA imposes solvency, capital adequacy, audit, financial reporting and other regulatory requirements on insurers transacting business in the United Kingdom. Bermuda Re presently meets or exceeds all of the FSA's solvency and capital requirements.

U.S. domestic property and casualty insurers, including reinsurers, are subject to regulation by their state of domicile and by those states in which they are licensed. The regulation of reinsurers is typically focused on financial condition, investments, management and operation. The rates and policy terms of reinsurance agreements are generally not subject to direct regulation by any governmental authority.

The operations of Everest Re's foreign branch offices in Canada and Singapore are subject to regulation by the insurance regulatory officials of those jurisdictions. Management believes that the Company is in compliance with applicable laws and regulations pertaining to its business and operations.

Everest Indemnity, Everest National, Everest Security and Mt. McKinley are subject to regulations similar to the U.S. regulations applicable to Everest Re. In addition, Everest National and Everest Security must comply with substantial regulatory requirements in each state where they conduct business. These additional requirements include, but are not limited to, rate and policy form requirements, requirements with regard to licensing, agent appointments, participation in residual markets and claim handling procedures. These regulations are primarily designed for the protection of policyholders.

Licenses. Everest Re is a licensed property and casualty insurer and/or reinsurer in all states, the District of Columbia and Puerto Rico. In New Hampshire and Puerto Rico, Everest Re is licensed for reinsurance only. Such licensing enables U.S. domestic ceding company clients to take credit for uncollateralized reinsurance receivables from Everest Re in their statutory financial statements.

Everest Re is licensed as a property and casualty reinsurer in Canada. It is also authorized to conduct reinsurance business in Singapore and Brazil. Everest Re can also write reinsurance in other foreign countries. Because some jurisdictions require a reinsurer to register in order to be an acceptable market for local insurers, Everest Re is registered as a foreign insurer and/or reinsurer in the following countries: Argentina, Bolivia, Chile, Colombia, Ecuador, El Salvador, Guatemala, Honduras, Mexico, Peru, Venezuela and the Philippines. Everest National is licensed in 50 states and the District of Columbia. Everest Indemnity is licensed in Delaware and is eligible to write insurance on a surplus lines basis in 49 states, the District of Columbia and Puerto Rico. Everest Security is licensed in Georgia and Alabama. Mt. McKinley is licensed in Delaware and California. Bermuda Re and Everest International are registered as Class 4 insurers in Bermuda, and Bermuda Re is also registered as a long term insurer in Bermuda. Bermuda Re is also an authorized reinsurer in the U.K. Ireland Re is licensed to write non-life reinsurance for the London and European markets. Everest Canada is licensed to write property and casualty insurance in Canada.

Periodic Examinations. Everest Re, Everest National, Everest Indemnity, Everest Security and Mt. McKinley are subject to periodic financial examination (usually every three years) of their affairs by the insurance departments of the states in which they are licensed, authorized or accredited. Everest Re's, Everest National's, Everest Security's, Everest Indemnity's and Mt. McKinley's last examination reports were as of December 31, 2010. None of these reports contained any material findings or recommendations. In addition, U.S. insurance companies are subject to examinations by the various state insurance departments where they are licensed concerning compliance with applicable conduct of business regulations.

NAIC Risk-Based Capital Requirements. The U.S. National Association of Insurance Commissioners ("NAIC") has developed a formula to measure the amount of capital appropriate for a property and casualty insurance company to support its overall business operations in light of its size and risk profile. The major categories of a company's risk profile are its asset risk, credit risk, and underwriting risk. The standards are an effort by the NAIC to prevent insolvencies, to ward off other financial difficulties of insurance companies and to establish uniform regulatory standards among state insurance departments.

Under the approved formula, a company's statutory surplus is compared to its risk based capital ("RBC"). If this ratio is above a minimum threshold, no action is necessary. Below this threshold are four distinct action levels at which an insurer's domiciliary state regulator can intervene with increasing degrees of authority over an insurer as the ratio of surplus to RBC decreases. The mildest intervention requires an insurer to submit a plan of appropriate corrective actions. The most severe action requires an insurer to be rehabilitated or liquidated.

Based on their financial positions at December 31, 2012, Everest Re, Everest National, Everest Indemnity and Everest Security significantly exceed the minimum thresholds. Since Mt. McKinley ceased writing new and renewal insurance in 1985, its domiciliary regulator, the Delaware Insurance Commissioner, has exempted Mt. McKinley from complying with RBC requirements.

Various proposals to change the RBC formula arise from time to time. The Company is unable to predict whether any such proposal will be adopted, the form in which any such proposals would be adopted or the effect, if any, the adoption of any such proposal or change in the RBC calculations would have on the Company.

**Tax Matters.**

The following summary of the taxation of the Company is based on current law. There can be no assurance that legislative, judicial, or administrative changes will not be enacted that materially affect this summary.

Bermuda. Under Bermuda law, no income, withholding or capital gains taxes are imposed upon Group and its Bermuda subsidiaries. Group and its Bermuda subsidiaries have received an undertaking from the Minister of Finance in Bermuda that, in the event of any taxes being imposed, Group and its Bermuda subsidiaries will be exempt from taxation in Bermuda until March 2035. Non-Bermuda branches of Bermuda subsidiaries are subject to local taxes in the jurisdictions in which they operate.

United States. Group's U.S. subsidiaries conduct business in and are subject to taxation in the U.S. Non-U.S. branches of U.S. subsidiaries are subject to local taxation in the jurisdictions in which they operate. Should the U.S. subsidiaries distribute current or accumulated earnings and profits in the form of dividends or otherwise, the Company would be subject to withholding taxes. Group and its Bermuda subsidiaries believe that they have operated and will continue to operate their businesses in a manner that will not cause them to generate income treated as effectively connected with the conduct of a trade or business within the U.S. On this basis, Group does not expect that it and its Bermuda subsidiaries will be required to pay U.S. corporate income taxes other than withholding taxes on certain investment income and premium excise taxes. If Group or its Bermuda subsidiaries were to become subject to U.S. income tax, there could be a material adverse effect on the Company's financial condition, results of operations and cash flows.

United Kingdom. Bermuda Re's UK branch conducts business in the UK and is subject to taxation in the UK. Bermuda Re believes that it has operated and will continue to operate its Bermuda operation in a manner which will not cause them to be subject to UK taxation. If Bermuda Re's Bermuda operations were to become subject to UK income tax, there could be a material adverse impact on the Company's financial condition, results of operations and cash flow.

Ireland. Holdings Ireland and Ireland Re conduct business in Ireland and are subject to taxation in Ireland.

**Available Information.**

The Company's Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K, proxy statements and amendments to those reports are available free of charge through the Company's internet website at <http://www.everestgroup.com> as soon as reasonably practicable after such reports are electronically filed with the Securities and Exchange Commission (the "SEC").

**ITEM 1A. RISK FACTORS**

In addition to the other information provided in this report, the following risk factors should be considered when evaluating an investment in our securities. If the circumstances contemplated by the individual risk factors materialize, our business, financial condition and results of operations could be materially and adversely affected and the trading price of our common shares could decline significantly.

**RISKS RELATING TO OUR BUSINESS**

*Fluctuations in the financial markets could result in investment losses.*

Prolonged and severe disruptions in the public debt and equity markets, such as occurred during 2008, could result in significant realized and unrealized losses in our investment portfolio. For the year ended December 31, 2008, we incurred \$695.8 million of realized investment losses and \$310.4 million of unrealized investment losses. Although financial markets have significantly improved since 2008, they could deteriorate in the future. Such declines in the financial markets could result in significant realized and unrealized losses on investments and could have a material adverse impact on our results of operations, equity, business and insurer financial strength and debt ratings.

*Our results could be adversely affected by catastrophic events.*

We are exposed to unpredictable catastrophic events, including weather-related and other natural catastrophes, as well as acts of terrorism. Any material reduction in our operating results caused by the occurrence of one or more catastrophes could inhibit our ability to pay dividends or to meet our interest and principal payment obligations. Subsequent to April 1, 2010, we define a catastrophe as an event that causes a loss on property exposures before reinsurance of at least \$10.0 million, before corporate level reinsurance and taxes. Prior to April 1, 2010, we used a threshold of \$5.0 million. By way of illustration, during the past five calendar years, pre-tax catastrophe losses, net of contract specific reinsurance but before cessions under corporate reinsurance programs, were as follows:

Calendar year:	Pre-tax catastrophe losses
(Dollars in millions)	
2012	\$ 410.0
2011	1,300.4
2010	571.1
2009	67.4
2008	364.3

*Our losses from future catastrophic events could exceed our projections.*

We use projections of possible losses from future catastrophic events of varying types and magnitudes as a strategic underwriting tool. We use these loss projections to estimate our potential catastrophe losses in certain geographic areas and decide on the purchase of retrocessional coverage or other actions to limit the extent of potential losses in a given geographic area. These loss projections are approximations, reliant on a mix of quantitative and qualitative processes, and actual losses may exceed the projections by a material amount, resulting in a material adverse effect on our financial condition and results of operations.

*If our loss reserves are inadequate to meet our actual losses, our net income would be reduced or we could incur a loss.*

We are required to maintain reserves to cover our estimated ultimate liability of losses and LAE for both reported and unreported claims incurred. These reserves are only estimates of what we believe the settlement and administration of claims will cost based on facts and circumstances known to us. In setting reserves for our reinsurance liabilities, we rely on claim data supplied by our ceding companies and brokers and we employ actuarial and statistical projections. The information received from our ceding companies is not always timely or accurate, which can contribute to inaccuracies in our loss projections. Because of the uncertainties that surround our estimates of loss and LAE reserves, we cannot be certain that ultimate losses and LAE payments will not exceed our estimates. If our reserves are deficient, we would be required to increase loss reserves in the period in which such deficiencies are identified which would cause a charge to our earnings and a reduction of capital. By way of illustration, during the past five calendar years, the reserve re-estimation process resulted in a decrease to our pre-tax net income in three of the years:

Calendar year:	Effect on pre-tax net income	
(Dollars in millions)		
2012	\$ 3.7	increase
2011	3.7	decrease
2010	30.9	increase
2009	128.8	decrease
2008	34.9	decrease

See ITEM 1, "Business - Changes in Historical Reserves," which provides a more detailed chart showing the effect of reserve re-estimates on calendar year operating results for the past ten years.

The difficulty in estimating our reserves is significantly more challenging as it relates to reserving for potential A&E liabilities. At year-end 2012, 4.4% of our gross reserves were comprised of A&E reserves. A&E liabilities are especially hard to estimate for many reasons, including the long delays between exposure and manifestation of any bodily injury or property damage, difficulty in identifying the source of the asbestos or environmental contamination, long reporting delays and difficulty in properly allocating liability for the asbestos or environmental damage. Legal tactics and judicial and legislative developments affecting the scope of insurers' liability, which can be difficult to predict, also contribute to uncertainties in estimating reserves for A&E liabilities.

*The failure to accurately assess underwriting risk and establish adequate premium rates could reduce our net income or result in a net loss.*

Our success depends on our ability to accurately assess the risks associated with the businesses on which the risk is retained. If we fail to accurately assess the risks we retain, we may fail to establish adequate premium rates to cover our losses and LAE. This could reduce our net income and even result in a net loss.

In addition, losses may arise from events or exposures that are not anticipated when the coverage is priced. In addition to unanticipated events, we also face the unanticipated expansion of our exposures, particularly in long-tail liability lines. An example of this is the expansion over time of the scope of insurers' legal liability within the mass tort arena, particularly for A&E exposures discussed above.

*Decreases in pricing for property and casualty reinsurance and insurance could reduce our net income.*

The worldwide reinsurance and insurance businesses are highly competitive, as well as cyclical by product and market. These cycles, as well as other factors that influence aggregate supply and demand for property and casualty insurance and reinsurance products, are outside of our control. The supply of (re)insurance is driven by prevailing prices and levels of capacity that may fluctuate in response to a number of factors including large catastrophic losses and investment returns being realized in the insurance industry. Demand for (re)insurance is influenced by underwriting results of insurers and insureds, including catastrophe losses, and prevailing general economic conditions. If any of these factors were to result in a decline in the demand for (re)insurance or an overall increase in (re)insurance capacity, our net income could decrease.

*If rating agencies downgrade the ratings of our insurance subsidiaries, future prospects for growth and profitability could be significantly and adversely affected.*

Our active insurance company subsidiaries currently hold financial strength ratings assigned by third-party rating agencies which assess and rate the claims paying ability and financial strength of insurers and reinsurers. Our active subsidiaries carry an "A+" ("Superior") rating from A.M. Best. Everest Re, Bermuda Re, Ireland Re and Everest National hold an "A+" ("Strong") rating from Standard & Poor's. Everest Re and Bermuda Re hold an "Aa3" ("Excellent") rating from Moody's. Financial strength ratings are used by client companies and agents and brokers that place the business as an important means of assessing the financial strength and quality of reinsurers. A downgrade or withdrawal of any of these ratings might adversely affect our ability to market our insurance products and could have a material and adverse effect on future prospects for growth and profitability.

On January 24, 2012, Moody's affirmed the ratings of our operating subsidiaries but changed the outlook on the ratings from stable to negative reflecting their opinion of the likely direction of the ratings over the medium term (12 to 18 months). We will continue to work with Moody's over this time to address their concerns but it is not possible to predict the potential outcome.

On March 13, 2009, Standard & Poor's downgraded its ratings of Everest Re, Bermuda Re and Everest National one level to "A+". It is possible that a further downgrade will occur in the future if we do not continue to meet the evolving criteria expected of our current rating. In that regard, several of the rating agencies are in the process of modifying their approaches to evaluating enterprise risk management and its impact on ratings. Therefore, we cannot predict the outcome of this reassessment or its potential impact upon our ratings.

Consistent with market practice, much of our treaty reinsurance business allows the ceding company to terminate the contract or seek collateralization of our obligations in the event of a rating downgrade below a certain threshold. The termination provision would generally be triggered if a rating fell below A.M. Best's A-rating level, which is three levels below Everest Re's current rating of A+. To a lesser extent, Everest Re also has modest exposure to reinsurance contracts that contain provisions for obligatory funding of outstanding liabilities in the event of a rating agency downgrade. Those provisions would also generally be triggered if Everest Re's rating fell below A.M. Best's A- rating level.

*The failure of our insureds, intermediaries and reinsurers to satisfy their obligations to us could reduce our income.*

In accordance with industry practice, we have uncollateralized receivables from insureds, agents and brokers and/or rely on agents and brokers to process our payments. We may not be able to collect amounts due from insureds, agents and brokers, resulting in a reduction to net income.

We are subject to credit risk of reinsurers in connection with retrocessional arrangements because the transfer of risk to a reinsurer does not relieve us of our liability to the insured. In addition, reinsurers may be unwilling to pay us even though they are able to do so. The failure of one or more of our reinsurers to honor their obligations to us in a timely fashion would impact our cash flow and reduce our net income and could cause us to incur a significant loss.

*If we are unable or choose not to purchase reinsurance and transfer risk to reinsurers, our net income could be reduced or we could incur a net loss in the event of unusual loss experience.*

We are generally less reliant on the purchase of reinsurance than many of our competitors, in part because of our strategic emphasis on underwriting discipline and management of the cycles inherent in our business. We try to separate our risk taking process from our risk mitigation process in order to avoid developing too great a reliance on reinsurance. We generally purchase reinsurance from other third parties only when we expect a net benefit. The percentage of business that we reinsure may vary considerably from year to year, depending on our view of the relationship between cost and expected benefit for the contract period.

	2012	2011	2010	2009	2008
Percentage of ceded written premiums to gross written premiums	5.3%	4.1%	6.1%	4.8%	4.7%

Changes in the availability and cost of reinsurance, which are subject to market conditions that are outside of our control, have reduced to some extent our ability to use reinsurance to tailor the risks we assume on a contract or program basis or to mitigate or balance exposures across our reinsurance operations. Because we have purchased minimal reinsurance in recent years, our net income could be reduced following a large unreinsured event or adverse overall claims experience.

*Our industry is highly competitive and we may not be able to compete successfully in the future.*

Our industry is highly competitive and subject to pricing cycles that can be pronounced. We compete globally in the United States, Bermuda and international reinsurance and insurance markets with numerous competitors. Our competitors include independent reinsurance and insurance companies, subsidiaries or affiliates of established worldwide insurance companies, reinsurance departments of certain insurance companies and domestic and international underwriting operations, including underwriting syndicates at Lloyd's.

According to Standard & Poor's, we rank among the top ten global reinsurance groups, where more than two-thirds of the market share is concentrated. The worldwide net premium written by the traditional reinsurance market, for both life and non-life business, was estimated to be \$174 billion in 2011 according to data compiled by Standard & Poor's. The top twenty-five groups in our industry represent just over 90% of these revenues. The leaders in this market are Munich Re, Swiss Re, Berkshire Hathaway Inc., Hannover Ruckversicherung AG, and syndicates at Lloyd's. Some of these competitors have greater financial resources than we do and have established long term and continuing business relationships throughout the industry, which can be a significant competitive advantage. In addition, the lack of strong barriers to entry into the reinsurance business and the potential for securitization of reinsurance and insurance risks through capital markets provide additional sources of potential reinsurance and insurance capacity and competition.

*We are dependent on our key personnel.*

Our success has been, and will continue to be, dependent on our ability to retain the services of existing key executive officers and to attract and retain additional qualified personnel in the future. The loss of the services of any key executive officer or the inability to hire and retain other highly qualified personnel in the future could adversely affect our ability to conduct business. Generally, we consider key executive officers to be those individuals who have the greatest influence in setting overall policy and controlling operations: Chairman and Chief Executive Officer, Joseph V. Taranto (age 63), President, Dominic J. Adesso (age 59) and Executive Vice President and Chief Financial Officer, Craig Howie (age 49). We currently have employment contracts with Mr. Taranto and Mr. Adesso. Mr. Taranto's contract was filed with the SEC and provides for terms of employment ending on December 31, 2013. Mr. Adesso's contract was filed with the SEC and provides for terms of employment ending December 31, 2016.

Special considerations apply to our Bermuda operations. Under Bermuda law, non-Bermudians, other than spouses of Bermudians and individuals holding permanent or working resident certificates, are not permitted to engage in any gainful occupation in Bermuda without a work permit issued by the Bermuda government. A work permit is only granted or extended if the employer can show that, after a proper public advertisement, no Bermudian, spouse of a Bermudian or individual holding a permanent or working resident certificate is available who meets the minimum standards reasonably required for the position. The Bermuda government places a six-year term limit on individuals with work permits, subject to specified exemptions for persons deemed to be key employees of businesses with a significant physical presence in Bermuda. Currently, all four of our Bermuda-based professional employees who require work permits have been granted permits by the Bermuda government that expire at various times between September 2013 and May 2015. This includes Mark de Saram, the chief executive officer of our Bermuda reinsurance operation. In the event his work permit were not renewed, we could lose his services, thereby adversely affecting our ability to conduct our business in Bermuda until we were able to replace him with an individual in Bermuda who did not require a work permit or who was granted the permit. The Company has an employment contract with Mr. de Saram, which was filed with the SEC and provides for term of employment ending on November 1, 2014.

*Our investment values and investment income could decline because they are exposed to interest rate, credit, and market risks.*

A significant portion of our investment portfolio consists of fixed income securities and smaller portions consist of equity securities and other investments. Both the fair market value of our invested assets and associated investment income fluctuate depending on general economic and market conditions. For example, the fair market value of our predominant fixed income portfolio generally increases or decreases inversely to fluctuations in interest rates. The market value of our fixed income securities could also decrease as a result of a downturn in the business cycle that causes the credit quality of such securities to deteriorate. The net investment income that we realize from future investments in fixed income securities will generally increase or decrease with interest rates.

Interest rate fluctuations also can cause net investment income from fixed income investments that carry prepayment risk, such as mortgage-backed and other asset-backed securities, to differ from the income anticipated from those securities at the time of purchase. In addition, if issuers of individual investments are unable to meet their obligations, investment income will be reduced and realized capital losses may arise.

The majority of our fixed income securities are classified as available for sale and temporary changes in the market value of these investments are reflected as changes to our shareholders' equity. Our actively managed equity security portfolios are fair valued and any changes in fair value are reflected as net realized capital gains or losses. As a result, a decline in the value of our securities reduces our capital or could cause us to incur a loss.

We have invested a portion of our investment portfolio in equity securities. The value of these assets fluctuates with changes in the markets. In times of economic weakness, the fair value of these assets may decline, and may negatively impact net income. We also invest in non-traditional investments which have different risk characteristics than traditional fixed income and equity securities. These alternative investments are comprised primarily of private equity limited partnerships. The changes in value and investment income/(loss) for these partnerships may be more volatile than over-the-counter securities.

The following table quantifies the portion of our investment portfolio that consists of fixed income securities, equity securities and investments that carry prepayment risk.

(Dollars in millions)	At December 31, 2012	% of Total
Mortgage-backed securities:		
Commercial	\$ 320.1	1.9%
Agency residential	2,152.2	13.0%
Non-agency residential	8.1	0.0%
Other asset-backed	176.6	1.1%
Total asset-backed	<u>2,657.0</u>	<u>16.0%</u>
Other fixed income	<u>10,484.7</u>	<u>63.3%</u>
Total fixed income, at market value	13,141.7	79.3%
Fixed maturities, at fair value	41.5	0.3%
Equity securities, at market value	143.4	0.9%
Equity securities, at fair value	1,255.6	7.5%
Other invested assets	596.6	3.6%
Cash and short-term investments	1,397.4	8.4%
Total investments and cash	<u>\$ 16,576.2</u>	<u>100.0%</u>

(Some amounts may not reconcile due to rounding.)

*We may experience foreign currency exchange losses that reduce our net income and capital levels.*

Through our Bermuda and international operations, we conduct business in a variety of foreign (non-U.S.) currencies, principally the Euro, the British pound, the Canadian dollar, and the Singapore dollar. Assets, liabilities, revenues and expenses denominated in foreign currencies are exposed to changes in currency exchange rates. Our functional currency is the U.S. dollar, and exchange rate fluctuations relative to the U.S. dollar may materially impact our results and financial position. In 2012, we wrote approximately 31.0% of our coverages in non-U.S. currencies; as of December 31, 2012, we maintained approximately 17.3% of our investment portfolio in investments denominated in non-U.S. currencies. During 2012, 2011 and 2010, the impact on our quarterly pre-tax net income from exchange rate fluctuations ranged from a loss of \$17.0 million to a gain of \$31.8 million.

*We are subject to cybersecurity risks that could negatively impact our business operations.*

We are dependent upon our information technology platform, including our processing systems, data and electronic transmissions in our business operations. Security breaches could expose us to the loss or misuse of our information, litigation and potential liability. In addition, cyber incidents that impact the availability, reliability, speed, accuracy or other proper functioning of these systems could have a significant negative impact on our operations and possibly our results. An incident could also result in a violation of applicable privacy and other laws, damage our reputation, cause a loss of customers or give rise to monetary fines and other penalties, which could be significant. Management is not aware of a cybersecurity incident that has had a material impact on our operations.

## RISKS RELATING TO REGULATION

*Insurance laws and regulations restrict our ability to operate and any failure to comply with those laws and regulations could have a material adverse effect on our business.*

We are subject to extensive and increasing regulation under U.S., state and foreign insurance laws. These laws limit the amount of dividends that can be paid to us by our operating subsidiaries, impose restrictions on the amount and type of investments that we can hold, prescribe solvency, accounting and internal control standards that must be met and maintained and require us to maintain reserves. These laws also require disclosure of material inter-affiliate transactions and require prior approval of “extraordinary” transactions. Such “extraordinary” transactions include declaring dividends from operating subsidiaries that exceed statutory thresholds. These laws also generally require approval of changes of control of insurance companies. The application of these laws could affect our liquidity and ability to pay dividends, interest and other payments on securities, as applicable, and could restrict our ability to expand our business operations through acquisitions of new insurance subsidiaries. We may not have or maintain all required licenses and approvals or fully comply with the wide variety of applicable laws and regulations or the relevant authority’s interpretation of the laws and regulations. If we do not have the requisite licenses and approvals or do not comply with applicable regulatory requirements, the insurance regulatory authorities could preclude or temporarily suspend us from carrying on some or all of our activities or monetarily penalize us. These types of actions could have a material adverse effect on our business. To date, no material fine, penalty or restriction has been imposed on us for failure to comply with any insurance law or regulation.

As a result of the recent dislocation of the financial markets, Congress and the Presidential administration in the United States, are contemplating changes in the way the financial services industry is regulated. It is possible that insurance regulation will be drawn into this process, and that federal regulatory initiatives in the insurance industry could emerge. In addition, regulatory bodies in Europe are developing a new capital adequacy directive for insurers and reinsurers. The future impact of such initiatives, if any, on our operation, net income (loss) or financial condition cannot be determined at this time.

*Regulatory challenges in the United States could adversely affect the ability of Bermuda Re to conduct business.*

Bermuda Re does not intend to be licensed or admitted as an insurer or reinsurer in any U.S. jurisdiction. Under current law, Bermuda Re generally will be permitted to reinsure U.S. risks from its office in Bermuda without obtaining those licenses. However, the insurance and reinsurance regulatory framework is subject to periodic legislative review and revision. In the past, there have been congressional and other initiatives in the United States regarding increased supervision and regulation of the insurance industry, including proposals to supervise and regulate reinsurers domiciled outside the United States. If Bermuda Re were to become subject to any insurance laws of the United States or any U.S. state at any time in the future, it might be required to post deposits or maintain minimum surplus levels and might be prohibited from engaging in lines of business or from writing some types of policies. Complying with those laws could have a material adverse effect on our ability to conduct business in Bermuda and international markets.

*Bermuda Re may need to be licensed or admitted in additional jurisdictions to develop its business.*

As Bermuda Re’s business develops, it will monitor the need to obtain licenses in jurisdictions other than Bermuda and the U.K., where it has an authorized branch, in order to comply with applicable law or to be able to engage in additional insurance-related activities. In addition, Bermuda Re may be at a competitive disadvantage in jurisdictions where it is not licensed or does not enjoy an exemption from licensing relative to competitors that are so licensed or exempt from licensing. Bermuda Re may not be able to obtain any additional licenses that it determines are necessary or desirable. Furthermore, the process of obtaining those licenses is often costly and may take a long time.

*Bermuda Re's ability to write reinsurance may be severely limited if it is unable to arrange for security to back its reinsurance.*

Many jurisdictions do not permit insurance companies to take credit for reinsurance obtained from unlicensed or non-admitted insurers on their statutory financial statements without appropriate security. Bermuda Re's reinsurance clients typically require it to post a letter of credit or enter into other security arrangements. If Bermuda Re is unable to obtain or maintain a letter of credit facility on commercially acceptable terms or is unable to arrange for other types of security, its ability to operate its business may be severely limited. If Bermuda Re defaults on any letter of credit that it obtains, it may be required to prematurely liquidate a substantial portion of its investment portfolio and other assets pledged as collateral.

## **RISKS RELATING TO GROUP'S SECURITIES**

*Because of our holding company structure, our ability to pay dividends, interest and principal is dependent on our receipt of dividends, loan payments and other funds from our subsidiaries.*

Group and Holdings are holding companies, each of whose most significant asset consists of the stock of its operating subsidiaries. As a result, each of Group's and Holdings' ability to pay dividends, interest or other payments on its securities in the future will depend on the earnings and cash flows of the operating subsidiaries and the ability of the subsidiaries to pay dividends or to advance or repay funds to it. This ability is subject to general economic, financial, competitive, regulatory and other factors beyond our control. Payment of dividends and advances and repayments from some of the operating subsidiaries are regulated by U.S., state and foreign insurance laws and regulatory restrictions, including minimum solvency and liquidity thresholds. Accordingly, the operating subsidiaries may not be able to pay dividends or advance or repay funds to Group and Holdings in the future, which could prevent us from paying dividends, interest or other payments on our securities.

*Provisions in Group's bye-laws could have an anti-takeover effect, which could diminish the value of its common shares.*

Group's bye-laws contain provisions that may entrench directors and make it more difficult for shareholders to replace directors even if the shareholders consider it beneficial to do so. In addition, these provisions could delay or prevent a change of control that a shareholder might consider favorable. The effect of these provisions could be to prevent a shareholder from receiving the benefit from any premium over the market price of our common shares offered by a bidder in a potential takeover. Even in the absence of an attempt to effect a change in management or a takeover attempt, these provisions may adversely affect the prevailing market price of our common shares if they are viewed as discouraging takeover attempts in the future.

For example, Group's bye-laws contain the following provisions that could have an anti-takeover effect:

- directors currently serve staggered three-year terms, meaning that the members of only one of three classes of directors are selected each year (although the staggered board structure will be phased out between 2012 and 2014);
- shareholders have limited ability to remove directors;
- the total voting power of any shareholder owning more than 9.9% of the common shares will be reduced to 9.9% of the total voting power of the common shares;

- the board of directors may decline to register any transfer of common shares if it has reason to believe that the transfer would result in:
  - i.) any person that is not an investment company beneficially owning more than 5.0% of any class of the issued and outstanding share capital of Group,
  - ii.) any person holding controlled shares in excess of 9.9% of any class of the issued and outstanding share capital of Group, or
  - iii.) any adverse tax, regulatory or legal consequences to Group, any of its subsidiaries or any of its shareholders;
- Group also has the option to redeem or purchase all or part of a shareholder's common shares to the extent the board of directors determines it is necessary or advisable to avoid or cure any adverse or potential adverse consequences if:
  - i.) any person that is not an investment company beneficially owns more than 5.0% of any class of the issued and outstanding share capital of Group,
  - ii.) any person holds controlled shares in excess of 9.9% of any class of the issued and outstanding share capital of Group, or
  - iii.) share ownership by any person may result in adverse tax, regulatory or legal consequences to Group, any of its subsidiaries or any other shareholder.

The Board of Directors has indicated that it will apply these bye-law provisions in such manner that "passive institutional investors" will be treated similarly to investment companies. For this purpose, "passive institutional investors" include all persons who are eligible, pursuant to Rule 13d-1(b)(1) under the U.S. Securities Exchange Act of 1934, ("the Exchange Act") to file a short-form statement on Schedule 13G, other than an insurance company or any parent holding company or control person of an insurance company.

*Applicable insurance laws may also have an anti-takeover effect.*

Before a person can acquire control of a U.S. insurance company, prior written approval must be obtained from the insurance commissioner of the state where that insurance company is domiciled or deemed commercially domiciled. Prior to granting approval of an application to acquire control of a domestic insurance company, a state insurance commissioner will consider such factors as the financial strength of the applicant, the integrity and competence of the applicant's board of directors and executive officers, the acquiror's plans for the future operations of the insurance company and any anti-competitive results that may arise from the consummation of the acquisition of control. Because any person who acquired control of Group would thereby acquire indirect control of its insurance company subsidiaries in the U.S., the insurance change of control laws of Delaware, California and Georgia would apply to such a transaction. This could have the effect of delaying or even preventing such a change of control.

*The ownership of common shares of Group by Holdings may have an impact on securing approval of shareholder proposals that Group's management supports.*

As of December 31, 2012, Holdings owned 9,719,971 or 15.9% of the outstanding common shares of Group. Under Group's bye-laws, the total voting power of any shareholder owning more than 9.9% of the common shares is reduced to 9.9% of the total voting power of the common shares. Nevertheless, Holdings, which is controlled by Group, has the ability to vote 9.9% of the total voting power of Group's common shares, which may have an impact on securing approval of shareholder proposals that Group's management supports.

*Investors in Group may have more difficulty in protecting their interests than investors in a U.S. corporation.*

The Companies Act 1981 of Bermuda (the “Companies Act”), differs in material respects from the laws applicable to U.S. corporations and their shareholders. The following is a summary of material differences between the Companies Act, as modified in some instances by provisions of Group’s bye-laws, and Delaware corporate law that could make it more difficult for investors in Group to protect their interests than investors in a U.S. corporation. Because the following statements are summaries, they do not address all aspects of Bermuda law that may be relevant to Group and its shareholders.

Alternate Directors. Group’s bye-laws provide, as permitted by Bermuda law, that each director may appoint an alternate director, who shall have the power to attend and vote at any meeting of the board of directors or committee at which that director is not personally present and to sign written consents in place of that director. Delaware law does not provide for alternate directors.

Committees of the Board of Directors. Group’s bye-laws provide, as permitted by Bermuda law, that the board of directors may delegate any of its powers to committees that the board appoints, and those committees may consist partly or entirely of non-directors. Delaware law allows the board of directors of a corporation to delegate many of its powers to committees, but those committees may consist only of directors.

Interested Directors. Bermuda law and Group’s bye-laws provide that if a director has a personal interest in a transaction to which the company is also a party and if the director discloses the nature of this personal interest at the first opportunity, either at a meeting of directors or in writing to the directors, then the company will not be able to declare the transaction void solely due to the existence of that personal interest and the director will not be liable to the company for any profit realized from the transaction. In addition, after a director has made the declaration of interest referred to above, he or she is allowed to be counted for purposes of determining whether a quorum is present and to vote on a transaction in which he or she has an interest, unless disqualified from doing so by the chairman of the relevant board meeting. Under Delaware law, an interested director could be held liable for a transaction in which that director derived an improper personal benefit. Additionally, under Delaware law, a corporation may be able to declare a transaction with an interested director to be void unless one of the following conditions is fulfilled:

- the material facts as to the interested director’s relationship or interests are disclosed or are known to the board of directors and the board in good faith authorizes the transaction by the affirmative vote of a majority of the disinterested directors;
- the material facts are disclosed or are known to the shareholders entitled to vote on the transaction and the transaction is specifically approved in good faith by the holders of a majority of the voting shares; or
- the transaction is fair to the corporation as of the time it is authorized, approved or ratified.

Transactions with Significant Shareholders. As a Bermuda company, Group may enter into business transactions with its significant shareholders, including asset sales, in which a significant shareholder receives, or could receive, a financial benefit that is greater than that received, or to be received, by other shareholders with prior approval from Group’s board of directors but without obtaining prior approval from the shareholders. In the case of an amalgamation, in which two or more companies join together and continue as a single company, a resolution of shareholders approved by a majority of at least 75% of the votes cast is required in addition to the approval of the board of directors, except in the case of an amalgamation with and between wholly-owned subsidiaries. If Group was a Delaware corporation, any business combination with an interested shareholder (which, for this purpose, would include mergers and asset sales of greater than 10% of Group’s assets that would otherwise be considered transactions in the ordinary course of business) within a period of three years from the time the person became an interested shareholder would require prior approval from shareholders holding at least 66 2/3% of Group’s outstanding common shares not owned by the interested shareholder, unless the transaction qualified for one of the exemptions in the relevant Delaware statute or Group opted out of the statute. For purposes of the Delaware statute, an “interested shareholder” is generally defined as a person who together with that person’s affiliates and associates owns, or within the previous three years did own, 15% or more of a corporation’s outstanding voting shares.

Takeovers. Under Bermuda law, if an acquiror makes an offer for shares of a company and, within four months of the offer, the holders of not less than 90% of the shares that are the subject of the offer tender their shares, the acquiror may give the nontendering shareholders notice requiring them to transfer their shares on the terms of the offer. Within one month of receiving the notice, dissenting shareholders may apply to the court objecting to the transfer. The burden is on the dissenting shareholders to show that the court should exercise its discretion to enjoin the transfer. The court will be unlikely to do this unless there is evidence of fraud or bad faith or collusion between the acquiror and the tendering shareholders aimed at unfairly forcing out minority shareholders. Under another provision of Bermuda law, the holders of 95% of the shares of a company (the “acquiring shareholders”) may give notice to the remaining shareholders requiring them to sell their shares on the terms described in the notice. Within one month of receiving the notice, dissenting shareholders may apply to the court for an appraisal of their shares. Within one month of the court’s appraisal, the acquiring shareholders are entitled either to acquire all shares involved at the price fixed by the court or cancel the notice given to the remaining shareholders. If shares were acquired under the notice at a price below the court’s appraisal price, the acquiring shareholders must either pay the difference in price or cancel the notice and return the shares thus acquired to the shareholder, who must then refund the purchase price. There are no comparable provisions under Delaware law.

Inspection of Corporate Records. Members of the general public have the right to inspect the public documents of Group available at the office of the Registrar of Companies and Group’s registered office, both in Bermuda. These documents include the memorandum of association, which describes Group’s permitted purposes and powers, any amendments to the memorandum of association and documents relating to any increase or reduction in Group’s authorized share capital. Shareholders of Group have the additional right to inspect Group’s bye-laws, minutes of general meetings of shareholders and audited financial statements that must be presented to the annual general meeting of shareholders. The register of shareholders of Group also is open to inspection by shareholders and to members of the public without charge. Group is required to maintain its share register at its registered office in Bermuda. Group also maintains a branch register in the offices of its transfer agent in the U.S., which is open for public inspection as required under the Companies Act. Group is required to keep at its registered office a register of its directors and officers that is open for inspection by members of the public without charge. However, Bermuda law does not provide a general right for shareholders to inspect or obtain copies of any other corporate records. Under Delaware law, any shareholder may inspect or obtain copies of a corporation’s shareholder list and its other books and records for any purpose reasonably related to that person’s interest as a shareholder.

Shareholder’s Suits. The rights of shareholders under Bermuda law are not as extensive as the rights of shareholders under legislation or judicial precedent in many U.S. jurisdictions. Class actions and derivative actions are generally not available to shareholders under the laws of Bermuda. However, the Bermuda courts ordinarily would be expected to follow English case law precedent, which would permit a shareholder to bring an action in the name of Group to remedy a wrong done to Group where the act complained of is alleged to be beyond the corporate power of Group or illegal or would result in the violation of Group’s memorandum of association or bye-laws. Furthermore, the court would give consideration to acts that are alleged to constitute a fraud against the minority shareholders or where an act requires the approval of a greater percentage of Group’s shareholders than actually approved it. The winning party in an action of this type generally would be able to recover a portion of attorneys’ fees incurred in connection with the action. Under Delaware law, class actions and derivative actions generally are available to stockholders for breach of fiduciary duty, corporate waste and actions not taken in accordance with applicable law. In these types of actions, the court has discretion to permit the winning party to recover its attorneys’ fees.

Limitation of Liability of Directors and Officers. Group’s bye-laws provide that Group and its shareholders waive all claims or rights of action that they might have, individually or in the right of the Company, against any director or officer for any act or failure to act in the performance of that director’s or officer’s duties. However, this waiver does not apply to claims or rights of action that arise out of fraud or dishonesty. This waiver may have the effect of barring claims arising under U.S. federal securities laws. Under Delaware law, a corporation may include in its certificate of incorporation provisions limiting the personal liability of its directors to the corporation or its stockholders for monetary damages for many types of breach of fiduciary duty. However, these provisions may not limit liability for any breach of the duty of loyalty, acts or omissions not in good faith or that involve intentional misconduct or a knowing violation of law, the authorization of unlawful dividends, stock repurchases or stock redemptions, or any transaction from which a director

derived an improper personal benefit. Moreover, Delaware provisions would not be likely to bar claims arising under U.S. federal securities laws.

Indemnification of Directors and Officers. Group's bye-laws provide that Group shall indemnify its directors or officers to the full extent permitted by law against all actions, costs, charges, liabilities, loss, damage or expense incurred or suffered by them by reason of any act done, concurred in or omitted in the conduct of Group's business or in the discharge of their duties. Under Bermuda law, this indemnification may not extend to any matter involving fraud or dishonesty of which a director or officer may be guilty in relation to the company, as determined in a final judgment or decree not subject to appeal. Under Delaware law, a corporation may indemnify a director or officer who becomes a party to an action, suit or proceeding because of his position as a director or officer if (1) the director or officer acted in good faith and in a manner he reasonably believed to be in or not opposed to the best interests of the corporation and (2) if the action or proceeding involves a criminal offense, the director or officer had no reasonable cause to believe his or her conduct was unlawful.

Enforcement of Civil Liabilities. Group is organized under the laws of Bermuda. Some of its directors and officers may reside outside the U.S. A substantial portion of our assets are or may be located in jurisdictions outside the U.S. As a result, a person may not be able to affect service of process within the U.S. on directors and officers of Group and those experts who reside outside the U.S. A person also may not be able to recover against them or Group on judgments of U.S. courts or to obtain original judgments against them or Group in Bermuda courts, including judgments predicated upon civil liability provisions of the U.S. federal securities laws.

Dividends. Bermuda law does not allow a company to declare or pay a dividend, or make a distribution out of contributed surplus, if there are reasonable grounds for believing that the company, after the payment is made, would be unable to pay its liabilities as they become due, or that the realizable value of the company's assets would be less, as a result of the payment, than the aggregate of its liabilities and its issued share capital and share premium accounts. The share capital account represents the aggregate par value of issued shares, and the share premium account represents the aggregate amount paid for issued shares over and above their par value. Under Delaware law, subject to any restrictions contained in a company's certificate of incorporation, a company may pay dividends out of the surplus or, if there is no surplus, out of net profits for the fiscal year in which the dividend is declared and/or the preceding fiscal year. Surplus is the amount by which the net assets of a corporation exceed its stated capital. Delaware law also provides that dividends may not be paid out of net profits at any time when stated capital is less than the capital represented by the outstanding stock of all classes having a preference upon the distribution of assets.

## **RISKS RELATING TO TAXATION**

*If U.S. tax law changes, our net income may be reduced.*

In the last few years, some members of Congress have expressed concern about U.S. corporations that move their place of incorporation to low-tax jurisdictions. Also, some members of Congress have expressed concern over a competitive advantage that foreign-controlled insurers and reinsurers may have over U.S. controlled insurers and reinsurers due to the purchase of reinsurance by U.S. insurers from affiliates operating in some foreign jurisdictions, including Bermuda. It is possible that future legislation that would be disadvantageous to our Bermuda insurance subsidiaries could be enacted. If any such legislation were enacted, the U.S. tax burden on our Bermuda operations, or on some business ceded from our licensed U.S. insurance subsidiaries to some offshore reinsurers, could be increased. This would reduce our net income.

*Group and/or Bermuda Re may be subject to U.S. corporate income tax, which would reduce our net income.*

Bermuda Re. The income of Bermuda Re is a significant portion of our worldwide income from operations. We have established guidelines for the conduct of our operations that are designed to ensure that Bermuda Re is not engaged in the conduct of a trade or business in the U.S. Based on its compliance with those guidelines, we believe that Bermuda Re should not be required to pay U.S. corporate income tax, other than withholding tax on U.S. source dividend income. However, if the Internal Revenue Service (“IRS”) were to successfully assert that Bermuda Re was engaged in a trade or business, Bermuda Re would be required to pay U.S. corporate income tax on all of its income and possibly the U.S. branch profits tax. However, if the IRS were to successfully assert that Bermuda Re was engaged in a U.S. trade or business, we believe the U.S.-Bermuda tax treaty would preclude the IRS from taxing Bermuda Re’s income except to the extent that its income was attributable to a permanent establishment maintained by that subsidiary. We do not believe that Bermuda Re has a permanent establishment in the U.S. If the IRS were to successfully assert that Bermuda Re did have income attributable to a permanent establishment in the U.S., Bermuda Re would be subject to U.S. tax only on that income.

Group. We conduct our operations in a manner designed to minimize our U.S. tax exposure. Based on our compliance with guidelines designed to ensure that we generate only immaterial amounts, if any, of income that is subject to the taxing jurisdiction of the U.S., we believe that we should be required to pay only immaterial amounts, if any, of U.S. corporate income tax, other than withholding tax on U.S. source dividend income. However, if the IRS successfully asserted that we had material amounts of income that was subject to the taxing jurisdiction of the U.S., we would be required to pay U.S. corporate income tax on that income, and possibly the U.S. branch profits tax. The imposition of such tax would reduce our net income.

If Bermuda Re became subject to U.S. income tax on its income, or if we became subject to U.S. income tax, our income could also be subject to the U.S. branch profits tax. In that event, Group and Bermuda Re would be subject to taxation at a higher combined effective rate than if they were organized as U.S. corporations. The combined effect of the 35% U.S. corporate income tax rate and the 30% branch profits tax rate is a net tax rate of 54.5%. The imposition of these taxes would reduce our net income.

*Group and/or Bermuda Re may become subject to Bermuda tax, which would reduce our net income.*

Group and Bermuda Re are not subject to income or profits tax, withholding tax or capital gains taxes in Bermuda. Both companies have received an assurance from the Bermuda Minister of Finance under The Exempted Undertakings Tax Protection Amendment Act of 2011 to the effect that if any legislation is enacted in Bermuda that imposes any tax computed on profits or income, or computed on any capital asset, gain or appreciation, or any tax in the nature of estate duty or inheritance tax, then that tax will not apply to us or to any of our operations or our shares, debentures or other obligations until March 31, 2035. This assurance does not prevent the application of any of those taxes to persons ordinarily resident in Bermuda and does not prevent the imposition of any tax payable in accordance with the provisions of The Land Tax Act 1967 of Bermuda or otherwise payable in relation to any land leased to Group or Bermuda Re.

*Our net income will be reduced if U.S. excise and withholding taxes are increased.*

Bermuda Re is subject to federal excise tax on reinsurance and insurance premiums with respect to risks located in the U.S. In addition, Bermuda Re is subject to withholding tax on dividend income from U.S. sources. These taxes could increase and other taxes could be imposed in the future on Bermuda Re’s business, which would reduce our net income.

#### **ITEM 1B. UNRESOLVED STAFF COMMENTS**

None.

## ITEM 2. PROPERTIES

Everest Re's corporate offices are located in approximately 230,500 square feet of leased office space in Liberty Corner, New Jersey. Bermuda Re's corporate offices are located in approximately 3,600 total square feet of leased office space in Hamilton, Bermuda. The Company's other twenty locations occupy a total of approximately 152,300 square feet, all of which are leased. Management believes that the above-described office space is adequate for its current and anticipated needs.

## ITEM 3. LEGAL PROCEEDINGS

In the ordinary course of business, the Company is involved in lawsuits, arbitrations and other formal and informal dispute resolution procedures, the outcomes of which will determine the Company's rights and obligations under insurance and reinsurance agreements. In some disputes, the Company seeks to enforce its rights under an agreement or to collect funds owing to it. In other matters, the Company is resisting attempts by others to collect funds or enforce alleged rights. These disputes arise from time to time and are ultimately resolved through both informal and formal means, including negotiated resolution, arbitration and litigation. In all such matters, the Company believes that its positions are legally and commercially reasonable. The Company considers the statuses of these proceedings when determining its reserves for unpaid loss and loss adjustment expenses.

Aside from litigation and arbitrations related to these insurance and reinsurance agreements, the Company is not a party to any other material litigation or arbitration.

## ITEM 4. MINE SAFETY DISCLOSURES

Not Applicable.

## PART II

### ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED SHAREHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

#### Market Information.

The common shares of Group trade on the New York Stock Exchange under the symbol, "RE". The quarterly high and low market prices of Group's common shares for the periods indicated were:

	2012		2011	
	High	Low	High	Low
First Quarter	\$ 93.87	\$ 83.35	\$ 90.58	\$ 81.61
Second Quarter	105.13	92.45	93.76	80.55
Third Quarter	110.89	100.30	83.47	73.50
Fourth Quarter	114.60	101.72	92.60	76.63

#### Number of Holders of Common Shares.

The number of record holders of common shares as of February 1, 2013 was 92. That number does not include the beneficial owners of shares held in "street" name or held through participants in depositories, such as The Depository Trust Company.

#### Dividend History and Restrictions.

In 1995, the Board of Directors of the Company established a policy of declaring regular quarterly cash dividends and has paid a regular quarterly dividend in each quarter since the fourth quarter of 1995. The Company declared and paid its regular quarterly cash dividend of \$0.48 per share for each of the four quarters of 2012 and 2011. On February 20, 2013, the Company's Board of Directors declared a dividend of \$0.48 per share, payable on or before March 20, 2013 to shareholders of record on March 6, 2013.

The declaration and payment of future dividends, if any, by the Company will be at the discretion of the Board of Directors and will depend upon many factors, including the Company's earnings, financial condition, business needs and growth objectives, capital and surplus requirements of its operating subsidiaries, regulatory restrictions, rating agency considerations and other factors. As an insurance holding company, the Company is partially dependent on dividends and other permitted payments from its subsidiaries to pay cash dividends to its shareholders. The payment of dividends to Group by Holdings and to Holdings by Everest Re is subject to Delaware regulatory restrictions and the payment of dividends to Group by Bermuda Re is subject to Bermuda insurance regulatory restrictions. See "Regulatory Matters - Dividends" and ITEM 8, "Financial Statements and Supplementary Data" - Note 15 of Notes to Consolidated Financial Statements.

Book value per share <sup>(6)</sup>	130.96	112.99	115.45	102.87	80.77

- (1) Catastrophe losses are presented net of reinsurance and reinstatement premiums. Effective April 1, 2010, a catastrophe is defined, for purposes of the consolidated Selected Financial Data, as an event that caused a loss on property exposures before reinsurance of at least \$10.0 million before corporate level reinsurance and taxes. All prior periods reflect a catastrophe as a property event with expected reported losses of at least \$5.0 million before corporate level reinsurance and taxes. Catastrophe insurance provides coverage for one event. When limits are exhausted, some contractual arrangements provide for the availability of additional coverage upon the payment of additional premium. This additional premium is referred to as reinstatement premium.
- (2) Some amounts may not reconcile due to rounding.
- (3) Based on weighted average basic common shares outstanding of 51.9 million, 53.8 million, 56.6 million, 60.7 million and 61.7 million for 2012, 2011, 2010, 2009 and 2008, respectively.
- (4) Based on weighted average diluted common shares outstanding of 52.1 million, 56.8 million and 60.8 million for 2012, 2010, and 2009, respectively. Diluted calculation was not applicable for 2011 and 2008.
- (5) Loss ratio is the GAAP losses and LAE incurred as a percentage of GAAP net premiums earned. Underwriting expense ratio is the GAAP commissions, brokerage, taxes, fees and other underwriting expenses as a percentage of GAAP net premiums earned. Combined ratio is the sum of the loss ratio and underwriting expense ratio.
- (6) Based on \$51.4 million, \$53.7 million, \$54.4 million, 59.3 million and 61.4 million common shares outstanding for December 31, 2012, 2011, 2010, 2009 and 2008, respectively.

## ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATION

The following is a discussion and analysis of our results of operations and financial condition. It should be read in conjunction with the Consolidated Financial Statements and accompanying notes thereto presented under ITEM 8, "Financial Statements and Supplementary Data".

### Industry Conditions.

The worldwide reinsurance and insurance businesses are highly competitive, as well as cyclical by product and market. As such, financial results tend to fluctuate with periods of constrained availability, high rates and strong profits followed by periods of abundant capacity, low rates and constrained profitability. Competition in the types of reinsurance and insurance business that we underwrite is based on many factors, including the perceived overall financial strength of the reinsurer or insurer, ratings of the reinsurer or insurer by A.M. Best and/or Standard & Poor's, underwriting expertise, the jurisdictions where the reinsurer or insurer is licensed or otherwise authorized, capacity and coverages offered, premiums charged, other terms and conditions of the reinsurance and insurance business offered, services offered, speed of claims payment and reputation and experience in lines written. Furthermore, the market impact from these competitive factors related to reinsurance and insurance is generally not consistent across lines of business, domestic and international geographical areas and distribution channels.

We compete in the U.S., Bermuda and international reinsurance and insurance markets with numerous global competitors. Our competitors include independent reinsurance and insurance companies, subsidiaries or affiliates of established worldwide insurance companies, reinsurance departments of certain insurance companies and domestic and international underwriting operations, including underwriting syndicates at Lloyd's. Some of these competitors have greater financial resources than we do and have established long term and continuing business relationships, which can be a significant competitive advantage. In addition, the lack of strong barriers to entry into the reinsurance business and the potential for securitization of reinsurance and insurance risks through capital markets provide additional sources of potential reinsurance and insurance capacity and competition.

Worldwide insurance and reinsurance market conditions continued to be very competitive, particularly in the casualty lines of business. Generally, there was ample insurance and reinsurance capacity relative to demand. Competition and its effect on rates, terms and conditions vary widely by market and coverage yet continued to be most prevalent in the U.S. casualty insurance and reinsurance markets.

However, during the fourth quarter of 2012, the industry sustained significant losses from Superstorm Sandy and also sustained significant losses during 2011 from Australian floods, the New Zealand earthquake, the earthquake and tsunami in Japan, storms in the U.S., and the Thailand floods. It is too early to determine the longer term impact on market conditions as a result of these events. While the 2011 events have resulted in meaningful rate increases for catastrophe coverages in some global catastrophe prone regions, particularly areas impacted by these losses, whether the magnitude of these 2012 and 2011 losses is sufficient to increase rates and improve market conditions for other lines of business remains to be seen.

Overall, we believe that current marketplace conditions, particularly for catastrophe coverages, provide profit opportunities for us given our strong ratings, distribution system, reputation and expertise. We continue to employ our strategy of targeting business that offers the greatest profit potential, while maintaining balance and diversification in our overall portfolio.

## Financial Summary.

We monitor and evaluate our overall performance based upon financial results. The following table displays a summary of the consolidated net income (loss), ratios and shareholders' equity for the periods indicated.

(Dollars in millions)	Years Ended December 31,			Percentage Increase/(Decrease)	
	2012	2011	2010	2012/2011	2011/2010

(NM, not meaningful)

(Some amounts may not reconcile due to rounding.)

## Revenues.

**Premiums.** Gross written premiums increased by 0.6% to \$4,310.5 million in 2012, compared to \$4,286.2 million in 2011, reflecting a \$97.5 million increase in our insurance business, partially offset by a \$73.1 million decrease in our reinsurance business. The increase in insurance premiums was primarily due to the growth in crop and primary A&H medical stop loss insurance, partially offset by the termination and runoff of several large casualty programs. The decrease in reinsurance premiums was primarily due to the non-renewal of a large Florida quota share reinsurance contract and a \$42.5 million decline due to movement in foreign exchange rates, partially offset by increases in new business and rate increases on renewals, particularly for catastrophe exposed contracts. Eliminating the effects of reinstatement premiums, which

were higher in 2011 due to a higher level of catastrophe losses, and foreign currency fluctuations, gross written premiums were up 2% year over year. Net written premiums decreased 0.7% to \$4,081.1 million in 2012 compared to \$4,108.9 million in 2011. The variance between the changes in gross and net written premiums was primarily attributable to the growth in the crop business, for which the Company uses a higher level of reinsurance. Premiums earned increased by 1.5% to \$4,164.6 million in 2012, compared to \$4,101.3 million in 2011. The fluctuations in premiums earned in comparison to net written premiums were primarily attributable to changes in the mix of business, particularly crop insurance which has a different premiums earning pattern.

Gross written premiums increased by 2.0% to \$4,286.2 million in 2011, compared to \$4,200.7 million in 2010, reflecting a \$110.3 million increase in our insurance business, partially offset by a \$24.8 million decrease in our reinsurance business. The year over year increase in insurance premiums was primarily due to the acquisition of Heartland, which provided \$169.6 million of new crop insurance business, our recent initiative in primary medical stop loss insurance, which added \$54.0 million of premium and improved premium rates on our California workers' compensation business, partially offset by our reduced participation on a large casualty program. The decrease in reinsurance premiums was due to the continued reduction in U.S. casualty business, the loss of several large crop reinsurance contracts, as well as the planned reduction of catastrophe exposed business in certain territories, partially offset by higher reinstatement premiums, \$35.8 million, resulting from catastrophe losses and favorable foreign exchange impact year over year of \$49.3 million. Net written premiums increased by 4.1% to \$4,108.9 million in 2011 compared to \$3,945.6 million in 2010. The larger increase in net written premiums relative to the change in gross written premiums was due to a lower level of ceded reinsurance in the Insurance segment due to the planned reduction in one casualty program. Premiums earned increased by 4.2% to \$4,101.3 million in 2011, compared to \$3,934.6 million in 2010. The change in premiums earned is consistent with the increase in net written premiums.

Net Investment Income. Net investment income decreased by 3.2% to \$600.2 million in 2012 compared with net investment income of \$620.0 million in 2011. Net pre-tax investment income, as a percentage of average invested assets, was 3.9% in 2012 compared to 4.1% in 2011. The decline in income and yield was primarily the result of lower reinvestment rates for the fixed income portfolio, partially offset by an increase in our limited partnership income.

Net investment income decreased by 5.1% to \$620.0 million in 2011 compared with net investment income of \$653.5 million in 2010, primarily as a result of a \$13.9 million decrease in investment income from our limited partnership investments and the effects of lower reinvestment rates in 2011. Net pre-tax investment income, as a percentage of average invested assets, was 4.1% in 2011 compared to 4.5% in 2010. The variance in this yield was primarily the result of fluctuations in our limited partnership income.

Net Realized Capital Gains (Losses). Net realized capital gains were \$164.4 million, \$6.9 million and \$101.9 million in 2012, 2011 and 2010, respectively. The \$164.4 million was comprised of \$118.1 million of gains from fair value re-measurements and \$56.3 million of net realized capital gains from sales on our fixed maturity and equity securities, which were partially offset by \$10.0 million of other-than-temporary impairments. The net realized capital gains of \$6.9 million in 2011 were the result of \$27.5 million of net realized capital gains from sales on our fixed maturity and equity securities which was partially offset by \$4.4 million of losses from fair value re-measurements and \$16.2 million of other-than-temporary impairments. The net realized capital gains of \$101.9 million in 2010 were the result of \$70.4 million of gains in fair value re-measurements and \$34.5 million of net realized capital gains from sales on our fixed maturity and equity securities, which were partially offset by \$3.0 million of other-than-temporary impairments.

Net Derivative Gain (Loss). In 2005 and prior, we sold seven equity index put option contracts, which remain outstanding. These contracts meet the definition of a derivative in accordance with FASB guidance and as such, are fair valued each quarter with the change recorded as net derivative gain or loss in the consolidated statements of operations and comprehensive income (loss). As a result of these adjustments in value, we recognized net derivative losses of \$9.7 million, \$11.3 million and \$1.1 million in 2012, 2011 and 2010, respectively. The change in the fair value of these equity index put option contracts is indicative of the change in the equity markets and interest rates over the same periods.

Other Income (Expense). We recorded other income of \$3.3 million in 2012, other expense of \$23.1 million in 2011 and other income of \$16.9 million in 2010. The changes were primarily the result of fluctuations in foreign currency exchange rates for the corresponding periods.

**Claims and Expenses.**

Incurred Losses and Loss Adjustment Expenses. The following table presents our incurred losses and loss adjustment expenses ("LAE") for the periods indicated.

(Dollars in millions)	Years Ended December 31,

(a) Attritional losses exclude catastrophe and A&E losses.

(Some amounts may not reconcile due to rounding.)

Incurred losses and LAE decreased by 26.3% to \$2,745.3 million for the year ended December 31, 2012 compared to \$3,726.2 million in 2011, representing 25.0 loss ratio points. Current year catastrophe losses were lower by \$890.4 million, or 21.9 points, period over period. The \$410.0 million of current year catastrophe losses for 2012 related to Superstorm Sandy (\$325.0 million), U.S. storms (\$60.0 million) and Hurricane Isaac (\$25.0 million). The \$1,300.4 million of current year catastrophe losses for 2011 related primarily to the Japanese earthquake and tsunami (\$531.7 million), the 2011 New Zealand earthquake (\$305.8 million), the Thailand floods (\$225.0 million), U.S. storms (\$60.6 million), the 2011 Australian floods (\$56.1 million) and Hurricane Irene (\$38.0 million) as well as \$50.0 million of IBNR reserves for these 2011 catastrophe events collectively, which were not allocated to a specific event. During 2012, \$41.0 million of the IBNR reserve was allocated to specific 2011 catastrophes, leaving \$9.0 million of unallocated IBNR reserves at December 31, 2012. Current year attritional losses decreased \$83.2 million, representing 2.9 loss ratio points, due to a shift in mix of business towards excess of loss business, which generally has lower attritional losses.

Incurring losses and LAE increased by 26.5% to \$3,726.2 million for the year ended December 31, 2011 compared to \$2,945.7 million in 2010. Of the \$780.5 million increase, current year catastrophe losses represented \$713.9 million, or 16.8 points, period over period, primarily due to the 2011 catastrophe losses discussed above. The \$586.5 million of current year catastrophe losses for 2010 related primarily to the Chile earthquake (\$416.2 million), the 2010 New Zealand earthquake (\$90.0 million), the 2010 Australia hailstorms and floods (\$65.3 million) and the Canadian hailstorm (\$15.0 million). In addition, the overall attritional losses increased \$50.3 million due, in part, to higher earned premium in the current year, which generated higher attritional losses for the current year, as well as the impact of favorable development in 2010 without comparable favorable development in 2011.

Commission, Brokerage, Taxes and Fees. Commission, brokerage, taxes and fees increased by 0.2% to \$952.7 million for the year ended December 31, 2012 compared to \$950.5 million in 2011. The increase is due primarily to the one-time effect of the non-renewal of a Florida quota share contract and the adoption of new accounting standards concerning the accounting for acquisition costs, which increased expenses in 2012. The increased expenses resulting from these two factors were partially offset by an increase in excess of loss business which carries a lower commission than pro rata business.

Commission, brokerage, taxes and fees increased by 2.0% to \$950.5 million for the year ended December 31, 2011 compared to \$931.9 million in 2010 due primarily to the increase in premiums earned. Conversely, commissions, as a percentage of earned premiums are down for the year driven by a shift in distribution channels on the insurance book, with a greater proportion of the business being accessed directly, at lower commission rates, rather than through managing general agents. In addition, there was also an impact from a shift in the mix of business due to a higher level of excess loss business in the current year, which carries a lower commission than pro rata business.

Other Underwriting Expenses. Other underwriting expenses were \$207.7 million, \$182.4 million and \$166.3 million in 2012, 2011, and 2010, respectively. The increase in other underwriting expenses for 2012 compared to 2011 was mainly due to higher share-based compensation and employee benefit plan expenses. The increase in other underwriting expenses for 2011 compared to 2010 was mainly due to expenses of Heartland, which was acquired in January, 2011.

Corporate Expenses. Corporate expenses, which are general operating expenses that are not allocated to segments, were \$24.0 million, \$16.5 million and \$14.9 million for the years ended December 31, 2012, 2011 and 2010, respectively. The increases in corporate expenses were mainly due to higher share-based compensation expense.

Interest, Fees and Bond Issue Cost Amortization Expense. Interest, fees and other bond amortization expense was \$53.7 million and \$52.3 million in 2012 and 2011, respectively. The increase was primarily due to additional costs for the new Group Credit Facility signed in June, 2012.

Interest, fees and other bond amortization expense was \$52.3 million and \$55.8 million in 2011 and 2010, respectively. The decrease was primarily due to the maturing of debt in March, 2010.

Income Tax Expense (Benefit). We had an income tax expense of \$110.6 million in 2012 and income tax benefits of \$153.5 million and \$19.5 million in 2011 and 2010, respectively. Our income tax is primarily a function of the statutory tax rates and corresponding pre-tax income in the jurisdictions where we operate, coupled with the impact from tax-preferenced investment income. Variations in our effective tax rate generally result from changes in the relative levels of pre-tax income among jurisdictions with different tax rates. The increase in tax expense was mainly due to the improvement in taxable income resulting from lower catastrophe losses in 2012. The 2012 income tax expense also reflects tax benefits of \$17.5 million realized due to corrections of understatements in the deferred tax asset account and \$31.9 million of tax benefits from a reduction in our reserve for uncertain tax positions due to the re-measurement of our exposure following the closing of an IRS audit. The tax benefit in 2010 resulted primarily from a tax audit settlement.

**Net Income (Loss).**

Our net income was \$829.0 million in 2012 and our net loss was \$80.5 million in 2011. The increase was primarily driven by the decline in catastrophe losses in 2012.

Our net loss was \$80.5 million and our net income was \$610.8 million in 2011 and 2010, respectively. The decrease was primarily driven by an increase in catastrophe losses in 2011.

**Ratios.**

Our combined ratio decreased by 24.7 points to 93.8% in 2012 compared to 118.5% in 2011. The loss ratio component decreased 25.0 points in 2012 over the same period last year primarily due to the decline in catastrophe losses in 2012 compared to 2011. The commission and brokerage ratio component slightly decreased over the same period last year due to an increase in excess of loss business which carries a lower commission than pro rata business, partially offset by the one-time effect of the non-renewal of the Florida quota share and the adoption of new accounting standards concerning the accounting for acquisition costs. Eliminating the impact of reinstatement premiums, contingent commissions, and these one time items, the commission and brokerage ratio improved 1.5 points to 21.2% driven by the shift in the mix of business. The other underwriting expense ratio component increased slightly from the same period last year due to higher employee benefit costs.

Our combined ratio increased by 15.7 points to 118.5% in 2011 compared to 102.8% in 2010. The loss ratio component increased 16.0 points in 2011 over the same period last year, principally due to higher current year catastrophe losses as a result of the Japan earthquake, New Zealand earthquake, Thailand floods, U.S. storms, the Australia floods and Hurricane Irene. The other underwriting expense ratio component increased slightly and the commission and brokerage ratio component decreased slightly over the same period last year due to the mix of business.

**Shareholders' Equity.**

Shareholders' equity increased by \$662.1 million to \$6,733.5 million at December 31, 2012 from \$6,071.4 million at December 31, 2011, principally as a result of \$829.0 million of net income, \$154.3 million of unrealized appreciation on investments, net of tax, share-based compensation transactions of \$53.5 million, \$22.7 million of net foreign currency translation adjustments, partially offset by repurchases of 3.0 million common shares for \$290.0 million, \$100.4 million of shareholder dividends and \$7.0 million of net benefit plan obligation adjustments.

Shareholders' equity decreased by \$212.1 million to \$6,071.4 million at December 31, 2011 from \$6,283.5 million at December 31, 2010, principally as a result of \$103.8 million of shareholder dividends, repurchases of 1.1 million common shares for \$92.5 million, \$80.5 million of net loss, \$29.5 million of net benefit plan obligation adjustments and \$16.0 million of net foreign currency translation adjustments, partially offset by \$80.1 million of unrealized appreciation on investments, net of tax, and share-based compensation transactions of \$30.0 million.

**Consolidated Investment Results****Net Investment Income.**

Net investment income decreased by 3.2% to \$600.2 million in 2012 compared to \$620.0 million in 2011, primarily due to declines in income from our fixed maturities, reflective of declining reinvestment rates, partially offset by an increase in income from our limited partnership investments.

Net investment income decreased by 5.1% to \$620.0 million in 2011 compared to \$653.5 million in 2010, primarily due to a decrease in income from our limited partnership investments and a decline in income from our fixed maturities, reflective of reducing our municipal bond exposures and declining reinvestment rates. These decreases were partially offset by increased dividend income from equities due to our expanded public equity portfolio and emerging market debt mutual funds.

The following table shows the components of net investment income for the periods indicated.

(Dollars in millions)	Years Ended December 31,		
	2012	2011	2010
Fixed maturities	\$ 489.8	\$ 522.0	\$ 581.9
Equity securities	59.2	57.6	12.2
Short-term investments and cash	1.3	1.3	0.2
Other invested assets			
Limited partnerships	64.9	56.9	70.7
Other	3.9	2.7	1.3
Total gross investment income	619.0	640.4	666.2
Interest debited (credited) and other expense	(18.8)	(20.4)	(12.8)
Total net investment income	\$ 600.2	\$ 620.0	\$ 653.5

(Some amounts may not reconcile due to rounding.)

The following table shows a comparison of various investment yields for the periods indicated.

	2012	2011	2010
Imbedded pre-tax yield of cash and invested assets at December 31	3.5%	3.9%	3.9%
Imbedded after-tax yield of cash and invested assets at December 31	3.0%	3.4%	3.5%
Annualized pre-tax yield on average cash and invested assets	3.9%	4.1%	4.5%
Annualized after-tax yield on average cash and invested assets	3.3%	3.6%	3.9%

Because of our historical income orientation, we have generally managed our investments to maximize reportable income. The following table provides a comparison of our total return by asset class relative to broadly accepted industry benchmarks for the periods indicated:

	2012	2011	2010
Fixed income portfolio total return	4.8%	4.7%	5.3%
Barclay's Capital - U.S. aggregate index	4.2%	7.8%	6.5%
Common equity portfolio total return	13.8%	2.7%	15.4%
S&P 500 index	16.0%	2.1%	15.1%
Other invested asset portfolio total return	16.0%	13.5%	18.7%

The pre-tax equivalent total return for the bond portfolio was approximately 5.0%, 5.1% and 5.7%, respectively, in 2012, 2011 and 2010. The pre-tax equivalent return adjusts the yield on tax-exempt bonds to the fully taxable equivalent.

As indicated above, there is a relatively large variation between the total return on our fixed income portfolio for the year ended December 31, 2011 versus the Barclay's - U.S. aggregate index for the same period. One of the reasons is that the duration of our portfolio is much shorter than the duration of the index. Historically, our duration has been shorter than the index because we align our investment portfolio with our liabilities. In addition, we shortened our duration in anticipation of a reversing trend in interest rate movements. With interest rates continuing to decline in 2011, the index benefited from its longer duration; however, in the longer term, there will be a benefit from a reduced exposure to unrealized market valuation losses on our fixed income portfolio if interest rates rise. Our total return was more comparable to the index in 2012 as interest rates remained fairly steady. The composition of the index is also different from our portfolio as we hold foreign securities to match our foreign liabilities, while the index is comprised of only U.S. securities.

### Net Realized Capital Gains (Losses).

The following table presents the composition of our net realized capital gains (losses) for the periods indicated.

(Dollars in millions)	Years Ended December 31,			2012/2011	2011/2010
	2012	2011	2010	Variance	Variance
<u>Gains (losses) from sales:</u>					
Fixed maturity securities, market value:					
Gains	\$ 31.9	\$ 85.5	\$ 140.2	\$ (53.6)	\$ (54.7)
Losses	(17.2)	(65.1)	(112.8)	47.9	47.7
Total	14.7	20.4	27.5	(5.7)	(7.1)
Fixed maturity securities, fair value:					
Gains	6.3	1.1	0.8	5.2	0.3
Losses	(0.6)	(2.0)	-	1.4	(2.0)
Total	5.7	(0.9)	0.8	6.6	(1.7)
Equity securities, market value:					
Gains	16.7	0.2	0.1	16.5	0.1
Losses	(1.8)	(0.2)	-	(1.6)	(0.2)
Total	14.9	-	0.1	14.9	(0.1)
Equity securities, fair value:					
Gains	41.1	16.1	11.4	25.0	4.7
Losses	(20.1)	(8.1)	(5.3)	(12.0)	(2.8)
Total	21.0	8.0	6.1	13.0	1.9
Total net realized capital gains (losses) from sales:					
Gains	96.0	102.9	152.6	(6.9)	(49.7)
Losses	(39.6)	(75.4)	(118.1)	35.8	42.7
Total	56.3	27.5	34.5	28.8	(7.0)
<u>Other-than-temporary impairments:</u>					
	(10.0)	(16.2)	(3.0)	6.2	(13.2)
<u>Gains (losses) from fair value adjustments:</u>					
Fixed maturities, fair value	1.9	(15.5)	15.1	17.4	(30.6)
Equity securities, fair value	116.2	11.1	55.3	105.1	(44.2)
Total	118.1	(4.4)	70.4	122.5	(74.8)
Total net realized capital gains (losses)	\$ 164.4	\$ 6.9	\$ 101.9	\$ 157.5	\$ (95.0)

(Some amounts may not reconcile due to rounding.)

Net realized capital gains were \$164.4 million in 2012 compared to net realized capital gains of \$6.9 million and \$101.9 million in 2011 and 2010, respectively. In 2012, we recorded \$118.1 million of net realized capital gains due to fair value re-measurements on fixed maturity and equity securities and \$56.3 million of net realized capital gains from sales of fixed maturity and equity securities, partially offset by \$10.0 million of other-than-temporary impairments. The fixed maturity sales in 2012 related primarily to maintaining a balanced foreign currency exposure and the equity sales related primarily to reducing our equity exposure. In 2011, we recorded \$27.5 million of net realized capital gains from sales of fixed maturity and equity securities, partially offset by \$16.2 million of other-than-temporary impairments and \$4.4 million of net realized capital losses due to fair value re-measurements on fixed maturity and equity securities. The gains and losses on the sales of fixed maturity securities included the impact of selling part of our municipal bond portfolio as credit concerns arose in this market sector. In 2010, we recorded \$70.4 million of gains due to fair value re-measurements on fixed maturity and equity securities and \$34.5 million of net realized capital gains from sales of fixed maturity and equity securities, partially offset by \$3.0 million of other-than-temporary impairments on fixed maturity securities. The gains on the sales of fixed maturity securities included selling securities in foreign currencies, which reduced our exposure to future currency fluctuations. The losses included the impact of selling part of our municipal bond portfolio in the latter part of the year as credit concerns arose in this market sector. We were able to carry these realized losses back for income tax purposes to offset previously realized gains. This carry back availability expired at the end of 2010.

**Segment Results.**

During the quarter ended September 30, 2011, the Company realigned its reporting segments to reflect recent changes in the type and volume of business written. The Company previously reported the results of Marine & Aviation, Surety, A&H Reinsurance and A&H Primary operations as a separate segment—Specialty Underwriting. The A&H primary business, which is a relatively new line of business for the Company, has increased significantly, representing approximately 2% of premiums earned and is projected to continue to grow. The A&H primary business is better aligned with the Insurance reporting segment based on the similarities of this business with those businesses already reflected in the Insurance segment. The other operating units included in the Specialty Underwriting segment would have encompassed less than 5% of the Company's premiums earned and their volume is projected to remain less than 5%. As a result of the size of these remaining operating units and their similarity to the business reported within U.S. Reinsurance, they have been reclassified to the U.S. Reinsurance segment. There has been no change to the International and Bermuda reporting segments. The Company has restated all segment information for prior years to conform to the new reporting segment structure.

The U.S. Reinsurance operation writes property and casualty reinsurance and specialty lines of business, including Marine, Aviation, Surety and A&H business, on both a treaty and facultative basis, through reinsurance brokers, as well as directly with ceding companies primarily within the U.S. The International operation writes non-U.S. property and casualty reinsurance through Everest Re's branches in Canada and Singapore and through offices in Brazil, Miami and New Jersey. The Bermuda operation provides reinsurance and insurance to worldwide property and casualty markets through brokers and directly with ceding companies from its Bermuda office and reinsurance to the United Kingdom and European markets through its UK branch and Ireland Re. The Insurance operation writes property and casualty insurance, including medical stop loss insurance, directly and through general agents, brokers and surplus lines brokers within the U.S. and Canada.

These segments are managed independently, but conform with corporate guidelines with respect to pricing, risk management, control of aggregate catastrophe exposures, capital, investments and support operations. Management generally monitors and evaluates the financial performance of these operating segments based upon their underwriting results.

Underwriting results include earned premium less losses and LAE incurred, commission and brokerage expenses and other underwriting expenses. We measure our underwriting results using ratios, in particular loss, commission and brokerage and other underwriting expense ratios, which respectively, divide incurred losses, commissions and brokerage and other underwriting expenses by premiums earned. We utilize inter-affiliate reinsurance, although such reinsurance does not materially impact segment results, as business is generally reported within the segment in which the business was first produced.

Our loss and LAE reserves are our best estimate of our ultimate liability for unpaid claims. We re-evaluate our estimates on an ongoing basis, including all prior period reserves, taking into consideration all available information and, in particular, recently reported loss claim experience and trends related to prior periods. Such re-evaluations are recorded in incurred losses in the period in which re-evaluation is made.

The following discusses the underwriting results for each of our segments for the periods indicated.

### U.S. Reinsurance.

The following table presents the underwriting results and ratios for the U.S. Reinsurance segment for the periods indicated.

(Dollars in millions)	Years Ended December 31,			2012/2011		2011/2010	
	2012	2011	2010	Variance	% Change	Variance	% Change
Gross written premiums	\$ 1,310.7	\$ 1,346.8	\$ 1,395.4	\$ (36.1)	-2.7%	\$ (48.6)	-3.5%
Net written premiums	1,306.5	1,344.3	1,392.6	(37.8)	-2.8%	(48.4)	-3.5%
Premiums earned	\$ 1,416.4	\$ 1,312.7	\$ 1,387.0	\$ 103.7	7.9%	\$ (74.2)	-5.4%
Incurred losses and LAE	1,050.4	1,034.1	900.9	16.3	1.6%	133.2	14.8%
Commission and brokerage	350.6	327.8	351.6	22.8	7.0%	(23.7)	-6.7%
Other underwriting expenses	44.8	39.3	42.5	5.5	14.0%	(3.2)	-7.6%

(Some amounts may not reconcile due to rounding.)

**Premiums.** Gross written premiums decreased by 2.7% to \$1,310.7 million for in 2012 from \$1,346.8 million in 2011, primarily due to the non-renewal of a large Florida quota share reinsurance contract, partially offset by increased new business and higher premium rates on renewals, particularly for contracts with catastrophe exposed risks. Net written premiums decreased 2.8% to \$1,306.5 million in 2012 compared to \$1,344.3 million in 2011, which is in line with the decrease in gross written premiums. Premiums earned increased by 7.9% to \$1,416.4 million in 2012 compared to \$1,312.7 million in 2011. The variance difference between premiums earned and net written premiums is primarily attributable to the non-renewal of the large Florida quota share reinsurance contract, which had a larger negative impact on gross and net written premiums, increases in new business, rate increases on renewals, particularly for catastrophe exposed contracts and changes in the mix of business.

Gross written premiums decreased by 3.5% to \$1,346.8 million in 2011 from \$1,395.4 million in 2010, primarily due to reduced reinsurance premiums for A&H, crop and marine business partially offset by a \$24.4 million increase in reinstatement premiums due to higher catastrophe loss activity in the period. Net written premiums decreased 3.5% to \$1,344.3 million in 2011 compared to \$1,392.6 million for the same period in 2010, which is in line with the decrease in gross written premiums for the year. Premiums earned decreased by 5.4% to \$1,312.7 million in 2011 compared to \$1,387.0 million in 2010. The change in premiums earned relative to net written premiums is the result of timing; premiums are earned ratably over the coverage period whereas written premiums are recorded at the initiation of the coverage period.

Incurred Losses and LAE. The following table presents the incurred losses and LAE for the U.S. Reinsurance segment for the periods indicated.

(Dollars in millions)	Years Ended December 31,

(Some amounts may not reconcile due to rounding.)

Incurred losses increased by 1.6% to \$1,050.4 million in 2012 compared to \$1,034.1 in 2011, primarily as a result of the \$98.0 million (5.4 points) increase in catastrophe losses. The \$372.6 million of current year catastrophe losses for 2012 related primarily to Superstorm Sandy (\$289.0 million), U.S. storm losses (\$59.8 million) and Hurricane Isaac (\$23.8 million). The \$262.0 million of current year catastrophe losses for 2011 related primarily to the Japanese earthquake and tsunami (\$71.5 million), the 2011 New Zealand earthquake (\$63.0 million), U.S. tornadoes (\$58.2 million), Hurricane Irene (\$27.5 million) and the Thailand floods (\$17.0 million). The current year attritional losses decreased \$13.5 million due primarily to a shift in business to excess of loss contracts which generally have lower attritional losses than pro rata contracts.

Incurred losses were \$133.2 million (13.8 points) higher at \$1,034.1 million in 2011 compared to \$900.9 million in 2010, primarily as a result of the \$230.7 million (17.7 points) increase in current year catastrophe losses, largely due to the 2011 catastrophe losses discussed above. The \$31.3 million of current year catastrophe losses for 2010 related primarily to the Chile earthquake (\$16.1 million) and the New Zealand earthquake (\$15.0 million). The current year attritional losses decreased \$76.2 million (2.5 points), primarily due to a shift in the mix of business, with a higher level of excess of loss business in the current year, which carries a lower attritional loss ratio than pro rata business, coupled with a decline in earned premiums.

**Segment Expenses.** Commission and brokerage expenses increased by 7.0% to \$350.6 million in 2012 compared to \$327.8 million in 2011. These variances were primarily due to the increase in premiums earned and the effect on commissions resulting from the non-renewal of a Florida quota share contract. Segment other underwriting expenses increased to \$44.8 million in 2012 from \$39.3 million in 2011. These increases were primarily due to higher share-based compensation and employee benefit plan expenses.

Commission and brokerage expenses decreased by 6.7% to \$327.8 million in 2011 compared to \$351.6 million in 2010, primarily due to the decline in premiums earned and a shift in the mix of business. Segment other underwriting expenses in 2011 decreased slightly to \$39.3 million from \$42.5 million in 2010.

### International.

The following table presents the underwriting results and ratios for the International segment for the periods indicated.

(Dollars in millions)	Years Ended December 31,			2012/2011		2011/2010	
	2012	2011	2010	Variance	% Change	Variance	% Change
Gross written premiums	\$ 1,192.3	\$ 1,238.4	\$ 1,207.0	\$ (46.1)	-3.7%	\$ 31.5	2.6%
Net written premiums	1,188.7	1,218.6	1,199.6	(29.8)	-2.4%	19.0	1.6%
Premiums earned	\$ 1,214.8	\$ 1,244.5	\$ 1,168.1	\$ (29.7)	-2.4%	\$ 76.4	6.5%
Incurred losses and LAE	586.3	1,372.3	1,050.1	(786.0)	-57.3%	322.2	30.7%
Commission and brokerage	300.1	311.0	288.4	(10.9)	-3.5%	22.6	7.8%
Other underwriting expenses	29.3	27.3	27.6	2.0	7.3%	(0.3)	-1.2%
Underwriting gain (loss)	\$ 299.1	\$ (466.1)	\$ (198.0)	\$ 765.2	-164.2%	\$ (268.1)	135.4%
					Point Chg		Point Chg
Loss ratio	48.3%	110.3%	89.9%		(62.0)		20.4
Commission and brokerage ratio	24.7%	25.0%	24.7%		(0.3)		0.3
Other underwriting expense ratio	2.4%	2.2%	2.4%		0.2		(0.2)
Combined ratio	75.4%	137.5%	117.0%		(62.1)		20.5

(Some amounts may not reconcile due to rounding.)

**Premiums.** Gross written premiums decreased by 3.7% to \$1,192.3 million in 2012 compared to \$1,238.4 million in 2011, primarily due to a shift in the mix of business towards excess of loss business, which generates a lower premium rate commensurate with lower loss exposure, a \$25.0 million decline due to the impact of foreign exchange rate movement and a lower level of reinstatement premiums in 2012. Net written premiums decreased by 2.4% to \$1,188.7 million in 2012 compared to \$1,218.6 million in 2011, principally as a result of the decrease in gross written premiums. Premiums earned decreased 2.4% to \$1,214.8 million 2012 compared to \$1,244.5 million in 2011. The change in premiums earned is comparable to the change in net written premiums.

Gross written premiums increased by 2.6% to \$1,238.4 million in 2011 compared to \$1,207.0 million in 2010, primarily due to the effects of foreign exchange. Eliminating this effect, premiums were essentially flat. Growth from increased rate levels, particularly in regions recently affected by catastrophe losses was offset by the termination of business that did not meet our current pricing targets. Net written premiums increased by 1.6% to \$1,218.6 million in 2011 compared to \$1,199.6 million for the same period in 2010, principally as a result of the increase in gross written premiums. Premiums earned increased 6.5% to \$1,244.5 million in 2011 compared to \$1,168.1 million for the same period in 2010. The change in premiums earned relative to net written premiums is the result of timing; premiums are earned ratably over the coverage period whereas written premiums are recorded at the initiation of the coverage period.

**Incurred Losses and LAE.** The following table presents the incurred losses and LAE for the International segment for the periods indicated.

(Dollars in millions)	Years Ended December 31,					
	Current Year	Ratio %/ Pt Change	Prior Years	Ratio %/ Pt Change	Total Incurred	Ratio %/ Pt Change
<b>2012</b>

Total segment	\$ (880.0)	(69.5) pts	\$ 94.0	7.5 pts	\$ (786.0)	(62.0) pts
<b>Variance 2011/2010</b>						
Attritional	\$ (7.4)	(4.0) pts	\$ (66.3)	(5.1) pts	\$ (73.7)	(9.1) pts
Catastrophes	384.6	28.5 pts	11.3	1.0 pts	395.9	29.5 pts
Total segment	\$ 377.2	24.5 pts	\$ (55.0)	(4.1) pts	\$ 322.2	20.4 pts

(Some amounts may not reconcile due to rounding.)

Incurred losses and LAE decreased by 57.3% to \$586.3 million in 2012 compared to \$1,372.3 million in 2011, representing 62.0 loss ratio points. The decrease was principally due to an \$828.7 million (66.5 points) decrease in current year catastrophe losses. The \$16.6 million of 2012 current year catastrophes related primarily to Superstorm Sandy (\$16.5 millions). The \$845.3 million of 2011 current year catastrophes related primarily to the Japanese earthquake and tsunami (\$372.3 million), the 2011 Thailand floods (\$180.0 million), the 2011 New Zealand earthquake (\$177.0 million) and the 2011 Australian floods (\$47.1 million). Current years' attritional losses decreased by \$51.3 million (3.0 points) due to rate increases in the Asian markets, particularly for catastrophe-exposed risks and a shift in the mix of business towards property catastrophe and excess of loss business, which generally have lower loss ratios.

Incurred losses and LAE increased by 30.7% to \$1,372.3 million in 2011 compared to \$1,050.1 million in 2010, principally due to a \$384.6 million (28.5 points) increase in current year catastrophes. The \$845.3 million of 2011 current year catastrophes related primarily to losses discussed above. The \$460.7 million of 2010 current year catastrophe losses related primarily to the Chile earthquake (\$335.4 million), the 2010 Australian hailstorms and floods (\$60.3 million) and the 2010 New Zealand earthquake (\$50.0 million). The current year attritional loss ratio, adjusting for prior year attritional reinstatement premiums was down to 52.1% in 2011 from 56.2% in 2010, primarily due to a shift in the mix of business towards property, catastrophe and excess of loss business, which generally carries a lower loss ratio. Prior years' attritional losses decreased by \$66.3 million (5.1 points) due to favorable development on non-catastrophe property business in Singapore and other international markets.

**Segment Expenses.** Commission and brokerage decreased 3.5% to \$300.1 million in 2012 compared to \$311.0 million in 2011. This is consistent with the reduction in earned premium and a shift in the mix of business towards property catastrophe and excess of loss business which have lower commission rates. Segment other underwriting expenses increased to \$29.3 million in 2012 compared to \$27.3 million for the same period in 2011. The increase relates to higher personnel benefit costs.

Commission and brokerage increased 7.8% to \$311.0 million in 2011 compared to \$288.4 million in 2010. This variance was principally due to an increase in premiums earned. Segment other underwriting expenses decreased slightly to \$27.3 million in 2011 compared to \$27.6 million in 2010.

### Bermuda.

The following table presents the underwriting results and ratios for the Bermuda segment for the periods indicated.

(Dollars in millions)	Years Ended December 31,			2012/2011		2011/2010	
	2012	2011	2010	Variance	% Change	Variance	% Change
Gross written premiums	\$ 734.4	\$ 725.3	\$ 733.0	\$ 9.1	1.3%	\$ (7.7)	-1.1%
Net written premiums	733.8	725.5	733.0	8.2	1.1%	(7.5)	-1.0%
Premiums earned	\$ 680.9	\$ 723.0	\$ 738.4	\$ (42.0)	-5.8%	\$ (15.5)	-2.1%
Incurred losses and LAE	408.2	613.9	457.9	(205.6)	-33.5%	155.9	34.0%
Commission and brokerage	184.4	174.0	171.1	10.3	5.9%	2.9	1.7%
Other underwriting expenses	30.6	26.3	26.4	4.3	16.4%	(0.1)	-0.5%
Underwriting gain (loss)	\$ 57.8	\$ (91.2)	\$ 83.0	\$ 149.0	-163.3%	\$ (174.2)	-209.9%
					Point Chg		Point Chg
Loss ratio	60.0%	84.9%	62.0%		(24.9)		22.9
Commission and brokerage ratio	27.1%	24.1%	23.2%		3.0		0.9
Other underwriting expense ratio	4.4%	3.6%	3.6%		0.8		-
Combined ratio	91.5%	112.6%	88.8%		(21.1)		23.8

(Some amounts may not reconcile due to rounding.)

**Premiums.** Gross written premiums increased 1.3% to \$734.4 million in 2012 compared to \$725.3 million in 2011, primarily due to continued growth of new business and increased premium on existing business written in our Bermuda office, partially offset by lower premiums from our European operations due to combined competitive conditions and a negative \$14.7 million impact from movement in foreign exchange rates. Net written premiums increased 1.1% to \$733.8 million in 2012 compared to \$725.5 million in 2011, in line with the increase in gross written premiums. Premiums earned decreased 5.8% to \$680.9 million in 2012 compared to \$723.0 million in 2011. The change in premiums earned relative to net written premiums is the result of timing; premiums are earned ratably over the coverage period whereas written premiums are recorded at the initiation of the coverage period.

Gross written premiums decreased 1.1% to \$725.3 million in 2011 compared to \$733.0 million in 2010, primarily due to reduced participations and non-renewal of U.K. property business, where rate increases were not achieved, partially offset by an increase of \$11.3 million in reinstatement premiums due to higher catastrophe loss activity in the current period and a \$16.0 million favorable foreign exchange impact. Net written premiums decreased 1.0% to \$725.5 million for in 2011 compared to \$733.0 million in 2010, in line with the decrease in gross written premiums. Premiums earned decreased 2.1% to \$723.0 million in 2011 compared to \$738.4 million in 2010. The change in premiums earned is in line with the decline in net written premiums.

Incurred Losses and LAE. The following table presents the incurred losses and LAE for the Bermuda segment for the periods indicated.

(Dollars in millions)	Years Ended December 31,

Total segment	<u>\$ 70.3</u>	<u>11.3 pts</u>	<u>\$ 85.5</u>	<u>11.6 pts</u>	<u>\$ 156.0</u>	<u>22.9 pts</u>

(Some amounts may not reconcile due to rounding.)

Incurred losses and LAE decreased by 33.5% to \$408.2 million in 2012 compared to \$613.9 million in 2011. The decrease was principally due to a \$176.5 million (24.3 points) decrease in current year catastrophe losses. The \$14.1 million of current year catastrophe losses for 2012 related primarily to Superstorm Sandy (\$14.0 million). The \$190.6 million of 2011 current year catastrophe losses related primarily to the Japanese earthquake and tsunami (\$88.0 million), the 2011 New Zealand earthquake (\$65.8 million) and the Thailand floods (\$28.0 million). The current year attritional losses also decreased by \$17.1 million (1.2 points), which is primarily due to the decline in premiums earned.

Incurred losses and LAE increased 34.0% to \$613.9 million in 2011 compared to \$457.9 million in 2010. The increase was principally due to a \$96.1 million (13.6 points) increase in current year catastrophe losses and the absence of favorable reserve development in 2011 as occurred in 2010. The \$94.5 million of current year losses for 2010 related primarily to the Chile earthquake (\$64.6 million) and the New Zealand earthquake (\$25.0 million).

Segment Expenses. Commission and brokerage increased by 5.9% to \$184.4 million in 2012 compared to \$174.0 million in 2011 reflecting higher contingent commissions in 2012. Segment other underwriting expenses increased to \$30.6 million in 2012 compared to \$26.3 million for the same period in 2011. The increases are primarily attributable to higher personnel benefit costs.

Commission and brokerage increased 1.7% to \$174.0 million in 2011 compared to \$171.1 million in 2010. The commission variance differs from the premiums earned variance primarily due to changes in the mix of business. Segment other underwriting expenses decreased slightly to \$26.3 million in 2011 compared to \$26.4 million in 2010.

## Insurance.

The following table presents the underwriting results and ratios for the Insurance segment for the periods indicated.

(Dollars in millions)	Years Ended December 31,			2012/2011		2011/2010	
	2012	2011	2010	Variance	% Change	Variance	% Change
Gross written premiums	\$ 1,073.1	\$ 975.6	\$ 865.4	\$ 97.5	10.0%	\$ 110.3	12.7%
Net written premiums	852.1	820.5	620.3	31.6	3.9%	200.2	32.3%
Premiums earned	\$ 852.4	\$ 821.2	\$ 641.1	\$ 31.3	3.8%	\$ 180.1	28.1%
Incurred losses and LAE	700.3	705.9	536.8	(5.6)	-0.8%	169.2	31.5%
Commission and brokerage	117.6	137.7	120.8	(20.1)	-14.6%	16.9	14.0%
Other underwriting expenses	103.0	89.5	69.7	13.5	15.1%	19.8	28.5%
Underwriting gain (loss)	\$ (68.5)	\$ (111.9)	\$ (86.1)	\$ 43.5	-38.8%	\$ (25.8)	30.0%
					Point Chg		Point Chg
Loss ratio	82.2%	86.0%	83.7%		(3.8)		2.3
Commission and brokerage ratio	13.8%	16.8%	18.8%		(3.0)		(2.0)

(Some amounts may not reconcile due to rounding.)

**Premiums.** Gross written premiums increased by 10.0% to \$1,073.1 million in 2012 compared to \$975.6 million in 2011. This increase was primarily driven by crop and primary A&H medical stop loss business, partially offset by the termination and runoff of several large casualty programs. Net written premiums increased 3.9% to \$852.1 million in 2012 compared to \$820.5 million in 2011. The lower increase in net written premiums in comparison to gross written premiums is primarily attributable to a higher level of reinsurance employed for the crop business. Premiums earned increased 3.8% to \$852.4 million in 2012 compared to \$821.2 million in 2011. The change in premiums earned is relatively consistent with the increase in net written premiums.

Gross written premiums increased by 12.7% to \$975.6 million in 2011 compared to \$865.4 million in 2010. This was due to strategic portfolio changes with growth in short-tail business, primarily driven by the acquisition of Heartland, which provided \$169.6 million of new crop insurance premium in 2011 and \$54.0 million growth in A&H primary business, partially offset by the reduction of a large casualty program. Net written premiums increased 32.3% to \$820.5 million in 2011 compared to \$620.3 million for the same period in 2010 due to higher gross premiums and reduced levels of ceded reinsurance, primarily due to the reduction of the large casualty program. Premiums earned increased 28.1% to \$821.2 million in 2011 compared to \$641.1 million in 2010. The change in premiums earned is relatively consistent with the increase in net written premiums.

Incurred Losses and LAE. The following table presents the incurred losses and LAE for the Insurance segment for the periods indicated.

(Dollars in millions)	Years Ended December 31,					
	Current Year	Ratio %/ Pt Change	Prior Years	Ratio %/ Pt Change	Total Incurred	Ratio %/ Pt Change
<u>2012</u>

(Some amounts may not reconcile due to rounding.)

Incurred losses and LAE decreased by 0.8% to \$700.3 million in 2012 compared to \$705.9 million in 2011. This was primarily due to a decrease of \$9.5 million (4.3 points) in attritional losses resulting primarily from lower prior years' losses in 2012 resulting from development on excess casualty and California workers' compensation reserves, as well as a shift in the mix of business towards shorter-tail lines of business. This decrease was partially offset by a \$4.2 million increase in current year catastrophe losses due primarily to Superstorm Sandy (\$5.5 million).

Incurred losses and LAE increased by \$169.2 million, or 31.5%, to \$705.9 million in 2011 compared to \$536.8 million in 2010. This was primarily due to an increase of \$141.4 million in current year attritional losses driven by an increase in premiums earned and an increase in prior years' losses of \$25.2 million (1.8 points) attributable to development on excess casualty and California workers compensation reserves.

Segment Expenses Commission and brokerage decreased by 14.6% to \$117.6 million in 2012 compared to \$137.7 million in 2011, driven by growth in direct distribution business, which has lower acquisition costs. Segment other underwriting expenses increased to \$103.0 million in 2012 compared to \$89.5 million for the same period in 2011. These increases are primarily the result of increased personnel benefit costs.

Commission and brokerage increased by 14.0% to \$137.7 million in 2011 compared to \$120.8 million in 2010. This increase was primarily the result of an increase in net premiums earned; however, due to changes in distribution and the mix of business, the commission ratio declined 2.0 points, year over year. Segment other underwriting expenses increased to \$89.5 million in 2011 compared to \$69.7 million for the same period in 2010. This increase was primarily due to the expenses of the newly acquired Heartland.

## Critical Accounting Policies

The following is a summary of the critical accounting policies related to accounting estimates that (1) require management to make assumptions about highly uncertain matters and (2) could materially impact the consolidated financial statements if management made different assumptions.

Loss and LAE Reserves. Our most critical accounting policy is the determination of our loss and LAE reserves. We maintain reserves equal to our estimated ultimate liability for losses and LAE for reported and unreported claims for our insurance and reinsurance businesses. Because reserves are based on estimates of ultimate losses and LAE by underwriting or accident year, we use a variety of statistical and actuarial techniques to monitor reserve adequacy over time, evaluate new information as it becomes known and adjust reserves whenever an adjustment appears warranted. We consider many factors when setting reserves including: (1) our exposure base and projected ultimate premiums earned; (2) our expected loss ratios by product and class of business, which are developed collaboratively by underwriters and actuaries; (3) actuarial methodologies which analyze our loss reporting and payment experience, reports from ceding companies and historical trends, such as reserving patterns, loss payments and product mix; (4) current legal interpretations of coverage and liability; (5) economic conditions; and (6) uncertainties discussed below regarding our liability for A&E claims. Our insurance and reinsurance loss and LAE reserves represent our best estimate of our ultimate liability. Actual losses and LAE ultimately paid may deviate, perhaps substantially, from such reserves. Our net income (loss) will be impacted in a period in which the change in estimated ultimate losses and LAE is recorded. See also ITEM 8, "Financial Statements and Supplementary Data" - Note 1 of Notes to the Consolidated Financial Statements.

It is more difficult to accurately estimate loss reserves for reinsurance liabilities than for insurance liabilities. At December 31, 2012, we had reinsurance reserves of \$7,633.8 million and insurance loss reserves of \$2,435.3 million, of which \$356.3 million and \$86.5 million, respectively, were loss reserves for A&E liabilities. A detailed discussion of additional considerations related to A&E exposures follows later in this section.

The detailed data required to evaluate ultimate losses for our insurance business is accumulated from our underwriting and claim systems. Reserving for reinsurance requires evaluation of loss information received from ceding companies. Ceding companies report losses to us in many forms dependent on the type of contract and the agreed or contractual reporting requirements. Generally, proportional/quota share contracts require the submission of a monthly/quarterly account, which includes premium and loss activity for the period with corresponding reserves as established by the ceding company. This information is recorded into our records. For certain proportional contracts, we may require a detailed loss report for claims that exceed a certain dollar threshold or relate to a particular type of loss. Excess of loss and facultative contracts generally require individual loss reporting with precautionary notices provided when a loss reaches a significant percentage of the attachment point of the contract or when certain causes of loss or types of injury occur. Our experienced claims staff handles individual loss reports and supporting claim information. Based on our evaluation of a claim, we may establish additional case reserves (ACRs) in addition to the case reserves reported by the ceding company. To ensure ceding companies are submitting required and accurate data, the Underwriting, Claim, Reinsurance Accounting and Internal Audit departments of the Company perform various reviews of our ceding companies, particularly larger ceding companies, including on-site audits.

We sort both our reinsurance and insurance reserves into exposure groupings for actuarial analysis. We assign our business to exposure groupings so that the underlying exposures have reasonably homogeneous loss development characteristics and are large enough to facilitate credible estimation of ultimate losses. We periodically review our exposure groupings and we may change our groupings over time as our business changes. We currently use over 200 exposure groupings to develop our reserve estimates. One of the key selection characteristics for the exposure groupings is the historical duration of the claims settlement process. Business in which claims are reported and settled relatively quickly are commonly referred to as short tail lines, principally property lines. On the other hand, casualty claims tend to take longer to be reported and settled and casualty lines are generally referred to as long tail lines. Our estimates of ultimate losses for shorter tail lines, with the exception of loss estimates for large catastrophic events, generally exhibit less volatility than those for the longer tail lines.

We use similar actuarial methodologies, such as expected loss ratio, chain ladder reserving methods and Borhuetter Ferguson, supplemented by judgment where appropriate, to estimate our ultimate losses and LAE for each exposure group. Although we use similar actuarial methodologies for both short tail and long tail lines, the faster reporting of experience for the short tail lines allows us to have greater confidence in our estimates of ultimate losses for short tail lines at an earlier stage than for long tail lines. As a result, we utilize, as well, exposure-based methods to estimate our ultimate losses for longer tail lines, especially for immature accident years. For both short and long tail lines, we supplement these general approaches with analytically based judgments. We cannot estimate losses from widespread catastrophic events, such as hurricanes and earthquakes, using traditional actuarial methods. We estimate losses for these types of events based on information derived from catastrophe models, quantitative and qualitative exposure analyses, reports and communications from ceding companies and development patterns for historically similar events. Due to the inherent uncertainty in estimating such losses, these estimates are subject to variability, which increases with the severity and complexity of the underlying event.

Our key actuarial assumptions contain no explicit provisions for reserve uncertainty nor do we supplement the actuarially determined reserves for uncertainty.

Our carried reserves at each reporting date are our best estimate of ultimate unpaid losses and LAE at that date. We complete detailed reserve studies for each exposure group annually for our reinsurance and insurance operations. The completed annual reinsurance reserve studies are “rolled forward” for each accounting period until the subsequent reserve study is completed. Analyzing the roll-forward process involves comparing actual reported losses to expected losses based on the most recent reserve study. We analyze significant variances between actual and expected losses and post adjustments to our reserves as warranted.

Given the inherent variability in our loss reserves, we have developed an estimated range of possible gross reserve levels. A table of ranges by segment, accompanied by commentary on potential and historical variability, is included in “Financial Condition - Loss and LAE Reserves”. The ranges are statistically developed using the exposure groups used in the reserve estimation process and aggregated to the segment level. For each exposure group, our actuaries calculate a range for each accident year based principally on two variables. The first is the historical changes in losses and LAE incurred but not reported (“IBNR”) for each accident year over time; the second is volatility of each accident year’s held reserves related to estimated ultimate losses, also over time. Both are measured at various ages from the end of the accident year through the final payout of the year’s losses. Ranges are developed for the exposure groups using statistical methods to adjust for diversification; the ranges for the exposure groups are aggregated to the segment level, likewise, with an adjustment for diversification. Our estimates of our reserve variability may not be comparable to those of other companies because there are no consistently applied actuarial or accounting standards governing such presentations. Our recorded reserves reflect our best point estimate of our liabilities and our actuarial methodologies focus on developing such point estimates. We calculate the ranges subsequently, based on the historical variability of such reserves.

Asbestos and Environmental Exposures. We continue to receive claims under expired insurance and reinsurance contracts asserting injuries and/or damages relating to or resulting from environmental pollution and hazardous substances, including asbestos. Environmental claims typically assert liability for (a) the mitigation or remediation of environmental contamination or (b) bodily injury or property damage caused by the release of hazardous substances into the land, air or water. Asbestos claims typically assert liability for bodily injury from exposure to asbestos or for property damage resulting from asbestos or products containing asbestos.

Our reserves include an estimate of our ultimate liability for A&E claims. Our A&E liabilities emanate from Mt. McKinley’s direct insurance business and Everest Re’s assumed reinsurance business. There are significant uncertainties surrounding our estimates of our potential losses from A&E claims. Among the uncertainties are: (a) potentially long waiting periods between exposure and manifestation of any bodily injury or property damage; (b) difficulty in identifying sources of asbestos or environmental contamination; (c) difficulty in properly allocating responsibility and/or liability for asbestos or environmental damage; (d) changes in underlying laws and judicial interpretation of those laws; (e) the potential for an asbestos or environmental claim to involve many insurance providers over many policy periods; (f) questions concerning

interpretation and application of insurance and reinsurance coverage; and (g) uncertainty regarding the number and identity of insureds with potential asbestos or environmental exposure.

With respect to asbestos claims in particular, several additional factors have emerged in recent years that further compound the difficulty in estimating our liability. These developments include: (a) a changing mix of claim types represented in new filings, with the relative percentage of claims by individuals with no functional impairment first increasing then decreasing over the past several years; (b) the growth in the number of claims where coverage is sought under the general liability portion of insurance policies rather than the product liability portion; (c) an increase in settlement values being paid to asbestos claimants, especially those with cancer or functional impairment; (d) the slow development of asbestos bankruptcy cases, as a result of which many of the critical legal issues arising in those cases are still unresolved at the appellate level; (e) measures adopted by specific courts to ameliorate the worst procedural abuses; (f) legislation in some states to address asbestos litigation issues; and (g) the potential that other states may adopt legislation on asbestos litigation. Anecdotal evidence suggests that new claims filing rates have decreased, that new filings of asbestos-driven bankruptcies have decreased and that various procedural and legislative reforms are beginning to diminish the potential ultimate liability for asbestos losses; however, some studies indicate that thus far aggregate payments for asbestos claims have not decreased.

We believe that these uncertainties continue to render reserves for A&E, and particularly asbestos losses, significantly less subject to traditional actuarial analysis than reserves for other types of losses. We establish reserves to the extent that, in the judgment of management, the facts and prevailing law reflect an exposure for us or our ceding companies.

We have direct relationships with Mt. McKinley policyholders and we attempt to uphold our contractual rights and assert valid defenses to coverage where appropriate. The uncertainties inherent in asbestos coverage and bankruptcy litigations have provided us the opportunity to engage in settlement negotiations with a number of policyholders who have potentially significant asbestos liabilities. Those discussions are aimed at achieving reasonable negotiated settlements that limit Mt. McKinley's liability to a given policyholder to a sum certain. Because of the risks and uncertainties inherent in litigation, we cannot be certain that this approach will lead to a negotiated settlement in the range expected by us in each or every instance. Between 2004 and 2012, we concluded settlements or reached agreement in principle with 23 of our high profile policyholders. We continue the approach of attempting to negotiate with such policyholders that may have significant asbestos liabilities, in part because their exposures have developed to the point where we and the policyholder have sufficient information to be motivated to settle. We believe that this active approach will ultimately result in a more cost-effective liquidation of Mt. McKinley's liabilities than a passive approach, although it may also introduce additional variability in Mt. McKinley's losses and cash flows as reserves are adjusted to reflect the developments in litigation, negotiations and, ultimately, potential settlements.

There is little potential for similar settlements of our reinsurance asbestos claims where we have no direct relationships with the insureds. Our ceding companies have the direct obligation to insureds and are responsible for their own claim settlements. They are not consistently prompt in developing and providing claim settlement information to their reinsurers, which can introduce inconsistencies and significant delays in the reporting of asbestos claims/exposures to reinsurers, including us. These delays not only extend the timing of reinsurance claim settlements, but also limit the available information from which reinsurers, including us, estimate their ultimate exposure. See the discussion below under the heading "Financial Condition - Loss and LAE Reserves".

Due to the uncertainties discussed above, the ultimate losses attributable to A&E, and particularly asbestos, may be subject to more variability than are non-A&E reserves and such variation could have a material adverse effect on our financial condition, results of operations and/or cash flows. See also ITEM 8, "Financial Statements and Supplementary Data" - Notes 1 and 3 of Notes to the Consolidated Financial Statements.

Reinsurance Receivables. We have purchased reinsurance to reduce our exposure to adverse claim experience, large claims and catastrophic loss occurrences. Our ceded reinsurance provides for recovery from reinsurers of a portion of losses and loss expenses under certain circumstances. Such reinsurance does not relieve us of our obligation to our policyholders. In the event our reinsurers are unable to meet their obligations under these agreements or are able to successfully challenge losses ceded by us under the contracts, we will not be able to realize the full value of the reinsurance receivable balance. To minimize exposure from uncollectible reinsurance receivables, we have a reinsurance security committee that evaluates the financial strength of each reinsurer prior to our entering into a reinsurance arrangement. In some cases, we may hold full or partial collateral for the receivable, including letters of credit, trust assets and cash. Additionally, creditworthy foreign reinsurers of business written in the U.S. are generally required to secure their obligations. We have established reserves for uncollectible balances based on our assessment of the collectability of the outstanding balances. As of December 31, 2012 and 2011, the reserve for uncollectible balances was \$21.6 million. Actual uncollectible amounts may vary, perhaps substantially, from such reserves, impacting income (loss) in the period in which the change in reserves is made. See also ITEM 8, “Financial Statements and Supplementary Data” - Note 12 of Notes to the Consolidated Financial Statements and “Financial Condition – Reinsurance Receivables” below.

Premiums Written and Earned. Premiums written by us are earned ratably over the coverage periods of the related insurance and reinsurance contracts. We establish unearned premium reserves to cover the unexpired portion of each contract. Such reserves, for assumed reinsurance, are computed using pro rata methods based on statistical data received from ceding companies. Premiums earned, and the related costs, which have not yet been reported to us, are estimated and accrued. Because of the inherent lag in the reporting of written and earned premiums by our ceding companies, we use standard accepted actuarial methodologies to estimate earned but not reported premium at each financial reporting date. These earned but not reported premiums are combined with reported earned premiums to comprise our total premiums earned for determination of our incurred losses and loss and LAE reserves. Commission expense and incurred losses related to the change in earned but not reported premium are included in current period company and segment financial results. See also ITEM 8, “Financial Statements and Supplementary Data” - Note 1 of Notes to the Consolidated Financial Statements.

The following table displays the estimated components of earned but not reported premiums by segment for the periods indicated.

(Dollars in millions)	At December 31,		
	2012	2011	2010
U.S. Reinsurance	\$ 246.6	\$ 308.2	\$ 340.4
International	211.0	216.8	195.2
Bermuda	194.0	196.9	204.7
Insurance	-	-	2.2
Total	\$ 651.6	\$ 722.0	\$ 742.5

(Some amounts may not reconcile due to rounding.)

Investment Valuation. Our fixed income investments are classified for accounting purposes as available for sale and are carried at market value or fair value in our consolidated balance sheets. Our equity securities are also held as available for sale and are carried at market or fair value. Most securities we own are traded on national exchanges where market values are readily available. Some of our commercial mortgage-backed securities (“CMBS”) are valued using cash flow models and risk-adjusted discount rates. We hold some privately placed securities, less than 0.33% of the portfolio, that are either valued by brokers or an investment advisor. At December 31, 2012 and 2011, our investment portfolio included \$548.9 million and \$515.5 million, respectively, of limited partnership investments whose values are reported pursuant to the equity method of accounting. We carry these investments at values provided by the managements of the limited partnerships and due to inherent reporting lags, the carrying values are based on values with “as of” dates from one month to one quarter prior to our financial statement date.

At December 31, 2012, we had net unrealized gains, net of tax, of \$603.9 million compared to \$449.6 million at December 31, 2011. Gains and losses from market fluctuations for investments held at market value are reflected as comprehensive income (loss) in the consolidated balance sheets. Gains and losses from market fluctuations for investments held at fair value are reflected as net realized capital gains and losses in the consolidated statements of operations and comprehensive income (loss) in accordance with FASB guidance. Market value declines for the fixed income portfolio, which are considered credit other-than-temporary impairments, are reflected in our consolidated statements of operations and comprehensive income (loss), as realized capital losses. We consider many factors when determining whether a market value decline is other-than-temporary, including: (1) we have no intent to sell and, more likely than not, will not be required to sell prior to recovery, (2) the length of time the market value has been below book value, (3) the credit strength of the issuer, (4) the issuer's market sector, (5) the length of time to maturity and (6) for asset-backed securities, changes in prepayments, credit enhancements and underlying default rates. If management's assessments change in the future, we may ultimately record a realized loss after management originally concluded that the decline in value was temporary. See also ITEM 8, "Financial Statements and Supplementary Data" - Note 1 of Notes to the Consolidated Financial Statements.

## FINANCIAL CONDITION

Cash and Invested Assets. Aggregate invested assets, including cash and short-term investments, were \$16,576.2 million at December 31, 2012, an increase of \$778.8 million compared to \$15,797.4 million at December 31, 2011. This increase was primarily the result of \$663.9 million of cash flows from operations, \$161.0 million of unrealized appreciation, \$122.9 million due to fluctuations in foreign currencies, \$118.1 million in fair value re-measurements, \$63.8 million in equity adjustments of our limited partnership investments and \$35.1 million of unsettled securities, partially offset by \$290.0 million paid for share repurchases and \$100.4 million paid out in dividends to shareholders.

Our principal investment objectives are to ensure funds are available to meet our insurance and reinsurance obligations and to maximize after-tax investment income while maintaining a high quality diversified investment portfolio. Considering these objectives, we view our investment portfolio as having two components: 1) the investments needed to satisfy outstanding liabilities (our core fixed maturities portfolio) and 2) investments funded by our shareholders' equity.

For the portion needed to satisfy global outstanding liabilities, we generally invest in taxable and tax-preferenced fixed income securities with an average credit quality of Aa3. For the U.S. portion of this portfolio, our mix of taxable and tax-preferenced investments is adjusted periodically, consistent with our current and projected U.S. operating results, market conditions and our tax position. This global fixed maturity securities portfolio is externally managed by an independent, professional investment manager using portfolio guidelines approved by internal management.

Our global portfolio included \$1,912.2 million of foreign government securities at December 31, 2012, of which \$862.5 million were European sovereign securities. Approximately 51.7%, 19.1%, 6.7% and 5.1% of European sovereign securities represented securities held in the governments of the United Kingdom, France, Austria and the Netherlands, respectively. No other countries represented more than 5% of the European sovereign securities. We held no sovereign securities of Portugal, Italy, Ireland, Greece or Spain at December 31, 2012.

Over the past several years, we have expanded the allocation of our investments funded by shareholders' equity to include: 1) a greater percentage of publicly traded equity securities, 2) emerging market fixed maturities through mutual fund structures, as well as individual holdings, 3) high yield fixed maturities, 4) bank loan securities and 5) private equity limited partnership investments. The objective of this portfolio diversification is to enhance the risk-adjusted total return of the investment portfolio by allocating a prudent portion of the portfolio to higher return asset classes, which are also less subject to changes in value with movements in interest rates. We limit our allocation to these asset classes because of 1) the potential for volatility in their values and 2) the impact of these investments on regulatory and rating agency capital adequacy models. We use investment managers experienced in these markets and adjust our allocation to these investments based upon market conditions. At December 31, 2012, the market value of investments in these investment market sectors, carried at both market and fair value, approximated 63% of shareholders' equity.

The Company's limited partnership investments are comprised of limited partnerships that invest in private equities. Generally, the limited partnerships are reported on a quarter lag. We receive annual audited financial statements for all of the limited partnerships which are prepared using fair value accounting in accordance with FASB guidance. For the quarterly reports, the Company's staff performs reviews of the financial reports for any unusual changes in carrying value. If the Company becomes aware of a significant decline in value during the lag reporting period, the loss will be recorded in the period in which the Company identifies the decline.

The tables below summarize the composition and characteristics of our investment portfolio as of the dates indicated.

(Dollars in millions)	At December 31,			
	2012		2011	
Fixed maturities, market value	\$ 13,141.7	79.3%	\$ 12,293.5	77.8%
Fixed maturities, fair value	41.5	0.2%	113.6	0.7%
Equity securities, market value	143.5	0.9%	448.9	2.9%
Equity securities, fair value	1,255.6	7.6%	1,249.1	7.9%
Short-term investments	860.4	5.2%	685.3	4.4%
Other invested assets	596.6	3.6%	558.2	3.5%
Cash	537.1	3.2%	448.7	2.8%
Total investments and cash	\$ 16,576.2	100.0%	\$ 15,797.4	100.0%

(Some amounts may not reconcile due to rounding.)

	At December 31,	
	2012	2011
Fixed income portfolio duration (years)	3.0	3.0
Fixed income composite credit quality	Aa3	Aa3
Imbedded end of period yield, pre-tax	3.5%	3.9%
Imbedded end of period yield, after-tax	3.0%	3.4%

The following table provides a comparison of our total return by asset class relative to broadly accepted industry benchmarks for the periods indicated.

	2012	2011	2010
Fixed income portfolio total return	4.8%	4.7%	5.3%
Barclay's Capital - U.S. aggregate index	4.2%	7.8%	6.5%
Common equity portfolio total return	13.8%	2.7%	15.4%
S&P 500 index	16.0%	2.1%	15.1%
Other invested asset portfolio total return	16.0%	13.5%	18.7%

The pre-tax equivalent total return for the bond portfolio was approximately 5.0%, 5.1% and 5.7%, respectively, for 2012, 2011 and 2010. The pre-tax equivalent return adjusts the yield on tax-exempt bonds to the fully taxable equivalent.

As indicated above, there is a relatively large variation between the total return on our fixed income portfolio for the year ended December 31, 2011 versus the Barclay's - U.S. aggregate index for the same period. One of the reasons is that the duration of our portfolio is much shorter than the duration of the index. Historically, our duration has been shorter than the index because we align our investment portfolio with our liabilities. In addition, we shortened our duration in anticipation of a reversing trend in interest rate movements. With interest rates continuing to decline in 2011, the index benefited from its longer duration; however, in the longer term, there will be a benefit from a reduced exposure to unrealized market valuation losses on our fixed income portfolio if interest rates rise. Our total return was more comparable to the index in 2012 as interest rates remained fairly steady. The composition of the index is also different from our portfolio as we hold foreign securities to match our foreign liabilities, while the index is comprised of only U.S. securities.

### Reinsurance Receivables.

Reinsurance receivables for both paid and recoverable on unpaid losses totaled \$659.1 million and \$580.3 million at December 31, 2012 and 2011, respectively. At December 31, 2012, \$181.5 million, or 27.5%, was receivable from C.V. Starr; \$79.9 million, or 12.1%, was receivable from FCIC; \$65.2 million, or 9.9%, was receivable from XL; \$58.0 million, or 8.8%, was receivable from Berkley; and \$54.1 million, or 8.2%, was receivable from Transatlantic. The receivable from C.V. Starr is fully collateralized by a trust agreement. No other retrocessionaire accounted for more than 5% of our receivables.

Loss and LAE Reserves. Gross loss and LAE reserves totaled \$10,069.1 million at December 31, 2012 and \$10,123.2 million at December 31, 2011.

The following tables summarize gross outstanding loss and LAE reserves by segment, classified by case reserves and IBNR reserves, for the periods indicated.

(Dollars in millions)	At December 31, 2012			
	Case	IBNR	Total	% of
	Reserves	Reserves	Reserves	Total
U.S. Reinsurance	\$ 1,538.6	\$ 2,082.6	\$ 3,621.2	36.0%
International	1,121.5	695.3	1,816.8	18.0%
Bermuda	826.1	1,135.9	1,962.0	19.5%
Insurance	1,098.1	1,128.1	2,226.2	22.1%
Total excluding A&E	4,584.3	5,041.9	9,626.2	95.6%
A&E	265.8	177.1	442.9	4.4%
Total including A&E	\$ 4,850.1	\$ 5,219.0	\$ 10,069.1	100.0%

(Some amounts may not reconcile due to rounding.)

(Dollars in millions)	At December 31, 2011

Total including A&E	\$ 4,879.6	\$ 5,243.6	\$ 10,123.2	100.0%

(Some amounts may not reconcile due to rounding.)

Changes in premiums earned and business mix, reserve re-estimations, catastrophe losses and changes in catastrophe loss reserves and claim settlement activity all impact loss and LAE reserves by segment and in total.

Our loss and LAE reserves represent our best estimate of our ultimate liability for unpaid claims. We continuously re-evaluate our reserves, including re-estimates of prior period reserves, taking into consideration all available information and, in particular, newly reported loss and claim experience. Changes in reserves resulting from such re-evaluations are reflected in incurred losses in the period when the re-evaluation is made. Our analytical methods and processes operate at multiple levels including individual contracts, groupings of like contracts, classes and lines of business, internal business units, segments, legal entities, and in the aggregate. In order to set appropriate reserves, we make qualitative and quantitative analyses and judgments at these various levels. Additionally, the attribution of reserves, changes in reserves and incurred losses among accident years requires qualitative and quantitative adjustments and allocations at these various levels. We utilize actuarial science, business expertise and management judgment in a manner intended to ensure the accuracy and consistency of our reserving practices. Nevertheless, our reserves are estimates, which are subject to variation, which may be significant.

There can be no assurance that reserves for, and losses from, claim obligations will not increase in the future, possibly by a material amount. However, we believe that our existing reserves and reserving methodologies lessen the probability that any such increase would have a material adverse effect on our financial condition, results of operations or cash flows. In this context, we note that over the past 10 years, our calendar year operations have been affected by effects from prior period reserve re-estimates, ranging from a favorable \$30.9 million in 2010, representing 0.4% of the net prior period reserves for the year in which the adjustment was made, to an unfavorable \$249.4 million in 2004, representing 4.8% of the net prior period reserves for the year in which the adjustment was made.

We have included ranges for loss reserve estimates determined by our actuaries, which have been developed through a combination of objective and subjective criteria. Our presentation of this information may not be directly comparable to similar presentations of other companies as there are no consistently applied actuarial or accounting standards governing such presentations. Our recorded reserves are an aggregation of our best point estimates for approximately 200 reserve groups and reflect our best point estimate of our liabilities. Our actuarial methodologies develop point estimates rather than ranges and the ranges are developed subsequently based upon historical and prospective variability measures.

The following table below represents the reserve levels and ranges for each of our business segments for the period indicated.

	Outstanding Reserves and Ranges By Segment (1)				
	At December 31, 2012				
	As Reported	Low Range % (2)	Low Range (2)	High Range % (2)	High Range (2)
(Dollars in millions)					
Gross Reserves By Segment					
U.S. Reinsurance	\$ 3,621.2	-13.0%	\$ 3,151.8	13.0%	\$ 4,090.7
International	1,816.8	-9.3%	1,647.1	9.3%	1,986.6
Bermuda	1,962.0	-9.9%	1,768.7	9.9%	2,155.3
Insurance	2,226.2	-17.9%	1,827.8	17.9%	2,624.5
Total Gross Reserves (excluding A&E)	9,626.2	-9.3%	8,728.6	9.3%	10,523.9
A&E (All Segments)	442.9	-13.7%	382.2	13.7%	503.5
Total Gross Reserves	\$ 10,069.1	-9.2%	9,140.5	9.2%	10,997.6

(Some amounts may not reconcile due to rounding.)

- (1) There can be no assurance that reserves will not ultimately exceed the indicated ranges requiring additional income (loss) statement expense.
- (2) Although totals are displayed for both the low and high range amounts, it should be noted that statistically the range of the total is not equal to the sum of the ranges of the segments.

Depending on the specific segment, the range derived for the loss reserves, excluding reserves for A&E exposures, ranges from minus 9.3% to minus 17.9% for the low range and from plus 9.3% to plus 17.9% for the high range. Both the higher and lower ranges are associated with the Insurance segment. The size of the range is dependent upon the level of confidence associated with the outcome. Within each range, our best estimate of loss reserves is based upon the point estimate derived by our actuaries in detailed reserve studies. Such ranges are necessarily subjective due to the lack of generally accepted actuarial standards with respect to their development. For the above presentation, we have assumed what we believe is a reasonable confidence level but note that there can be no assurance that our claim obligations will not vary outside of these ranges.

Additional losses, including those relating to latent injuries, and other exposures, which are as yet unrecognized, the type or magnitude of which cannot be foreseen by us or the reinsurance and insurance industry generally, may emerge in the future. Such future emergence, to the extent not covered by existing retrocessional contracts, could have material adverse effects on our future financial condition, results of operations and cash flows.

We have exposure to insured A&E losses through our Mt. McKinley operation and reinsured A&E losses and through Everest Re. In each case, our management and analyses of our exposures take into account a number of features of our business that differentiate our exposures from many other insurers and reinsurers that have significant A&E exposures.

Mt. McKinley began writing small amounts of A&E exposed insurance in 1975 and increased the volume of its writings in 1978. These writings ceased in 1984, giving Mt. McKinley an approximate 10-year window of potential A&E exposure, which is appreciably shorter than is the case for many companies with significant A&E exposure. Additionally, due to changes in and standardization of policy forms, it is rare for policies in the 1970s and 1980s to have been issued without aggregate limits on the product liability coverage. Policies issued in earlier decades were generally more likely to lack aggregate limits.

The vast majority of Mt. McKinley's A&E exposed insurance policies are excess casualty policies, with aggregate coverage limits. Mt. McKinley's attachment points vary but generally are excess of millions, often tens of millions, of dollars of underlying coverage. The excess nature of most of Mt. McKinley's policies also offers insulation against "non-product" claims (for example, claims arising under general liability coverage). Although under some circumstances an excess policy could be exposed to non-product claims, such claims generally pose more of a risk to primary policies because non-product claims are generally less likely to aggregate since each non-product claim is a separate loss; whereas for product claims, all claims related to a given product "aggregate" as one loss. Environmental claims arise under general liability coverage, and generally do not aggregate. Thus, these claims tend to create exposure for primary policies to a greater extent than excess policies.

Everest Re was formed in 1973 but was not fully engaged in underwriting casualty business, under which A&E exposures generally arise, until 1974, and it effectively eliminated A&E exposures beginning in 1984 through contract exclusions. Therefore, Everest Re has an approximate 11-year window of A&E exposure, much shorter than that of many long established reinsurance companies. In the earlier years of its existence, Everest Re mainly wrote property business, which generally is not exposed to asbestos claims. Everest Re reinsured both primary and excess policies. However, its claim experience indicates that the majority of its exposure was on excess policies, similar to those directly written by Mt. McKinley.

Asbestos and Environmental Exposures. A&E exposures represent a separate exposure group for monitoring and evaluating reserve adequacy. The following table summarizes incurred losses and outstanding loss reserves with respect to A&E reserves on both a gross and net of retrocessions basis for the periods indicated.

(Dollars in millions)	At December 31,		
	2012	2011	2010
<b>Gross Basis:</b>			
Beginning of period reserves	\$ 499.9	\$ 554.8	\$ 638.7
Incurring losses and LAE:

Paid losses	(54.6)	(53.5)	(80.2)
End of period reserves	\$ 425.7	\$ 480.2	\$ 532.9

(Some amounts may not reconcile due to rounding.)

At December 31, 2012, the gross reserves for A&E losses were comprised of \$138.4 million representing case reserves reported by ceding companies, \$90.6 million representing additional case reserves established by us on assumed reinsurance claims, \$36.7 million representing case reserves established by us on direct excess insurance claims, including Mt. McKinley, and \$177.1 million representing IBNR reserves.

With respect to asbestos only, at December 31, 2012, we had gross asbestos loss reserves of \$422.8 million, or 95.5%, of total A&E reserves, of which \$339.6 million was for assumed business and \$83.2 million was for direct business.

The following tables summarize reserve and claim activity on a gross and net of ceded reinsurance basis for our reinsurance and direct asbestos exposures.

Asbestos - Reinsurance

(Dollars in millions)

End of period reserves	\$ 78.5	\$ 91.7	\$ 97.9

(Some amounts may not reconcile due to rounding.)

Ultimate loss projections for A&E liabilities cannot be accomplished using standard actuarial techniques. We believe that our A&E reserves represent our best estimate of the ultimate liability; however, there can be no assurance that ultimate loss payments will not exceed such reserves, perhaps by a significant amount.

Industry analysts use the “survival ratio” to compare the A&E reserves among companies with such liabilities. The survival ratio is typically calculated by dividing a company’s current net reserves by the three year average of annual paid losses. Hence, the survival ratio equals the number of years that it would take to exhaust the current reserves if future loss payments were to continue at historical levels. Using this measurement, our net three year asbestos survival ratio was 7.1 years at December 31, 2012. These metrics can be skewed by individual large settlements occurring in the prior three years and therefore, may not be indicative of the timing of future payments.

Because the survival ratio was developed as a comparative measure of reserve strength and does not indicate absolute reserve adequacy, we consider, but do not rely on, the survival ratio when evaluating our reserves. In particular, we note that year to year loss payment variability can be material. This is due, in part, to our orientation to negotiated settlements, particularly on our Mt. McKinley exposures, which significantly reduces the credibility and utility of this measure as an analytical tool. In 2012, we made asbestos net claim payments of \$2.4 million to Mt McKinley high profile claimants where the claim was either closed or a settlement had been reached. Such payments, which are non-repetitive, distort downward our three year survival ratio. Adjusting for such settlements, recognizing that total settlements are generally considered fully reserved to an agreed settlement, we consider that our adjusted asbestos survival ratio for net unsettled claims is 8.1 years, which is better than prevailing industry norms.

Shareholders’ Equity. Our shareholders’ equity increased to \$6,733.5 million as of December 31, 2012 from \$6,071.4 million as of December 31, 2011. This increase was the result of \$829.0 million of net income, \$154.3 million of unrealized appreciation on investments, net of tax, share-based compensation transactions of \$53.5 million, \$22.7 million of net foreign currency translation adjustments, partially offset by repurchases of 3.0 million common shares for \$290.0 million, \$100.4 million of shareholder dividends and \$7.0 million of net benefit plan obligation adjustments.

Our shareholders’ equity decreased to \$6,071.4 million as of December 31, 2011 from \$6,283.5 million as of December 31, 2010. This decrease was the result of \$103.8 million of shareholder dividends, repurchases of 1.1 million common shares for \$92.5 million, \$80.5 million of net loss, \$29.5 million of net benefit plan obligation adjustments and \$16.0 million of net foreign currency translation adjustments, partially offset by \$80.1 million of unrealized appreciation on investments, net of tax, and share-based compensation transactions of \$30.0 million.

## **LIQUIDITY AND CAPITAL RESOURCES**

Capital. Our business operations are in part dependent on our financial strength and financial strength ratings, and the market’s perception of our financial strength, as measured by shareholders’ equity, which was \$6,733.5 million at December 31, 2012 and \$6,071.4 million at December 31, 2011. On March 13, 2009, Everest Re and Everest National, wholly-owned indirect subsidiaries of the Company, received notification of a one level ratings downgrade by Standard & Poor’s. On April 7, 2010, Standard & Poor’s upgraded the Company’s debt ratings one level. On January 24, 2012, Moody’s affirmed the ratings of the Company’s operating subsidiaries but changed the outlook on the ratings from stable to negative reflecting their opinion of the potential direction of the ratings over the medium term (12 to 18 months). Management will continue to work with Moody’s over this time to address their concerns but it is not possible to predict the potential outcome. Management does not believe that a one notch downgrade would have a material adverse affect on the Company’s business. We continue to possess significant financial flexibility and access to the debt and equity markets as a result of our perceived financial strength, as evidenced by the financial strength ratings as assigned by independent rating agencies.

From time to time, we have used open market share repurchases to adjust our capital position and enhance long term expected returns to our shareholders. On July 21, 2008, our existing authorization to purchase up to 5 million of our shares was amended to authorize the purchase of up to 10 million shares. On February 24, 2010, our existing authorization to purchase up to 10 million of our shares was amended to authorize the purchase of up to 15 million shares. On February 22, 2012, our existing authorization to purchase up to 15 million of our shares was amended to authorize the purchase of up to 20 million shares. As of December 31, 2012, we had repurchased 15.7 million shares under this authorization.

On October 14, 2011, we renewed our shelf registration statement on Form S-3ASR with the Securities and Exchange Commission (“SEC”), as a Well Known Seasoned Issuer. This shelf registration statement can be used by Group to register common shares, preferred shares, debt securities, warrants, share purchase contracts and share purchase units; by Holdings to register debt securities and by Everest Re Capital Trust III (“Capital Trust III”) to register trust preferred securities.

Liquidity. Our principal investment objectives are to ensure funds are available to meet our insurance and reinsurance obligations and to maximize after-tax investment income while maintaining a high quality diversified investment portfolio. Considering these objectives, we view our investment portfolio as having two components: 1) the investments needed to satisfy outstanding liabilities (our core fixed maturities portfolio) and 2) investments funded by our shareholders’ equity.

For the portion needed to satisfy global outstanding liabilities, we generally invest in taxable and tax-preferenced fixed income securities with an average credit quality of Aa3. For the U.S. portion of this portfolio, our mix of taxable and tax-preferenced investments is adjusted periodically, consistent with our current and projected U.S. operating results, market conditions and our tax position. This global fixed maturity securities portfolio is externally managed by an independent, professional investment manager using portfolio guidelines approved by internal management.

Over the past several years, we have expanded the allocation of our investments funded by shareholders’ equity to include: 1) a greater percentage of publicly traded equity securities, 2) emerging market fixed maturities through mutual fund structures as well as individual holdings, 3) high yield fixed maturities, 4) bank loan securities and 5) private equity limited partnership investments. The objective of this portfolio diversification is to enhance the risk-adjusted total return of the investment portfolio by allocating a prudent portion of the portfolio to higher return asset classes, which are also less subject to changes in value with movements in interest rates. We limit our allocation to these asset classes because of 1) the potential for volatility in their values and 2) the impact of these investments on regulatory and rating agency capital adequacy models. We use investment managers experienced in these markets and adjust our allocation to these investments based upon market conditions. At December 31, 2012, the market value of investments in these investment market sectors, carried at both market and fair value, approximated 63% of shareholders’ equity.

Our liquidity requirements are generally met from positive cash flow from operations. Positive cash flow results from reinsurance and insurance premiums being collected prior to disbursements for claims, which disbursements generally take place over an extended period after the collection of premiums, sometimes a period of many years. Collected premiums are generally invested, prior to their use in such disbursements, and investment income provides additional funding for loss payments. Our net cash flows from operating activities were \$663.9 million, \$659.5 million and \$918.5 million for the years ended December 31, 2012, 2011 and 2010, respectively. Additionally, these cash flows reflected a net tax payment of \$59.8 million and net tax refunds of \$44.5 million and \$31.0 million for the years ended December 31, 2012, 2011 and 2010, respectively; net catastrophe loss payments of \$551.3 million, \$559.2 million and \$410.8 million for the years ended December 31, 2012, 2011 and 2010, respectively; and net A&E payments of \$54.6 million, \$53.5 million and \$80.2 million for the years ended December 31, 2012, 2011 and 2010, respectively.

If disbursements for claims and benefits, policy acquisition costs and other operating expenses were to exceed premium inflows, cash flow from reinsurance and insurance operations would be negative. The effect on cash flow from insurance operations would be partially offset by cash flow from investment income. Additionally, cash inflows from investment maturities and dispositions, both short-term investments and longer term maturities are available to supplement other operating cash flows.

As the timing of payments for claims and benefits cannot be predicted with certainty, we maintain portfolios of long term invested assets with varying maturities, along with short-term investments that provide additional liquidity for payment of claims. At December 31, 2012 and 2011, we held cash and short-term investments of \$1,397.4 million and \$1,134.0 million, respectively. All of our short-term investments are readily marketable and can be converted to cash. In addition to these cash and short-term investments, at December 31, 2012, we had \$957.8 million of available for sale fixed maturity securities maturing within one year or less, \$5,741.3 million maturing within one to five years and \$3,785.8 million maturing after five years. Our \$1,399.1 million of equity securities are comprised primarily of publicly traded securities that can

be easily liquidated. We believe that these fixed maturity and equity securities, in conjunction with the short-term investments and positive cash flow from operations, provide ample sources of liquidity for the expected payment of losses in the near future. We do not anticipate selling securities or using available credit facilities to pay losses and LAE but have the ability to do so. Sales of securities might result in realized capital gains or losses. At December 31, 2012 we had \$708.6 million of net pre-tax unrealized appreciation, comprised of \$740.7 million of pre-tax unrealized appreciation and \$32.1 million of pre-tax unrealized depreciation.

Management expects annual positive cash flow from operations, which in general reflects the strength of overall pricing, to persist over the near term, absent any unusual catastrophe activity. Due to the significant catastrophe losses in 2011, cash flow from operations may be impacted in the near term as these losses continue to be paid. In the intermediate and long term, our cash flow from operations will be impacted to the extent by which competitive pressures affect overall pricing in our markets and by which our premium receipts are impacted from our strategy of emphasizing underwriting profitability over premium volume.

Effective June 22, 2012, Group, Bermuda Re and Everest International entered into a four year, \$800.0 million senior credit facility with a syndicate of lenders, which amended and restated in its entirety the July 27, 2007, five year, \$850.0 million senior credit facility. Both the June 22, 2012 and July 27, 2007 senior credit facilities, which have similar terms, are referred to as the "Group Credit Facility". Wells Fargo Corporation ("Wells Fargo Bank") is the administrative agent for the Group Credit Facility, which consists of two tranches. Tranche one provides up to \$200.0 million of unsecured revolving credit for liquidity and general corporate purposes, and for the issuance of unsecured standby letters of credit. The interest on the revolving loans shall, at the Company's option, be either (1) the Base Rate (as defined below) or (2) an adjusted London Interbank Offered Rate ("LIBOR") plus a margin. The Base Rate is the higher of (a) the prime commercial lending rate established by Wells Fargo Bank, (b) the Federal Funds Rate plus 0.5% per annum or (c) the one month LIBOR Rate plus 1.0% per annum. The amount of margin and the fees payable for the Group Credit Facility depends on Group's senior unsecured debt rating. Tranche two exclusively provides up to \$600.0 million for the issuance of standby letters of credit on a collateralized basis.

The Group Credit Facility requires Group to maintain a debt to capital ratio of not greater than 0.35 to 1 and to maintain a minimum net worth. Minimum net worth is an amount equal to the sum of \$4,250.0 million plus 25% of consolidated net income for each of Group's fiscal quarters, for which statements are available ending on or after January 1, 2012 and for which consolidated net income is positive, plus 25% of any increase in consolidated net worth during such period attributable to the issuance of ordinary and preferred shares, which at December 31, 2012, was \$4,470.6 million. As of December 31, 2012, the Company was in compliance with all Group Credit Facility covenants.

At December 31, 2012, the Group Credit Facility had no outstanding letters of credit under tranche one and \$463.2 million outstanding letters of credit under tranche two. At December 31, 2011, the Group Credit Facility had no outstanding letters of credit under tranche one and \$446.5 million outstanding letters of credit under tranche two.

Effective August 15, 2011, Holdings entered into a new three year, \$150.0 million unsecured revolving credit facility with a syndicate of lenders, replacing the August 23, 2006 five year senior revolving credit facility. Both the August 15, 2011 and August 23, 2006 revolving credit agreements, which have similar terms, are referred to as the "Holdings Credit Facility". Citibank N.A. is the administrative agent for the Holdings Credit Facility. The Holdings Credit Facility may be used for liquidity and general corporate purposes. The Holdings Credit Facility provides for the borrowing of up to \$150.0 million with interest at a rate selected by Holdings equal to either, (1) the Base Rate (as defined below) or (2) a periodic fixed rate equal to the Eurodollar Rate plus an applicable margin. The Base Rate means a fluctuating interest rate per annum in effect from time to time to be equal to the higher of (a) the rate of interest publicly announced by Citibank as its base rate, (b) 0.5% per annum above the Federal Funds Rate or (c) 1% above the one month LIBOR, in each case plus the applicable margin. The amount of margin and the fees payable for the Holdings Credit Facility depends upon Holdings' senior unsecured debt rating.

The Holdings Credit Facility requires Holdings to maintain a debt to capital ratio of not greater than 0.35 to 1 and Everest Re to maintain its statutory surplus at \$1,875.0 million plus 25% of future aggregate net income and 25% of future aggregate capital contributions after December 31, 2010, which at December 31, 2012, was \$1,990.5 million. As of December 31, 2012, Holdings was in compliance with all Holdings Credit Facility covenants.

At December 31, 2012 and 2011, the Company had no outstanding short-term borrowings from the Holdings Credit Facility revolving credit line. At December 31, 2012 and 2011, the Holdings Credit Facility had outstanding letters of credit of \$1.6 million and \$5.0 million, respectively.

Costs incurred in connection with the Group Credit Facility and the Holdings Credit Facility were \$2.9 million and \$1.8 million for December 31, 2012 and 2011, respectively.

Exposure to Catastrophes. Like other insurance and reinsurance companies, we are exposed to multiple insured losses arising out of a single occurrence, whether a natural event, such as a hurricane or an earthquake, or other catastrophe, such as an explosion at a major factory. A large catastrophic event can be expected to generate insured losses to multiple reinsurance treaties, facultative certificates and across lines of business.

We focus on potential losses that could result from any single event, or series of events as part of our evaluation and monitoring of our aggregate exposures to catastrophic events. Accordingly, we employ various techniques to estimate the amount of loss we could sustain from any single catastrophic event or series of events in various geographic areas. These techniques range from deterministic approaches, such as tracking aggregate limits exposed in catastrophe-prone zones and applying reasonable damage factors, to modeled approaches that attempt to scientifically measure catastrophe loss exposure using sophisticated Monte Carlo simulation techniques that forecast frequency and severity of expected losses on a probabilistic basis.

No single universal model or group of models is currently capable of projecting the amount and probability of loss in all global geographic regions in which we conduct business. In addition, the form, quality and granularity of underwriting exposure data furnished by ceding companies is not uniformly compatible with the data requirements for our licensed models, which adds to the inherent imprecision in the potential loss projections. Further, the results from multiple models and analytical methods must be combined and interpolated to estimate potential losses by and across business units. Also, while most models have been updated to incorporate claim information from recent catastrophic events, catastrophe model projections are still inherently imprecise. In addition, uncertainties with respect to future climatic patterns and cycles add to the already significant uncertainty of loss projections from models using historic long term frequency and severity data.

Nevertheless, when combined with traditional risk management techniques and sound underwriting judgment, catastrophe models are a useful tool for underwriters to price catastrophe exposed risks and for providing management with quantitative analyses with which to monitor and manage catastrophic risk exposures by zone and across zones for individual and multiple events.

Projected catastrophe losses are generally summarized in terms of the PML. We define PML as our anticipated loss, taking into account contract terms and limits, caused by a single catastrophe affecting a broad contiguous geographic area, such as that caused by a hurricane or earthquake. The PML will vary depending upon the modeled simulated losses and the make-up of the in force book of business. The projected severity levels are described in terms of "return periods", such as "100-year events" and "250-year events". For example, a 100-year PML is the estimated loss to the current in-force portfolio from a single event which has a 1% probability of being exceeded in a twelve month period. In other words, it corresponds to a 99% probability that the loss from a single event will fall below the indicated PML. It is important to note that PMLs are estimates. Modeled events are hypothetical events produced by a stochastic model. As a result, there can be no assurance that any actual event will align with the modeled event or that actual losses from events similar to the modeled events will not vary materially from the modeled event PML.

From an enterprise risk management perspective, management sets limits on the levels of catastrophe loss exposure we may underwrite. The limits are revised periodically based on a variety of factors, including but not limited to our financial resources and expected earnings and risk/reward analyses of the business being underwritten.

Management estimates that the projected net economic loss from its largest 100-year event in a given zone represents approximately 10% of its projected 2013 shareholders' equity. Economic loss is the gross PML reduced by estimated reinstatement premiums to renew coverage and estimated income taxes. The impact of income taxes on the PML depends on the distribution of the losses by corporate entity, which is also affected by inter-affiliate reinsurance. Management also monitors and controls its largest PMLs at multiple points along the loss distribution curve, such as loss amounts at the 20, 50, 100, 250, 500 and 1,000 year return periods. This process enables management to identify and control exposure accumulations and to integrate such exposures into enterprise risk, underwriting and capital management decisions.

Our catastrophe loss projections, segmented by risk zones, are updated quarterly and reviewed as part of a formal risk management review process.

We believe that our greatest worldwide 1 in 100 year exposure to a single catastrophic event is to a hurricane affecting the U.S. southeast coast, where we estimate we have a gross PML exposure of \$1,084 million. See also table under ITEM 1, "Business - Risk Management of Underwriting and Retrocession Arrangements".

If such a single catastrophe loss were to occur, management estimates that the economic loss to us would be approximately \$671 million. The estimate involves multiple variables, including which Everest entity would experience the loss, and as a result there can be no assurance that this amount would not be exceeded.

We may purchase reinsurance to cover specific business written or the potential accumulation or aggregation of exposures across some or all of our operations. Reinsurance purchasing decisions consider both the potential coverage and market conditions including the pricing, terms, conditions and availability of coverage, with the aim of securing cost effective protection. The amount of reinsurance purchased has varied over time, reflecting our view of our exposures and the cost of reinsurance.

For the period from August 1, 2012 to July 31, 2013, we have catastrophe loss reinsurance protection in place for losses arising from earthquakes of 61% of \$100 million in excess of \$190 million, excluding the territories of the U.S., Japan and Europe. See ITEM 1, "Business - Risk Management of Underwriting and Retrocession Arrangements" for further details.

Information Technology. Our information technology is a key component of our business operations and is supported by a team of knowledgeable professionals. The majority of our information technology platform is located at our service processing center in New Jersey but processing is performed at the office locations of our operating subsidiaries and branches. In addition, our main-frame processing is performed by a third party vendor at a separate location. We have implemented procedures that seek to ensure that our key business systems are protected (or secured) and data are backed up and stored at off-site locations so that they can be restored promptly if necessary. We have documented business continuity plans to provide uninterrupted services for minor service issues and disaster recovery plans with alternative secure data centers for broader outages.

Our business operations depend on the proper functioning and availability of our information technology platform, which includes data processing and related electronic communications. We communicate electronically internally and with our brokers, program managers and third party vendors. Some of these electronic communications involve personal, confidential and proprietary information. We seek to ensure that all of our systems, data and electronic transmissions are appropriately protected from cybersecurity attacks with the latest technology safeguards. These include, but are not limited to, requiring an independent assessment of outside vendor's computing environment relative to the services they are providing us.

Despite these safeguards, a significant cyber incident, including system failure, security breach, disruption by malware or other damage could interrupt or delay our operations. This type of incident may result in a violation of applicable privacy and other laws. Management is not aware of a cybersecurity incident that has had a material impact on our operations.

**Contractual Obligations.** The following table shows our contractual obligations for the period indicated.

(Dollars in millions)	Payments due by period				
	Total	Less than 1 year	1-3 years	3-5 years	More than 5 years
5.40% Senior notes	\$ 249.9	\$ -	\$ 249.9	\$ -	\$ -
Junior subordinated debt	329.9	-	-	-	329.9
6.6% Long term notes	238.6	-	-	-	238.6
Interest expense <sup>(1)</sup>	1,306.9	49.1	84.7	71.2	1,101.9
Employee benefit plans	58.5	6.0	7.2	5.1	40.2
Operating lease agreements	93.5	11.5	23.1	22.7	36.4
Gross reserve for losses and LAE <sup>(2)</sup>	10,069.1	2,659.2	3,856.9	1,218.6	2,334.4
Total	\$ 12,346.4	\$ 2,725.8	\$ 4,221.8	\$ 1,317.6	\$ 4,081.4

(Some amounts may not reconcile due to rounding.)

(1) Interest expense on 6.6% long term notes is assumed to be fixed through contractual term.

(2) Loss and LAE reserves represent our best estimate of losses from claim and related settlement costs. Both the amounts and timing of such payments are estimates, and the inherent variability of resolving claims as well as changes in market conditions make the timing of cash flows uncertain. Therefore, the ultimate amount and timing of loss and LAE payments could differ from our estimates.

The contractual obligations for senior notes, long term notes and junior subordinated debt are the responsibility of Holdings. We have sufficient cash flow, liquidity, investments and access to capital markets to satisfy these obligations. Holdings generally depends upon dividends from Everest Re, its operating insurance subsidiary for its funding, capital contributions from Group or access to the capital markets. Our various operating insurance and reinsurance subsidiaries have sufficient cash flow, liquidity and investments to settle outstanding reserves for losses and LAE. Management believes that we, and each of our entities, have sufficient financial resources or ready access thereto, to meet all obligations.

On March 15, 2010, Holdings' \$200.0 million principal amount of 8.75% senior notes matured and was paid in cash.

#### **Dividends.**

During 2012, 2011 and 2010, we declared and paid shareholder dividends of \$100.4 million, \$103.8 million and \$108.5 million, respectively. As an insurance holding company, we are partially dependent on dividends and other permitted payments from our subsidiaries to pay cash dividends to our shareholders. The payment of dividends to Group by Holdings Ireland is subject to Irish corporate and regulatory restrictions; the payment of dividends to Holdings Ireland by Holdings and to Holdings by Everest Re is subject to Delaware regulatory restrictions; and the payment of dividends to Group by either Bermuda Re or Everest International is subject to Bermuda insurance regulatory restrictions. Management expects that, absent extraordinary catastrophe losses, such restrictions should not affect Everest Re's ability to declare and pay dividends sufficient to support Holdings' general corporate needs and that Holdings Ireland, Bermuda Re and Everest International will have the ability to declare and pay dividends sufficient to support Group's general corporate needs. For the years ended December 31, 2012, 2011 and 2010, Everest Re paid dividends to Holdings of \$100.0 million, \$75.0 million and \$590.0 million, respectively. For the years ended December 31, 2012, 2011 and 2010, Bermuda Re paid dividends to Group of \$425.0 million, \$190.0 million and \$215.0 million, respectively, and Everest International paid dividends to Group of \$40.0 million, \$0.0 million and \$0.0 million, respectively. See ITEM 1, "Business – Regulatory Matters – Dividends" and ITEM 8, "Financial Statements and Supplementary Data" - Note 15 of Notes to Consolidated Financial Statements.

**Application of Recently Issued Accounting Guidance.**

*Intangibles-Goodwill or Other.* In September 2011, the FASB amended the authoritative guidance for disclosures on Goodwill Impairment. The amendment allows an entity first to assess qualitative factors to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount as a basis in determining whether it is necessary to perform the two-step goodwill impairment test. This guidance is effective for periods beginning after December 15, 2011. The Company implemented this guidance as of January 1, 2012.

*Presentation of Comprehensive Income.* In June 2011, FASB issued amendments to existing guidance to provide two alternatives for the presentation of comprehensive income. Components of net income and comprehensive income can either be presented within a single, continuous financial statement or be presented in two separate but consecutive financial statements. The Company has chosen to present the components of net income and comprehensive income in a single, continuous financial statement. The guidance is effective for reporting periods beginning after December 15, 2011. The Company implemented this guidance as of January 1, 2012.

*Common Fair Value Measurement.* In May 2011, FASB issued amendments to existing guidance to achieve common fair value measurement and disclosure requirements between GAAP and International Financial Reporting Standards. The amendments change wording used to describe many GAAP fair value measurement requirements and disclosures. FASB does not intend for the amendments to cause a change in application of fair value accounting guidance. The guidance is effective for reporting periods beginning after December 15, 2011. The Company implemented this guidance prospectively as of January 1, 2012.

*Treatment of Insurance Contract Acquisition Costs.* In October 2010, the FASB issued authoritative guidance for the accounting for costs associated with acquiring or renewing insurance contracts. The guidance identifies the incremental direct costs of contract acquisition and costs directly related to acquisition activities that should be capitalized. This guidance is effective for reporting periods beginning after December 15, 2011. The Company implemented this guidance as of January 1, 2012 and determined that \$13.5 million of previously deferrable acquisition costs will be expensed during 2012 and the first quarter of 2013, including \$10.9 million of previously deferrable acquisition costs expensed in 2012. If the guidance had been applicable for the prior periods, the Company would have expensed \$13.9 million of deferrable acquisition costs in 2011.

*Improving Disclosures About Fair Value Measurements.* In January 2010, the FASB amended the authoritative guidance for disclosures on fair value measurements. Effective for interim and annual reporting periods beginning after December 15, 2009, the guidance requires a new separate disclosure for: significant transfers in and out of Level 1 and 2 and the reasons for the transfers; and provided clarification on existing disclosures to include: fair value measurement disclosures by class of assets and liabilities and disclosure on valuation techniques and inputs used to measure fair value that fall in either Level 2 or Level 3. The Company implemented this guidance effective January 1, 2010. Effective for interim and annual reporting periods beginning after December 15, 2010, the guidance requires another new separate disclosure in regards to Level 3 fair value measurements in that, the period activity will present separately information about purchases, sales, issuances and settlements. Comparative disclosures shall be required only for periods ending after initial adoption. The Company implemented this guidance beginning with the third quarter of 2010.

**Market Sensitive Instruments.**

The SEC's Financial Reporting Release #48 requires registrants to clarify and expand upon the existing financial statement disclosure requirements for derivative financial instruments, derivative commodity instruments and other financial instruments (collectively, "market sensitive instruments"). We do not generally enter into market sensitive instruments for trading purposes.

Our current investment strategy seeks to maximize after-tax income through a high quality, diversified, taxable and tax-preferenced fixed maturity portfolio, while maintaining an adequate level of liquidity. Our mix of taxable and tax-preferenced investments is adjusted periodically, consistent with our current and projected operating results, market conditions and our tax position. The fixed maturity securities in the investment portfolio are comprised of non-trading available for sale securities. Additionally, we have invested in equity securities. We have also written a small number of equity index put option contracts.

The overall investment strategy considers the scope of present and anticipated Company operations. In particular, estimates of the financial impact resulting from non-investment asset and liability transactions, together with our capital structure and other factors, are used to develop a net liability analysis. This analysis includes estimated payout characteristics for which our investments provide liquidity. This analysis is considered in the development of specific investment strategies for asset allocation, duration and credit quality. The change in overall market sensitive risk exposure principally reflects the asset changes that took place during the period.

Interest Rate Risk. Our \$16.6 billion investment portfolio, at December 31, 2012, is principally comprised of fixed maturity securities, which are generally subject to interest rate risk and some foreign currency exchange rate risk, and some equity securities, which are subject to price fluctuations and some foreign exchange rate risk. The overall economic impact of the foreign exchange risks on the investment portfolio is partially mitigated by changes in the dollar value of foreign currency denominated liabilities and their associated income statement impact.

Interest rate risk is the potential change in value of the fixed maturity securities portfolio, including short-term investments, from a change in market interest rates. In a declining interest rate environment, it includes prepayment risk on the \$2,480.3 million of mortgage-backed securities in the \$13,183.1 million fixed maturity portfolio. Prepayment risk results from potential accelerated principal payments that shorten the average life and thus the expected yield of the security.

The table below displays the potential impact of market value fluctuations and after-tax unrealized appreciation on our fixed maturity portfolio (including \$860.4 million of short-term investments) for the period indicated based on upward and downward parallel and immediate 100 and 200 basis point shifts in interest rates. For legal entities with a U.S. dollar functional currency, this modeling was performed on each security individually. To generate appropriate price estimates on mortgage-backed securities, changes in prepayment expectations under different interest rate environments were taken into account. For legal entities with a non-U.S. dollar functional currency, the effective duration of the involved portfolio of securities was used as a proxy for the market value change under the various interest rate change scenarios.

	Impact of Interest Rate Shift in Basis Points At December 31, 2012				
	-200	-100	0	100	200
(Dollars in millions)					
Total Market/Fair Value	\$ 14,788.1	\$ 14,417.9	\$ 14,043.5	\$ 13,645.7	\$ 13,228.2
Market/Fair Value Change from Base (%)	5.3%	2.7%	0.0%	-2.8%	-5.8%
Change in Unrealized Appreciation					
After-tax from Base (\$)	\$ 627.5	\$ 315.5	\$ -	\$ (335.5)	\$ (687.5)

	Impact of Interest Rate Shift in Basis Points At December 31, 2011				
	-200	-100	0	100	200
(Dollars in millions)					
Total Market/Fair Value	\$ 13,799.9	\$ 13,459.0	\$ 13,092.5	\$ 12,686.2	\$ 12,256.1
Market/Fair Value Change from Base (%)	5.4%	2.8%	0.0%	-3.1%	-6.4%
Change in Unrealized Appreciation					
After-tax from Base (\$)	\$ 591.3	\$ 307.1	\$ -	\$ (341.5)	\$ (703.5)

We had \$10,069.1 million and \$10,123.2 million of gross reserves for losses and LAE as of December 31, 2012 and 2011, respectively. These amounts are recorded at their nominal value, as opposed to present value, which would reflect a discount adjustment to reflect the time value of money. Since losses are paid out over a period of time, the present value of the reserves is less than the nominal value. As interest rates rise, the present value of the reserves decreases and, conversely, as interest rates decline, the present value increases. These movements are the opposite of the interest rate impacts on the fair value of investments. While the difference between present value and nominal value is not reflected in our financial statements, our financial results will include investment income over time from the investment portfolio until the claims are paid. Our loss and loss reserve obligations have an expected duration of approximately 3.5 years, which is reasonably consistent with our fixed income portfolio. If we were to discount our loss and LAE reserves,

net of \$0.6 billion of reinsurance receivables on unpaid losses, the discount would be approximately \$1.2 billion resulting in a discounted reserve balance of approximately \$8.2 billion, representing approximately 58.7% of the value of the fixed maturity investment portfolio funds.

**Equity Risk.** Equity risk is the potential change in fair and/or market value of the common stock, preferred stock and mutual fund portfolios arising from changing prices. Our equity investments consist of a diversified portfolio of individual securities and mutual funds, which invest principally in high quality common and preferred stocks that are traded on the major exchanges, and mutual fund investments in emerging market debt. The primary objective of the equity portfolio is to obtain greater total return relative to our core bonds over time through market appreciation and income.

The tables below display the impact on fair/market value and after-tax change in fair/market value of a 10% and 20% change in equity prices up and down for the period indicated.

Impact of Percentage Change in Equity Fair/Market Values At December 31, 2012					
(Dollars in millions)	-20%	-10%	0%	10%	20%
Fair/Market Value of the Equity Portfolio	\$ 1,119.2	\$ 1,259.1	\$ 1,399.1	\$ 1,539.0	\$ 1,678.9
After-tax Change in Fair/Market Value	\$ (191.1)	\$ (95.6)	\$ -	\$ 95.6	\$ 191.1

Impact of Percentage Change in Equity Fair/Market Values At December 31, 2011					
(Dollars in millions)	-20%	-10%	0%	10%	20%
Fair/Market Value of the Equity Portfolio	\$ 1,358.4	\$ 1,528.2	\$ 1,698.0	\$ 1,867.8	\$ 2,037.6
After-tax Change in Fair/Market Value	\$ (251.4)	\$ (125.7)	\$ -	\$ 125.7	\$ 251.4

**Foreign Currency Risk.** Foreign currency risk is the potential change in value, income and cash flow arising from adverse changes in foreign currency exchange rates. Each of our non-U.S./Bermuda ("foreign") operations maintains capital in the currency of the country of its geographic location consistent with local regulatory guidelines. Each foreign operation may conduct business in its local currency, as well as the currency of other countries in which it operates. The primary foreign currency exposures for these foreign operations are the Canadian Dollar, the Singapore Dollar, the British Pound Sterling and the Euro. We mitigate foreign exchange exposure by generally matching the currency and duration of our assets to our corresponding operating liabilities. In accordance with FASB guidance, we translate the assets, liabilities and income of non-U.S. dollar functional currency legal entities to the U.S. dollar. This translation amount is reported as a component of other comprehensive income. As of December 31, 2012, there has been no material change in exposure to foreign exchange rates as compared to December 31, 2011.

The tables below display the potential impact of a parallel and immediate 10% and 20% increase and decrease in foreign exchange rates on the valuation of invested assets subject to foreign currency exposure for the periods indicated. This analysis includes the after-tax impact of translation from transactional currency to functional currency as well as the after-tax impact of translation from functional currency to the U.S. dollar reporting currency.

Change in Foreign Exchange Rates in Percent At December 31, 2012					
(Dollars in millions)	-20%	-10%	0%	10%	20%
Total After-tax Foreign Exchange Exposure	\$ (389.2)	\$ (194.6)	\$ -	\$ 194.6	\$ 389.2

Change in Foreign Exchange Rates in Percent At December 31, 2011					
(Dollars in millions)	-20%	-10%	0%	10%	20%
Total After-tax Foreign Exchange Exposure	\$ (394.5)	\$ (197.2)	\$ -	\$ 197.2	\$ 394.5

Equity Index Put Option Contracts. Although not considered material in the context of our aggregate exposure to market sensitive instruments, we have issued six equity index put option contracts based on the Standard & Poor's 500 ("S&P 500") index and one equity index put option contract based on the FTSE 100 index, that are market sensitive and sufficiently unique to warrant supplemental disclosure.

We sold six equity index put option contracts, based on the S&P 500 index, for total consideration, net of commissions, of \$22.5 million. At December 31, 2012, fair value for these equity index put option contracts was \$69.8 million. These equity index put option contracts each have a single exercise date, with maturities ranging from 12 to 30 years and strike prices ranging from \$1,141.21 to \$1,540.63. The S&P 500 index value at December 31, 2012 was \$1,426.19. No amounts will be payable under these equity index put option contracts if the S&P 500 index is at, or above, the strike prices on the exercise dates, which fall between June 2017 and March 2031. If the S&P 500 index is lower than the strike price on the applicable exercise date, the amount due would vary proportionately with the percentage by which the index is below the strike price. Based on historical index volatilities and trends and the December 31, 2012 S&P 500 index value, we estimate the probability that each equity index put option contract of the S&P 500 index falling below the strike price on the exercise date to be less than 44%. The theoretical maximum payouts under these six equity index put option contracts would occur if on each of the exercise dates the S&P 500 index value were zero. At December 31, 2012, the present value of these theoretical maximum payouts using a 3% discount factor was \$395.9 million. Conversely, if the contracts had all expired on December 31, 2012, with the S&P index at \$1,426.19, the settlement amount would have been \$11.0 million.

We sold one equity index put option contract based on the FTSE 100 index for total consideration, net of commissions, of \$6.7 million. At December 31, 2012, fair value for this equity index put option contract was \$9.7 million. This equity index put option contract has an exercise date of July 2020 and a strike price of £5,989.75. The FTSE 100 index value at December 31, 2012 was £5,897.80. No amount will be payable under this equity index put option contract if the FTSE 100 index is at, or above, the strike price on the exercise date. If the FTSE 100 index is lower than the strike price on the exercise date, the amount due will vary proportionately with the percentage by which the index is below the strike price. Based on historical index volatilities and trends and the December 31, 2012 FTSE 100 index value, we estimate the probability that the equity index put option contract of the FTSE 100 index will fall below the strike price on the exercise date to be less than 47%. The theoretical maximum payout under the equity index put option contract would occur if on the exercise date the FTSE 100 index value was zero. At December 31, 2012, the present value of the theoretical maximum payout using a 3% discount factor and current exchange rate was \$42.5 million. Conversely, if the contract had expired on December 31, 2012, with the FTSE index at £5,897.80, the settlement amount would have been \$0.8 million.

Because the equity index put option contracts meet the definition of a derivative, we report the fair value of these instruments in our consolidated balance sheets as a liability and record any changes to fair value in our consolidated statements of operations and comprehensive income (loss) as a net derivative gain (loss). Our financial statements reflect fair values for our obligations on these equity index put option contracts at December 31, 2012, of \$79.5 million; even though it may not be likely that the ultimate settlement of these transactions would require a payment that would exceed the initial consideration received, or any payment at all.

As there is no active market for these instruments, the determination of their fair value is based on an industry accepted option pricing model, which requires estimates and assumptions, including those regarding volatility and expected rates of return.

The tables below display the impact of potential movements in interest rates and the equity indices, which are the principal factors affecting fair value of these instruments, looking forward from the fair value for the period indicated. As these are estimates, there can be no assurance regarding future market performance. The asymmetrical results of the interest rate and S&P 500 and FTSE 100 indices shift reflect that the liability cannot fall below zero whereas it can increase to its theoretical maximum.

Equity Indices Put Options Obligation – Sensitivity Analysis					
At December 31, 2012

### Safe Harbor Disclosure.

This report contains forward-looking statements within the meaning of the U.S. federal securities laws. We intend these forward-looking statements to be covered by the safe harbor provisions for forward-looking statements in the federal securities laws. In some cases, these statements can be identified by the use of forward-looking words such as “may”, “will”, “should”, “could”, “anticipate”, “estimate”, “expect”, “plan”, “believe”, “predict”, “potential” and “intend”. Forward-looking statements contained in this report include information regarding our reserves for losses and LAE, the adequacy of our provision for uncollectible balances, estimates of our catastrophe exposure, the effects of catastrophic events on our financial statements, the ability of Everest Re, Holdings, Holdings Ireland and Bermuda Re to pay dividends and the settlement costs of our specialized equity index put option contracts. Forward-looking statements only reflect our expectations and are not guarantees of performance. These statements involve risks, uncertainties and assumptions. Actual events or results may differ materially from our expectations. Important factors that could cause our actual events or results to be materially different from our expectations include those discussed under the caption ITEM 1A, “Risk Factors”. We undertake no obligation to update or revise publicly any forward-looking statements, whether as a result of new information, future events or otherwise.

## **ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK**

See “Market Sensitive Instruments” in ITEM 7.

## **ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA**

The financial statements and schedules listed in the accompanying Index to Financial Statements and Schedules on page F-1 are filed as part of this report.

## **ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE**

None.

## **ITEM 9A. CONTROLS AND PROCEDURES**

### **Disclosure Controls and Procedures.**

As required by Rule 13a-15(b) of the Securities Exchange Act of 1934 (the “Exchange Act”), our management, including our Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of our disclosure controls and procedures (as defined in Rule 13a-15(e) under the Exchange Act). Based on that evaluation, the Chief Executive Officer and Chief Financial Officer have concluded that our disclosure controls and procedures were effective as of the end of the period covered by this annual report.

### **Management’s Report on Internal Control Over Financial Reporting.**

Our management is responsible for establishing and maintaining adequate internal controls over financial reporting. Our internal control over financial reporting is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of our financial statements for external purposes in accordance with generally accepted accounting principles.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Management has assessed the effectiveness of our internal control over financial reporting as of December 31, 2012. In making this assessment, we used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in *Internal Control – Integrated Framework*. Based on our assessment we concluded that, as of December 31, 2012, our internal control over financial reporting is effective based on those criteria.

The effectiveness of the Company’s internal control over financial reporting as of December 31, 2012, has been audited by PricewaterhouseCoopers LLP, an independent registered public accounting firm, as stated in their report, which appears herein.

### **Changes in Internal Control over Financial Reporting.**

As required by Rule 13a-15(d) of the Exchange Act, our management, including our Chief Executive Officer and Chief Financial Officer, has evaluated our internal control over financial reporting to determine whether any changes occurred during the fourth fiscal quarter covered by this annual report that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting. Based on that evaluation, there has been no such change during the fourth quarter.

## **ITEM 9B. OTHER INFORMATION**

None.

## **PART III**

### **ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE**

Reference is made to the sections captioned "Information Concerning Nominees", "Information Concerning Continuing Directors and Executive Officers", "Audit Committee", "Nominating and Governance Committee", "Code of Ethics for CEO and Senior Financial Officers" and "Section 16(a) Beneficial Ownership Reporting Compliance" in our proxy statement for the 2013 Annual General Meeting of Shareholders, which will be filed with the Commission within 120 days of the close of our fiscal year ended December 31, 2012 (the "Proxy Statement"), which sections are incorporated herein by reference.

### **ITEM 11. EXECUTIVE COMPENSATION**

Reference is made to the sections captioned "Directors' Compensation" and "Compensation of Executive Officers" in the Proxy Statement, which are incorporated herein by reference.

### **ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED SHAREHOLDER MATTERS**

Reference is made to the sections captioned "Common Share Ownership by Directors and Executive Officers", "Principal Beneficial Owners of Common Shares" and "Securities Authorized for Issuance Under Equity Compensation Plans" in the Proxy Statement, which are incorporated herein by reference.

### **ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE**

Reference is made to the section captioned "Certain Transactions with Directors" in the Proxy Statement, which is incorporated herein by reference.

### **ITEM 14. PRINCIPAL ACCOUNTANT FEES AND SERVICES**

Reference is made to the section captioned "Audit Committee Report" in the Proxy Statement, which is incorporated herein by reference.

## **PART IV**

### **ITEM 15. EXHIBITS AND FINANCIAL STATEMENT SCHEDULES**

#### **Financial Statements and Schedules.**

The financial statements and schedules listed in the accompanying Index to Financial Statements and Schedules on page F-1 are filed as part of this report.

#### **Exhibits.**

The exhibits listed on the accompanying Index to Exhibits on page E-1 are filed as part of this report except that the certifications in Exhibit 32 are being furnished to the SEC, rather than filed with the SEC, as permitted under applicable SEC rules.

## SIGNATURES

## **Report of Independent Registered Public Accounting Firm**

To the Board of Directors and Shareholders  
of Everest Re Group, Ltd.:

In our opinion, the consolidated financial statements listed in the accompanying index present fairly, in all material respects, the financial position of Everest Re Group, Ltd. and its subsidiaries (the "Company") at December 31, 2012 and 2011 and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2012 in conformity with accounting principles generally accepted in the United States of America. In addition, in our opinion, the financial statement schedules listed in the accompanying index present fairly, in all material respects, the information set forth therein when read in conjunction with the related consolidated financial statements. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2012 based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for these financial statements and financial statement schedules, for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the Management's Report on Internal Control over Financial Reporting appearing under Item 9A. Our responsibility is to express opinions on these financial statements, on the financial statement schedules, and on the Company's internal control over financial reporting based on our integrated audits. We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Years Ended December 31, 2012, 2011 and 2010

### 1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

#### A. Business and Basis of Presentation.

Everest Re Group, Ltd. ("Group"), a Bermuda company, through its subsidiaries, principally provides reinsurance and insurance in the U.S., Bermuda and international markets. As used in this document, "Company" means Group and its subsidiaries. On December 30, 2008, Group contributed Everest Reinsurance Holdings, Inc. ("Holdings") and its subsidiaries to its Irish holding company, Everest Underwriting Group (Ireland), Limited ("Holdings Ireland").

The accompanying consolidated financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America ("GAAP"). The statements include all of the following domestic and foreign direct and indirect subsidiaries of Group: Everest International Reinsurance, Ltd. ("Everest International"), Everest Global Services, Inc. ("Global Services"), Everest Reinsurance (Bermuda), Ltd. ("Bermuda Re"), Everest Re Advisors, Ltd., Everest Advisors (UK), Ltd., Holdings Ireland, Everest Reinsurance Company (Ireland) Limited ("Ireland Re"), Everest Insurance Company of Canada ("Everest Canada"), Premiere Insurance Underwriting Services ("Premiere"), Holdings, Heartland Crop Insurance, Inc. ("Heartland"), Specialty Insurance Group, Inc. ("Specialty"), Mt. McKinley Insurance Company ("Mt. McKinley"), Mt. McKinley Managers, L.L.C., Workcare Southeast, Inc., Workcare Southeast of Georgia, Inc., Everest Reinsurance Company ("Everest Re"), Everest National Insurance Company ("Everest National"), Everest Reinsurance Company Ltda. (Brazil), Mt. Whitney Securities, Inc., Everest Indemnity Insurance Company ("Everest Indemnity") and Everest Security Insurance Company ("Everest Security"). All amounts are reported in U.S. dollars.

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities (and disclosure of contingent assets and liabilities) at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Ultimate actual results could differ, possibly materially, from those estimates.

All intercompany accounts and transactions have been eliminated.

Certain reclassifications and format changes have been made to prior years' amounts to conform to the 2012 presentation.

#### B. Investments.

Fixed maturity and equity security investments available for sale, at market value, reflect unrealized appreciation and depreciation, as a result of temporary changes in market value during the period, in shareholders' equity, net of income taxes in "accumulated other comprehensive income (loss)" in the consolidated balance sheets. Fixed maturity and equity securities carried at fair value reflect fair value re-measurements as net realized capital gains and losses in the consolidated statements of operations and comprehensive income (loss). The Company records changes in fair value for its fixed maturities available for sale, at market value through shareholders' equity, net of taxes in accumulated other comprehensive income (loss) since cash flows from these investments will be primarily used to settle its reserve for losses and loss adjustment expense liabilities. The Company anticipates holding these investments for an extended period as the cash flow from interest and maturities will fund the projected payout of these liabilities. Fixed maturities carried at fair value represent a portfolio of convertible bond securities, which have characteristics similar to equity securities and at times, designated foreign denominated fixed maturity securities, which will be used to settle loss and loss adjustment reserves in the same currency. The Company carries all of its equity securities at fair value except for mutual fund investments whose underlying investments are comprised of fixed maturity securities. For equity securities, available for sale, at fair value, the Company reflects changes in value as net realized capital gains and losses since these securities may be sold in the near term depending on financial market conditions. Interest income on all fixed maturities and dividend income on all equity securities are included as part of net investment income in the consolidated statements of operations and comprehensive income (loss). Unrealized losses on fixed maturities, which are

deemed other-than-temporary and related to the credit quality of a security, are charged to net income (loss) as net realized capital losses. Short-term investments are stated at cost, which approximates market value. Realized gains or losses on sales of investments are determined on the basis of identified cost. For non-publicly traded securities, market prices are determined through the use of pricing models that evaluate securities relative to the U.S. Treasury yield curve, taking into account the issue type, credit quality, and cash flow characteristics of each security. For publicly traded securities, market value is based on quoted market prices or valuation models that use observable market inputs. When a sector of the financial markets is inactive or illiquid, the Company may use its own assumptions about future cash flows and risk-adjusted discount rates to determine fair value. Retrospective adjustments are employed to recalculate the values of asset-backed securities. Each acquisition lot is reviewed to recalculate the effective yield. The recalculated effective yield is used to derive a book value as if the new yield were applied at the time of acquisition. Outstanding principal factors from the time of acquisition to the adjustment date are used to calculate the prepayment history for all applicable securities. Conditional prepayment rates, computed with life to date factor histories and weighted average maturities, are used to effect the calculation of projected and prepayments for pass-through security types. Other invested assets include limited partnerships, rabbi trusts and an affiliated entity. Limited partnerships and the affiliated entity are accounted for under the equity method of accounting, which can be recorded on a monthly or quarterly lag.

**C. Uncollectible Receivable Balances.**

The Company provides reserves for uncollectible reinsurance recoverable and premium receivable balances based on management’s assessment of the collectability of the outstanding balances. Such reserves are presented in the table below for the periods indicated.

	Years Ended December 31,	
	2012	2011
(Dollars in thousands)		
Reinsurance receivables and premium receivables	\$ 32,011	\$ 33,796

**D. Deferred Acquisition Costs.**

Acquisition costs, consisting principally of commissions and brokerage expenses and certain premium taxes and fees incurred at the time a contract or policy is issued and that vary with and are directly related to the Company’s reinsurance and insurance business, are deferred and amortized over the period in which the related premiums are earned. Deferred acquisition costs are limited to their estimated realizable value by line of business based on the related unearned premiums, anticipated claims and claim expenses and anticipated investment income. Deferred acquisition costs amortized to income are presented in the table below for the periods indicated.

	Years Ended December 31,		
	2012	2011	2010
(Dollars in thousands)			
Deferred acquisition costs	\$ 952,701	\$ 950,521	\$ 931,855

**E. Reserve for Losses and Loss Adjustment Expenses.**

The reserve for losses and loss adjustment expenses (“LAE”) is based on individual case estimates and reports received from ceding companies. A provision is included for losses and LAE incurred but not reported (“IBNR”) based on past experience. A provision is also included for certain potential liabilities relating to asbestos and environmental (“A&E”) exposures, which liabilities cannot be estimated using traditional reserving techniques. See also Note 3. The reserves are reviewed periodically and any changes in estimates are reflected in earnings in the period the adjustment is made. The Company’s loss and LAE reserves represent management’s best estimate of the ultimate liability. Loss and LAE reserves are presented gross of reinsurance receivables and incurred losses and LAE are presented net of reinsurance.

Accruals for commissions are established for reinsurance contracts that provide for the stated commission percentage to increase or decrease based on the loss experience of the contract. Changes in estimates for such arrangements are recorded as commission expense. Commission accruals for contracts with adjustable features are estimated based on expected loss and LAE.

**F. Future Policy Benefit Reserve.**

Liabilities for future policy benefits on annuity policies are carried at their accumulated values. Reserves for policy benefits include mortality claims in the process of settlement and IBNR claims. Actual experience in a particular period may fluctuate from expected results.

**G. Premium Revenues.**

Written premiums are earned ratably over the periods of the related insurance and reinsurance contracts. Unearned premium reserves are established relative to the unexpired contract period. Such reserves are established based upon reports received from ceding companies or estimated using pro rata methods based on statistical data. Reinstatement premiums represent additional premium received on reinsurance coverages, most prevalently catastrophe related, when limits have been depleted under the original reinsurance contract and additional coverage is granted. Written and earned premiums and the related costs, which have not yet been reported to the Company, are estimated and accrued. Premiums are net of ceded reinsurance.

Payout annuity premiums are recognized as revenue over the premium-paying period of the policies.

**H. Prepaid Reinsurance Premiums.**

Prepaid reinsurance premiums represent unearned premium reserves ceded to other reinsurers. Prepaid reinsurance premiums for any foreign reinsurers comprising more than 10% of the outstanding balance at December 31, 2012 were collateralized either through a trust arrangement or letters of credit, thereby limiting the credit risk to the Company.

**I. Income Taxes.**

Holdings and its wholly-owned subsidiaries file a consolidated U.S. federal income tax return. Foreign branches of subsidiaries file local tax returns as required. Group and subsidiaries not included in Holdings' consolidated tax return file separate company U.S. federal income tax returns as required. Holdings Ireland files an Irish income tax return. The UK branch of Bermuda Re files a UK income tax return. Deferred income taxes have been recorded to recognize the tax effect of temporary differences between the financial reporting and income tax bases of assets and liabilities, which arise because of differences between GAAP and income tax accounting rules.

**J. Foreign Currency.**

Assets and liabilities relating to foreign operations are translated into U.S. dollars at the exchange rates in effect at the balance sheet date; revenues and expenses are translated into U.S. dollars using average exchange rates in effect during the reporting period. Gains and losses resulting from translating foreign currency financial statements, net of deferred income taxes, are excluded from net income (loss) and accumulated in shareholders' equity. Gains and losses resulting from foreign currency transactions, other than debt securities available for sale, are recorded through the consolidated statements of operations and comprehensive income (loss) in other income (expense). Gains and losses resulting from changes in the foreign currency exchange rates on debt securities, available for sale at market value, are recorded in the consolidated balance sheets in accumulated other comprehensive income (loss) as unrealized appreciation (depreciation) and any losses which are deemed other-than-temporary are changed to net income (loss) as net realized capital loss.

### K. Earnings Per Common Share.

Basic earnings per share are calculated by dividing net income by the weighted average number of common shares outstanding. Diluted earnings per share reflect the potential dilution that would occur if options granted under various share-based compensation plans were exercised resulting in the issuance of common shares that would participate in the earnings of the entity.

Net income (loss) per common share has been computed as per below, based upon weighted average common basic and dilutive shares outstanding.

(Dollars in thousands, except per share amounts)	Years Ended December 31,		
	2012	2011	2010
Net income (loss) per share:			
Numerator			
Net income (loss)	\$ 828,954	\$ (80,486)	\$ 610,754
Less: dividends declared-common shares and nonvested common shares	(100,402)	(103,848)	(108,477)
Undistributed earnings	728,552	(184,334)	502,277
Percentage allocated to common shareholders <sup>(1)</sup>	99.2%	99.3%	99.5%
	722,717	(183,134)	499,882
Add: dividends declared-common shareholders	99,576	103,150	107,926
Numerator for basic and diluted earnings per common share	\$ 822,293	\$ (79,984)	\$ 607,808
Denominator			
Denominator for basic earnings per weighted-average common shares	51,894	53,792	56,630
Effect of dilutive securities:			
Options	173	124	156
Denominator for diluted earnings per adjusted weighted-average common shares	52,067	53,916	56,786
Per common share net income (loss)			
Basic	\$ 15.85	\$ (1.49)	\$ 10.73
Diluted	\$ 15.79	\$ (1.49)	\$ 10.70
<sup>(1)</sup> Basic weighted-average common shares outstanding	51,894	53,792	56,630
Basic weighted-average common shares outstanding and nonvested common shares expected to vest	52,313	54,145	56,902
Percentage allocated to common shareholders	99.2%	99.3%	99.5%

(Some amounts may not reconcile due to rounding.)

The table below presents the options to purchase common shares that were outstanding, but were not included in the computation of earnings per diluted share as they were anti-dilutive, for the periods indicated:

	Years Ended December 31,		
	2012	2011	2010
Anti-dilutive options	894,704	1,490,730	1,873,070

All outstanding options expire on or between September 18, 2013 and September 19, 2022.

### L. Segmentation.

The Company, through its subsidiaries, operates in four segments: U.S. Reinsurance, International, Bermuda and Insurance. See also Note 19.

### M. Derivatives.

The Company sold seven equity index put option contracts, based on two indices, in 2001 and 2005, which remain outstanding. The Company sold these equity index put options as insurance products with the intent of achieving a profit. These equity index put option contracts meet the definition of a derivative under FASB guidance and the Company's position in these equity index put option contracts is unhedged. Accordingly, these equity index put option contracts are carried at fair value in the consolidated balance sheets with changes in fair value recorded in the consolidated statements of operations and comprehensive income (loss).

The fair value of the equity index put options can be found in the Company's consolidated balance sheets as follows:

(Dollars in thousands)		At December 31,	
Derivatives not designated as hedging instruments	Location of fair value in balance sheets	2012	2011
Equity index put option contracts	Equity index put option liability	\$ 79,467	\$ 69,729
Total		\$ 79,467	\$ 69,729

The change in fair value of the equity index put option contracts can be found in the Company's statement of operations and comprehensive income (loss) as follows:

(Dollars in thousands)		For the Years Ended December 31,		
Derivatives not designated as hedging instruments	Location of gain (loss) in statements of operations and comprehensive income (loss)	2012	2011	2010
Equity index put option contracts	Net derivative gain (loss)	\$ (9,738)	\$ (11,261)	\$ (1,119)
Total		\$ (9,738)	\$ (11,261)	\$ (1,119)

### N. Deposit Assets and Liabilities.

In the normal course of its operations, the Company may enter into contracts that do not meet risk transfer provisions. Such contracts are accounted for using the deposit accounting method and are included in other liabilities in the Company's consolidated balance sheets. For such contracts, the Company originally records deposit liabilities for an amount equivalent to the assets received. Actuarial studies are used to estimate the final liabilities under such contracts with any change reflected in the consolidated statements of operations and comprehensive income (loss).

### O. Share-Based Compensation.

Share-based compensation option or restricted share awards are fair valued at the grant date and expensed over the vesting period of the award. The tax benefit on the recorded expense is deferred until the time the award is exercised or vests (becomes unrestricted). See Note 17.

### P. Application of Recently Issued Accounting Standard Changes.

*Intangibles-Goodwill or Other.* In September 2011, the Financial Accounting Standards Board ("FASB") amended the authoritative guidance for disclosures on Goodwill Impairment. The amendment allows an entity first to assess qualitative factors to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount as a basis in determining whether it is necessary to perform the two-step goodwill impairment test. This guidance is effective for periods beginning after December 15, 2011. The Company implemented this guidance as of January 1, 2012.

*Presentation of Comprehensive Income.* In June 2011, FASB issued amendments to existing guidance to provide two alternatives for the presentation of comprehensive income. Components of net income and comprehensive income can either be presented within a single, continuous financial statement or be presented in two separate but consecutive financial statements. The Company has chosen to present the components of net income and comprehensive income in a single, continuous financial statement. The guidance is effective for reporting periods beginning after December 15, 2011. The Company implemented this guidance as of January 1, 2012.

*Common Fair Value Measurement.* In May 2011, FASB issued amendments to existing guidance to achieve common fair value measurement and disclosure requirements between GAAP and International Financial Reporting Standards. The amendments change wording used to describe many GAAP fair value measurement requirements and disclosures. FASB does not intend for the amendments to cause a change in application of fair value accounting guidance. The guidance is effective for reporting periods beginning after December 15, 2011. The Company implemented this guidance prospectively as of January 1, 2012.

*Treatment of Insurance Contract Acquisition Costs.* In October 2010, the FASB issued authoritative guidance for the accounting for costs associated with acquiring or renewing insurance contracts. The guidance identifies the incremental direct costs of contract acquisition and costs directly related to acquisition activities that should be capitalized. This guidance is effective for reporting periods beginning after December 15, 2011. The Company implemented this guidance as of January 1, 2012 and determined that \$13,492 thousand of previously deferrable acquisition costs will be expensed during 2012 and the first quarter of 2013, including \$10,876 thousand of previously deferrable acquisition costs expensed in 2012. If the guidance had been applicable for the prior periods, the Company would have expensed \$13,901 thousand of deferrable acquisition costs during 2011.

*Improving Disclosures About Fair Value Measurements.* In January 2010, the FASB amended the authoritative guidance for disclosures on fair value measurements. Effective for interim and annual reporting periods beginning after December 15, 2009, the guidance requires a new separate disclosure for: significant transfers in and out of Level 1 and 2 and the reasons for the transfers; and provided clarification on existing disclosures to include: fair value measurement disclosures by class of assets and liabilities and disclosure on valuation techniques and inputs used to measure fair value that fall in either Level 2 or Level 3. The Company implemented this guidance effective January 1, 2010. Effective for interim and annual reporting periods beginning after December 15, 2010, the guidance requires another new separate disclosure in regards to Level 3 fair value measurements in that, the period activity will present separately information about purchases, sales, issuances and settlements. Comparative disclosures shall be required only for periods ending after initial adoption. The Company implemented this guidance beginning with the third quarter of 2010.

## 2. INVESTMENTS

The amortized cost, market value and gross unrealized appreciation and depreciation of available for sale, fixed maturity and equity security investments, carried at market value, are as follows for the periods indicated:

	At December 31, 2012			
	Amortized Cost	Unrealized Appreciation	Unrealized Depreciation	Market Value
(Dollars in thousands)				
Fixed maturity securities

The \$1,912,228 thousand of foreign government securities at December 31, 2012 included \$862,544 thousand of European sovereign securities. Approximately 51.7%, 19.1%, 6.7% and 5.1% of European sovereign securities represented securities held in the governments of the United Kingdom, France, Austria and the Netherlands, respectively. No other countries represented more than 5% of the European sovereign securities. The Company held no sovereign securities of Portugal, Italy, Ireland, Greece or Spain at December 31, 2012.

In accordance with FASB guidance, the Company reclassified the non-credit portion of other-than-temporary impairments from retained earnings into accumulated other comprehensive income (loss), on April 1, 2009. The table below presents the pre-tax cumulative unrealized appreciation (depreciation) on those corporate securities, for the periods indicated:

(Dollars in thousands)	At December 31,	
	2012	2011
Pre-tax cumulative unrealized appreciation (depreciation)	\$ 4,748	\$ 2,567

The amortized cost and market value of fixed maturity securities are shown in the following table by contractual maturity. Mortgage-backed securities are generally more likely to be prepaid than other fixed maturity securities. As the stated maturity of such securities may not be indicative of actual maturities, the totals for mortgage-backed and asset-backed securities are shown separately.

(Dollars in thousands)	At December 31, 2012		At December 31, 2011

The changes in net unrealized appreciation (depreciation) for the Company's investments are derived from the following sources for the periods indicated:

(Dollars in thousands)	Years Ended December 31,	
	2012	2011
Increase (decrease) during the period between the market value and cost of investments carried at market value, and deferred taxes thereon:		
Fixed maturity securities	\$ 132,246	\$ 122,393
Fixed maturity securities, other-than-temporary impairment	2,181	824
Equity securities	26,553	(15,143)
Other invested assets	-	(1,515)
Change in unrealized appreciation (depreciation), pre-tax	160,980	106,559
Deferred tax benefit (expense)	(6,714)	(26,484)
Deferred tax benefit (expense), other-than-temporary impairment	83	66
Change in unrealized appreciation (depreciation), net of deferred taxes, included in shareholders' equity	\$ 154,349	\$ 80,141

The Company frequently reviews all of its fixed maturity, available for sale securities for declines in market value and focuses its attention on securities whose fair value has fallen below 80% of their amortized cost at the time of review. The Company then assesses whether the decline in value is temporary or other-than-temporary. In making its assessment, the Company evaluates the current market and interest rate environment as well as specific issuer information. Generally, a change in a security's value caused by a change in the market, interest rate or foreign exchange environment does not constitute an other-than-temporary impairment, but rather a temporary decline in market value. Temporary declines in market value are recorded as unrealized losses in accumulated other comprehensive income (loss). If the Company determines that the decline is other-than-temporary and the Company does not have the intent to sell the security; and it is more likely than not that the Company will not have to sell the security before recovery of its cost basis, the carrying value of the investment is written down to fair value. The fair value adjustment that is credit or foreign exchange related is recorded in net realized capital gains (losses) in the Company's consolidated statements of operations and comprehensive income (loss). The fair value adjustment that is non-credit related is recorded as a component of other comprehensive income (loss), net of tax, and is included in accumulated other comprehensive income (loss) in the Company's consolidated balance sheets. The Company's assessments are based on the issuers current and expected future financial position, timeliness with respect to interest and/or principal payments, speed of repayments and any applicable credit enhancements or breakeven constant default rates on mortgage-backed and asset-backed securities, as well as relevant information provided by rating agencies, investment advisors and analysts.

The majority of the Company's equity securities available for sale at market value are primarily comprised of mutual fund investments whose underlying securities consist of fixed maturity securities. When a fund's value reflects an unrealized loss, the Company assesses whether the decline in value is temporary or other-than-temporary. In making its assessment, the Company considers the composition of its portfolios and their related markets, reports received from the portfolio managers and discussions with portfolio managers. If the Company determines that the declines are temporary and it has the ability and intent to continue to hold the investments, then the declines are recorded as unrealized losses in accumulated other comprehensive income (loss). If declines are deemed to be other-than-temporary, then the carrying value of the investment is written down to fair value and recorded in net realized capital gains (losses) in the Company's consolidated statements of operations and comprehensive income (loss).

Retrospective adjustments are employed to recalculate the values of asset-backed securities. All of the Company's asset-backed and mortgage-backed securities have a pass-through structure. Each acquisition lot is reviewed to recalculate the effective yield. The recalculated effective yield is used to derive a book value as if the new yield were applied at the time of acquisition. Outstanding principal factors from the time of acquisition to the adjustment date are used to calculate the prepayment history for all applicable securities. Conditional prepayment rates, computed with life to date factor histories and weighted average maturities, are used in the calculation of projected prepayments for pass-through security types.

The tables below display the aggregate market value and gross unrealized depreciation of fixed maturity and equity securities, by security type and contractual maturity, in each case subdivided according to length of time that individual securities had been in a continuous unrealized loss position for the periods indicated:

The aggregate market value and gross unrealized losses related to investments in an unrealized loss position at December 31, 2012 were \$1,298,275 thousand and \$32,063 thousand, respectively. There were no unrealized losses on a single issuer that exceeded 0.02% of the market value of the fixed maturity securities at December 31, 2012. In addition, as indicated on the above table, there was no significant concentration of unrealized losses in any one market sector. The \$9,512 thousand of unrealized losses related to fixed maturity securities that have been in an unrealized loss position for less than one year were generally comprised of domestic and foreign corporate securities, as well as agency residential mortgage-backed securities. Of these unrealized losses, \$7,982 thousand were related to securities that were rated investment grade by at least one nationally recognized statistical rating organization. The \$22,550 thousand of unrealized losses related to fixed maturity securities in an unrealized loss position for more than one year related primarily to domestic and foreign corporate securities, foreign government securities and commercial mortgage-backed securities. Of these unrealized losses, \$19,150 thousand related to securities that were rated investment grade by at least one nationally recognized statistical rating organization. The non-investment grade securities with unrealized losses were mainly comprised of corporate and commercial mortgage-backed securities. The gross unrealized depreciation for mortgage-backed securities included \$250 thousand related to sub-prime and alt-A loans. In all instances, there were no projected cash flow shortfalls to recover the full book value of the investments and the related interest obligations. The mortgage-backed securities still have excess credit coverage and are current on interest and principal payments.

The Company, given the size of its investment portfolio and capital position, does not have the intent to sell these securities; and it is more likely than not that the Company will not have to sell the security before recovery of its cost basis. In addition, all securities currently in an unrealized loss position are current with respect to principal and interest payments.

The tables below display the aggregate market value and gross unrealized depreciation of fixed maturity and equity securities, by security type and contractual maturity, in each case subdivided according to length of time that individual securities had been in a continuous unrealized loss position for the periods indicated:

The aggregate market value and gross unrealized losses related to investments in an unrealized loss position at December 31, 2011 were \$2,090,402 thousand and \$101,487 thousand, respectively. There were no unrealized losses on a single issuer that exceeded 0.04% of the market value of the fixed maturity securities at December 31, 2011. In addition, as indicated on the above table, there was no significant concentration of unrealized losses in any one market sector. The \$32,433 thousand of unrealized losses related to fixed maturity securities that have been in an unrealized loss position for less than one year were generally comprised of domestic and foreign corporate securities. Of these unrealized losses, \$17,207 thousand were related to securities that were rated investment grade by at least one nationally recognized statistical rating organization. The \$50,304 thousand of unrealized losses related to fixed maturity securities in an unrealized loss position for more than one year related primarily to domestic and foreign corporate securities, foreign government securities and commercial mortgage-backed securities. Of these unrealized losses, \$34,840 thousand related to securities that were rated investment grade by at least one nationally recognized statistical rating organization. All of the unrealized losses related to foreign corporate and foreign government securities are due to temporary currency exchange rate movements as opposed to market value movements. The non-investment grade securities with unrealized losses were mainly comprised of corporate

and commercial mortgage-backed securities. The gross unrealized depreciation for mortgage-backed securities included \$322 thousand related to sub-prime and alt-A loans. In all instances, there were no projected cash flow shortfalls to recover the full book value of the investments and the related interest obligations. The mortgage-backed securities still have excess credit coverage and are current on interest and principal payments. The unrealized losses related to equity securities represent temporary declines in value of mutual fund investments where the underlying investments are comprised of emerging market debt fixed maturities.

The components of net investment income are presented in the table below for the periods indicated:

(Dollars in thousands)	Years Ended December 31,		
	2012	2011	2010
Fixed maturity securities	\$ 489,801	\$ 521,991	\$ 581,870
Equity securities	59,156	57,573	12,200
Short-term investments and cash	1,252	1,281	151
Other invested assets			
Limited partnerships	64,896	56,851	70,740
Other	3,851	2,741	1,274
Total gross investment income	618,956	640,437	666,235
Interest debited (credited) and other investment expense	(18,754)	(20,396)	(12,772)
Total net investment income	\$ 600,202	\$ 620,041	\$ 653,463

The Company records results from limited partnership investments on the equity method of accounting with changes in value reported through net investment income. Due to the timing of receiving financial information from these partnerships, the results are generally reported on a one month or quarter lag. If the Company determines there has been a significant decline in value of a limited partnership during this lag period, a loss will be recorded in the period in which the Company identifies the decline.

The Company had contractual commitments to invest up to an additional \$106,766 thousand in limited partnerships at December 31, 2012. These commitments will be funded when called in accordance with the partnership agreements, which have investment periods that expire, unless extended, through 2016.

The components of net realized capital gains (losses) are presented in the table below for the periods indicated:

(Dollars in thousands)	Years Ended December 31,		
	2012	2011	2010
Fixed maturity securities, market value:			
Other-than-temporary impairments	\$ (10,022)	\$ (16,223)	\$ (2,975)
Gains (losses) from sales	14,708	20,378	27,491
Fixed maturity securities, fair value:			
Gains (losses) from sales	5,675	(905)	775
Gains (losses) from fair value adjustments	1,941	(15,518)	15,091
Equity securities, market value:			
Gains (losses) from sales	14,920	38	77
Equity securities, fair value:			
Gains (losses) from sales	21,031	8,021	6,136
Gains (losses) from fair value adjustments	116,163	11,130	55,308
Short-term investments gain (loss)	(16)	2	8
Total net realized capital gains (losses)	\$ 164,400	\$ 6,923	\$ 101,911

The Company recorded as net realized capital gains (losses) in the consolidated statements of operations and comprehensive income (loss) both fair value re-measurements and write-downs in the value of securities deemed to be impaired on an other-than-temporary basis as displayed in the table above. The Company had no other-than-temporary impaired securities where the impairment had both a credit and non-credit component.

The proceeds and split between gross gains and losses, from sales of fixed maturity and equity securities, are presented in the table below for the periods indicated:

(Dollars in thousands)	Years Ended December 31,		
	2012	2011	2010
Proceeds from sales of fixed maturity securities	\$ 998,056	\$ 1,797,404	\$ 1,652,956
Gross gains from sales	38,144	86,519	141,038
Gross losses from sales	(17,761)	(67,046)	(112,772)
Proceeds from sales of equity securities	\$ 839,547	\$ 274,434	\$ 237,149
Gross gains from sales	57,814	16,325	11,562
Gross losses from sales	(21,863)	(8,266)	(5,349)

During the second quarter of 2012, the Company redeemed one of its mutual fund investments reflected on the balance sheet as an equity security – available for sale, at market value. As part of the redemption settlement, the Company received its proportionate share of the fund's fixed maturities and related accrued interest in the amount of \$92,981 thousand. The Company has categorized the fixed maturities as available for sale, at market value.

Securities with a carrying value amount of \$1,478,079 thousand at December 31, 2012 were on deposit with various state or governmental insurance departments in compliance with insurance laws.

### 3. RESERVE FOR LOSSES, LAE AND FUTURE POLICY BENEFIT RESERVE

#### Reserves for losses and LAE.

Activity in the reserve for losses and LAE is summarized for the periods indicated:

(Dollars in thousands)	At December 31,		
	2012	2011	2010
Gross reserves at January 1	\$ 10,123,215	\$ 9,340,183	\$ 8,937,858
Less reinsurance recoverables	(580,998)	(689,445)	(641,269)
Net reserves at January 1	9,542,217	8,650,738	8,296,589
Incurred related to:

Net reserves at December 31	9,466,305	9,542,217	8,650,738
Plus reinsurance recoverables	602,750	580,998	689,445
Gross reserves at December 31	\$ 10,069,055	\$ 10,123,215	\$ 9,340,183

Incurred prior years' reserves decreased by \$3,660 thousand, increased by \$3,691 thousand and decreased by \$30,866 thousand for the years ended December 31, 2012, 2011 and 2010, respectively. The decrease for 2012 was attributable to a \$57,205 thousand decrease in reinsurance business, primarily related to favorable development on treaty casualty reserves, partially offset by a \$53,545 thousand increase in insurance business, primarily related to development on contractors' liability and workers compensation reserves.

The increase for 2011 was attributable to a \$113,833 thousand increase in insurance and U.S. reinsurance business, primarily related to development on contractors' liability, excess casualty and California workers compensation reserves, partially offset by the \$110,142 thousand decrease in non-US reinsurance business (Bermuda and International), primarily related to favorable development on non-catastrophe property reserves.

The decrease for 2010 was attributable to a \$140,760 thousand decrease in non-US reinsurance business, partially offset by the \$109,894 thousand increase in insurance and U.S. reinsurance business. The decrease in the non-U.S. reinsurance business was due to reserve studies that indicated net favorable reserve development, as well as reductions in loss estimates for prior year catastrophes. The increase in the US reinsurance is primarily due to reserve strengthening in casualty lines for construction liability claims and the increase in the insurance business is due to reserve strengthening on several terminated programs.

Reinsurance Receivables. Reinsurance receivables for both paid and recoverable on unpaid losses totaled \$659,081 thousand and \$580,339 thousand at December 31, 2012 and 2011, respectively. At December 31, 2012, \$181,535 thousand, or 27.5%, was receivable from C.V. Starr (Bermuda); \$79,902 thousand, or 12.1%, was receivable from Federal Crop Insurance Company; \$65,152 thousand, or 9.9%, was receivable from XL Reinsurance America; \$58,024 thousand, or 8.8%, was receivable from Berkley Insurance Company; and \$54,095 thousand, or 8.2%, was receivable from Transatlantic Reinsurance Company. The receivable from C.V. Starr is fully collateralized by a trust agreement. No other retrocessionaire accounted for more than 5% of our receivables.

The Company continues to receive claims under expired insurance and reinsurance contracts asserting injuries and/or damages relating to or resulting from environmental pollution and hazardous substances, including asbestos. Environmental claims typically assert liability for (a) the mitigation or remediation of environmental contamination or (b) bodily injury or property damage caused by the release of hazardous substances into the land, air or water. Asbestos claims typically assert liability for bodily injury from exposure to asbestos or for property damage resulting from asbestos or products containing asbestos.

The Company's reserves include an estimate of the Company's ultimate liability for A&E claims. The Company's A&E liabilities emanate from Mt. McKinley's direct insurance business and Everest Re's assumed reinsurance business. All of the contracts of insurance and reinsurance under which the Company has received claims during the past three years expired more than 20 years ago. There are significant uncertainties surrounding the Company's reserves for its A&E losses.

A&E exposures represent a separate exposure group for monitoring and evaluating reserve adequacy. The following table summarizes incurred losses with respect to A&E reserves on both a gross and net of reinsurance basis for the periods indicated:

(Dollars in thousands)	At December 31,		
	2012	2011	2010
<b>Gross basis:</b>			
Beginning of period reserves	\$ 499,911	\$ 554,790	\$ 638,674
Incurred losses	132	752	-
Paid losses	(57,222)	(55,631)	(83,884)
End of period reserves	\$ 442,821	\$ 499,911	\$ 554,790
<b>Net basis:</b>			
Beginning of period reserves	\$ 480,160	\$ 532,906	\$ 613,121
Incurred losses	124	764	-
Paid losses	(54,593)	(53,510)	(80,215)
End of period reserves	\$ 425,691	\$ 480,160	\$ 532,906

At December 31, 2012, the gross reserves for A&E losses were comprised of \$138,449 thousand representing case reserves reported by ceding companies, \$90,637 thousand representing additional case reserves established by the Company on assumed reinsurance claims, \$36,667 thousand representing case reserves established by the Company on direct excess insurance claims, including Mt. McKinley, and \$177,068 thousand representing IBNR reserves.

With respect to asbestos only, at December 31, 2012, the Company had gross asbestos loss reserves of \$422,849 thousand, or 95.5%, of total A&E reserves, of which \$339,654 thousand was for assumed business and \$83,195 thousand was for direct business.

**Future Policy Benefit Reserve.**

Activity in the reserve for future policy benefits is summarized for the periods indicated:

(Dollars in thousands)	At December 31,		
	2012	2011	2010
Balance at beginning of year	\$ 67,187	\$ 63,002	\$ 64,536
Liabilities assumed	126	176	172
Adjustments to reserves	2,365	8,449	2,944
Benefits paid in the current year	(3,571)	(4,440)	(4,650)
Balance at end of year	\$ 66,107	\$ 67,187	\$ 63,002

**4. FAIR VALUE**

The Company's fixed maturity and equity securities are primarily managed by third party investment asset managers. The investment asset managers obtain prices from nationally recognized pricing services. These services seek to utilize market data and observations in their evaluation process. They use pricing applications that vary by asset class and incorporate available market information and when fixed maturity securities do not trade on a daily basis the services will apply available information through processes such as benchmark curves, benchmarking of like securities, sector groupings and matrix pricing. In addition, they use model processes, such as the Option Adjusted Spread model to develop prepayment and interest rate scenarios for securities that have prepayment features.

In limited instances where prices are not provided by pricing services or in rare instances when a manager may not agree with the pricing service, price quotes on a non-binding basis are obtained from investment brokers. The investment asset managers do not make any changes to prices received from either the pricing services or the investment brokers. In addition, the investment asset managers have procedures in place to review the reasonableness of the prices from the service providers and may request verification of the prices. In addition, the Company continually performs analytical reviews of price changes and tests the prices on a random basis to an independent pricing source. No material variances were noted during these price validation procedures. In limited situations, where financial markets are inactive or illiquid, the Company may use its own assumptions about future cash flows and risk-adjusted discount rates to determine fair value. The Company made no such adjustments at December 31, 2012 and 2011.

The Company internally manages a small public equity portfolio which had a fair value at December 31, 2012 of \$117,602 thousand and all prices were obtained from publically published sources.

Equity securities in U.S. denominated currency are categorized as Level 1, Quoted Prices in Active Markets for Identical Assets, since the securities are actively traded on an exchange and prices are based on quoted prices from the exchange. Equity securities traded on foreign exchanges are categorized as Level 2 due to potential foreign exchange adjustments to fair or market value.

Fixed maturity securities are generally categorized as Level 2, Significant Other Observable Inputs, since a particular security may not have traded but the pricing services are able to use valuation models with observable market inputs such as interest rate yield curves and prices for similar fixed maturity securities in terms of issuer, maturity and seniority. Valuations that are derived from techniques in which one or more of the significant inputs are unobservable (including assumptions about risk) are categorized as Level 3,

Significant Unobservable Inputs. These securities include broker priced securities and the Company's equity index put option contracts.

At December 31, 2012 and 2011, all Level 3 fixed maturity securities, were priced using single non-binding broker quotes since prices for these securities were not provided by normal pricing service companies. The single broker quotes are provided by market makers or broker-dealers who are recognized as market participants in the markets in which they are providing the quotes. The prices received from brokers are reviewed for reasonableness by the third party asset managers and the Company.

The Company sold seven equity index put option contracts, based on two indices, in 2001 and 2005, which remain outstanding. The Company sold these equity index put options as insurance products with the intent of achieving a profit. These equity index put option contracts meet the definition of a derivative under FASB guidance and the Company's position in these equity index put option contracts is unhedged. Accordingly, these equity index put option contracts are carried at fair value in the consolidated balance sheets with changes in fair value recorded in the consolidated statements of operations and comprehensive income (loss).

The Company sold six equity index put option contracts, based on the Standard & Poor's 500 ("S&P 500") index, for total consideration, net of commissions, of \$22,530 thousand. At December 31, 2012, fair value for these equity index put option contracts was \$69,809 thousand. These equity index put option contracts each have a single exercise date, with maturities ranging from 12 to 30 years and strike prices ranging from \$1,141.21 to \$1,540.63. No amounts will be payable under these equity index put option contracts if the S&P 500 index is at, or above, the strike prices on the exercise dates, which fall between June 2017 and March 2031. If the S&P 500 index is lower than the strike price on the applicable exercise date, the amount due would vary proportionately with the percentage by which the index is below the strike price. Based on historical index volatilities and trends and the December 31, 2012 S&P 500 index value, the Company estimates the probability that each equity index put option contract of the S&P 500 index falling below the strike price on the exercise date to be less than 44%. The theoretical maximum payouts under these six equity index put option contracts would occur if on each of the exercise dates the S&P 500 index value were zero. At December 31, 2012, the present value of these theoretical maximum payouts using a 3% discount factor was \$395,902 thousand. Conversely, if the contracts had all expired on December 31, 2012, with the S&P index at \$1,426.19, the settlement amount would have been \$11,031 thousand.

The Company sold one equity index put option contract based on the FTSE 100 index for total consideration, net of commissions, of \$6,706 thousand. At December 31, 2012, fair value for this equity index put option contract was \$9,658 thousand. This equity index put option contract has an exercise date of July 2020 and a strike price of £5,989.75. No amount will be payable under this equity index put option contract if the FTSE 100 index is at, or above, the strike price on the exercise date. If the FTSE 100 index is lower than the strike price on the exercise date, the amount due will vary proportionately with the percentage by which the index is below the strike price. Based on historical index volatilities and trends and the December 31, 2012 FTSE 100 index value, the Company estimates the probability that the equity index put option contract of the FTSE 100 index will fall below the strike price on the exercise date to be less than 47%. The theoretical maximum payout under the equity index put option contract would occur if on the exercise date the FTSE 100 index value was zero. At December 31, 2012, the present value of the theoretical maximum payout using a 3% discount factor and current exchange rate was \$42,513 thousand. Conversely, if the contract had expired on December 31, 2012, with the FTSE index at £5,897.80, the settlement amount would have been \$816 thousand.

The Company's equity index put option contracts contain provisions that require collateralization of the fair value, as calculated by the counterparty, above a specified threshold, which is based on the Company's financial strength ratings (Moody's Investors Service, Inc.) and/or debt ratings (Standard & Poor's Ratings Services). The aggregate fair value of all derivative instruments with credit-risk-related contingent features that were in a liability position on December 31, 2012, was \$79,467 thousand for which the Company had posted collateral with a market value of \$48,266 thousand. If on December 31, 2012, the Company's ratings were such that the collateral threshold was zero, the Company's collateral requirement would increase by \$55,000 thousand.

The fair value was calculated using an industry accepted option pricing model, Black-Scholes, which used the following assumptions:

	At December 31, 2012	
	Contracts based on S & P 500 Index	Contract based on FTSE 100 Index
Equity index	1,426.2	5,897.8
Interest rate	1.28% to 3.25%	2.08%
Time to maturity	4.4 to 18.3 yrs	7.6 yrs
Volatility	21.7% to 25.2%	24.4%

The following table presents the fair value measurement levels for all assets and liabilities, which the Company has recorded at fair value (fair and market value) as of the periods indicated:

	December 31, 2012	Fair Value Measurement Using:		
		Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
(Dollars in thousands)

(Some amounts may not reconcile due to rounding.)

## 5. CREDIT FACILITIES

The Company has three credit facilities for a total commitment of up to \$1,250,000 thousand, providing for the issuance of letters of credit and/or unsecured revolving credit lines. The following table presents the costs incurred in connection with the three credit facilities for the periods indicated:

(Dollars in thousands)	Years Ended December 31,		
	2012	2011	2010
Credit facility fees incurred	\$ 3,519	\$ 2,211	\$ 2,034

The terms and outstanding amounts for each facility are discussed below:

### Group Credit Facility

Effective June 22, 2012, Group, Bermuda Re and Everest International entered into a four year, \$800,000 thousand senior credit facility with a syndicate of lenders, which amended and restated in its entirety the July 27, 2007, five year, \$850,000 thousand senior credit facility. Both the June 22, 2012 and July 27, 2007 senior credit facilities, which have similar terms, are referred to as the "Group Credit Facility". Wells Fargo Corporation ("Wells Fargo Bank") is the administrative agent for the Group Credit Facility, which consists of two tranches. Tranche one provides up to \$200,000 thousand of unsecured revolving credit for liquidity and general corporate purposes, and for the issuance of unsecured standby letters of credit. The interest on the revolving loans shall, at the Company's option, be either (1) the Base Rate (as defined below) or (2) an adjusted London Interbank Offered Rate ("LIBOR") plus a margin. The Base Rate is the higher of (a) the prime commercial lending rate established by Wells Fargo Bank, (b) the Federal Funds Rate plus 0.5% per annum or (c) the one month LIBOR Rate plus 1.0% per annum. The amount of margin and the fees payable for the Group Credit Facility depends on Group's senior unsecured debt rating. Tranche two exclusively provides up to \$600,000 thousand for the issuance of standby letters of credit on a collateralized basis.

The Group Credit Facility requires Group to maintain a debt to capital ratio of not greater than 0.35 to 1 and to maintain a minimum net worth. Minimum net worth is an amount equal to the sum of \$4,249,963 thousand plus 25% of consolidated net income for each of Group's fiscal quarters, for which statements are available ending on or after January 1, 2012 and for which consolidated net income is positive, plus 25% of any increase in consolidated net worth during such period attributable to the issuance of ordinary and preferred shares, which at December 31, 2012, was \$4,470,565 thousand. As of December 31, 2012, the Company was in compliance with all Group Credit Facility covenants.

The following table summarizes the outstanding letters of credit and/or borrowings for the periods indicated:

(Dollars in thousands)		At December 31, 2012			At December 31, 2011		
		Commitment	In Use	Date of Expiry	Commitment	In Use	Date of Expiry
Bank							
Wells Fargo Bank Group Credit Facility	Tranche One	\$ 200,000	\$ -		\$ 350,000	\$ -	
	Tranche Two	600,000	463,155	12/31/2013	500,000	446,327	12/31/2012
			-			127	9/30/2012
Total Wells Fargo Bank Group Credit Facility		<u>\$ 800,000</u>	<u>\$ 463,155</u>		<u>\$ 850,000</u>	<u>\$ 446,454</u>	

#### Holdings Credit Facility

Effective August 15, 2011, Holdings entered into a new three year, \$150,000 thousand unsecured revolving credit facility with a syndicate of lenders, replacing the August 23, 2006 five year senior revolving credit facility. Both the August 15, 2011 and August 23, 2006 revolving credit agreements, which have similar terms, are referred to as the "Holdings Credit Facility". Citibank N.A. is the administrative agent for the Holdings Credit Facility. The Holdings Credit Facility may be used for liquidity and general corporate purposes. The Holdings Credit Facility provides for the borrowing of up to \$150,000 thousand with interest at a rate selected by Holdings equal to either, (1) the Base Rate (as defined below) or (2) a periodic fixed rate equal to the Eurodollar Rate plus an applicable margin. The Base Rate means a fluctuating interest rate per annum in effect from time to time to be equal to the higher of (a) the rate of interest publicly announced by Citibank as its base rate, (b) 0.5% per annum above the Federal Funds Rate or (c) 1% above the one month LIBOR, in each case plus the applicable margin. The amount of margin and the fees payable for the Holdings Credit Facility depends upon Holdings' senior unsecured debt rating.

The Holdings Credit Facility requires Holdings to maintain a debt to capital ratio of not greater than 0.35 to 1 and Everest Re to maintain its statutory surplus at \$1,875,000 thousand plus 25% of future aggregate net income and 25% of future aggregate capital contributions after December 31, 2010, which at December 31, 2012, was \$1,990,497 thousand. As of December 31, 2012, Holdings was in compliance with all Holdings Credit Facility covenants.

The following table summarizes outstanding letters of credit and/or borrowings for the periods indicated:

(Dollars in thousands)		At December 31, 2012				At December 31, 2011			
		Commitment	In Use	Date of Loan	Maturity/Expiry Date	Commitment	In Use	Date of Loan	Maturity/Expiry Date
Bank									
Citibank Holdings Credit Facility		\$ 150,000	\$ -			\$ 150,000	\$ -		
Total revolving credit borrowings			-				-		
Total letters of credit			1,551			5,020		12/31/2012	
Total Citibank Holdings Credit Facility		<u>\$ 150,000</u>	<u>\$ 1,551</u>			<u>\$ 150,000</u>	<u>\$ 5,020</u>		

#### Bermuda Re Letter of Credit Facility

Bermuda Re has a \$300,000 thousand letter of credit issuance facility with Citibank N.A. referred to as the "Bermuda Re Letter of Credit Facility", which commitment is reconfirmed annually with updated fees. The Bermuda Re Letter of Credit Facility provides for the issuance of up to \$300,000 thousand of secured letters of credit to collateralize reinsurance obligations as a non-admitted reinsurer. The interest on drawn letters of credit shall be (A) 0.35% per annum of the principal amount of issued standard letters of credit (expiry of 15 months or less) and (B) 0.45% per annum of the principal amount of issued extended tenor letters of credit (expiry maximum of up to 60 months). The commitment fee on undrawn credit shall be 0.15% per annum.

The following table summarizes the outstanding letters of credit for the periods indicated:

(Dollars in thousands)	At December 31, 2012			At December 31, 2011		
	Commitment	In Use	Date of Expiry	Commitment	In Use	Date of Expiry
Bank						
Citibank Bilateral Letter of Credit Agreement	\$ 300,000	\$ 3,672	11/24/2013	\$ 300,000	\$ 3,352	11/24/2012
		75,472	12/31/2013		80,770	12/31/2012
		1,104	8/15/2014		85	7/15/2013
		139	8/30/2014		889	2/15/2014

Total Citibank Bilateral Agreement	\$ 300,000	\$ 246,440		\$ 300,000	\$ 194,861	

## 6. SENIOR NOTES

The table below displays Holdings' outstanding senior notes. Market value is based on quoted market prices, but due to limited trading activity, these senior notes are considered Level 2 in the fair value hierarchy.

(Dollars in thousands)	Date Issued	Date Due	Principal Amounts	December 31, 2012		December 31, 2011	
				Consolidated Balance Sheet Amount	Market Value	Consolidated Balance Sheet Amount	Market Value
5.40% Senior notes	10/12/2004	10/15/2014	\$ 250,000	\$ 249,907	\$ 266,390	\$ 249,858	\$ 251,370
8.75% Senior notes (matured and paid on March 15, 2010)	03/14/2000	03/15/2010	\$ 200,000	\$ -	\$ -	\$ -	\$ -

Interest expense incurred in connection with these senior notes is as follows for the periods indicated:

(Dollars in thousands)	Years Ended December 31,		
	2012	2011	2010
Interest expense incurred	\$ 13,548	\$ 13,546	\$ 17,219

## 7. LONG TERM SUBORDINATED NOTES

The table below displays Holdings' outstanding fixed to floating rate long term subordinated notes. Market value is based on quoted market prices, but due to limited trading activity, these subordinated notes are considered Level 2 in the fair value hierarchy.

(Dollars in thousands)	Date Issued	Original Principal Amount	Maturity Date		December 31, 2012		December 31, 2011	
			Scheduled	Final	Consolidated Balance Sheet Amount	Market Value	Consolidated Balance Sheet Amount	Market Value
6.6% Long term subordinated notes	04/26/2007	\$ 400,000	05/15/2037	05/01/2067	\$ 238,357	\$ 242,138	\$ 238,354	\$ 210,195

During the fixed rate interest period from May 3, 2007 through May 14, 2017, interest will be at the annual rate of 6.6%, payable semi-annually in arrears on November 15 and May 15 of each year, commencing on November 15, 2007, subject to Holdings' right to defer interest on one or more occasions for up to ten consecutive years. During the floating rate interest period from May 15, 2017 through maturity, interest will be based on the 3 month LIBOR plus 238.5 basis points, reset quarterly, payable quarterly in arrears on February 15, May 15, August 15 and November 15 of each year, subject to Holdings' right to defer interest on one or more occasions for up to ten consecutive years. Deferred interest will accumulate interest at the applicable rate compounded semi-annually for periods prior to May 15, 2017, and compounded quarterly for periods from and including May 15, 2017.

Holdings can redeem the long term subordinated notes prior to May 15, 2017, in whole but not in part at the applicable redemption price, which will equal the greater of (a) 100% of the principal amount being redeemed and (b) the present value of the principal payment on May 15, 2017 and scheduled payments of interest that would have accrued from the redemption date to May 15, 2017 on the long term subordinated notes being redeemed, discounted to the redemption date on a semi-annual basis at a discount rate equal to the treasury rate plus an applicable spread of either 0.25% or 0.50%, in each case plus accrued and unpaid interest. Holdings may redeem the long term subordinated notes on or after May 15, 2017, in whole or in part at 100% of the principal amount plus accrued and unpaid interest; however, redemption on or after the scheduled maturity date and prior to May 1, 2047 is subject to a replacement capital covenant. This covenant is for the benefit of certain senior note holders and it mandates that Holdings receive proceeds from the sale of another subordinated debt issue, of at least similar size, before it may redeem the subordinated notes.

On March 19, 2009, Group announced the commencement of a cash tender offer for any and all of the 6.60% fixed to floating rate long term subordinated notes. Upon expiration of the tender offer, the Company had reduced its outstanding debt by \$161,441 thousand.

Interest expense incurred in connection with these long term subordinated notes is as follows for the periods indicated:

	Years Ended December 31,		
	2012	2011	2010
(Dollars in thousands)			
Interest expense incurred	\$ 15,748	\$ 15,748	\$ 15,748

## 8. JUNIOR SUBORDINATED DEBT SECURITIES PAYABLE

The following table displays Holdings' outstanding junior subordinated debt securities due to Everest Re Capital Trust II ("Capital Trust II"), a 100% owned finance subsidiary of Holdings. Fair value is primarily based on the quoted market price of the related trust preferred securities, and as such, these securities are considered Level 2 under the fair value hierarchy.

				December 31, 2012		December 31, 2011	
	Date Issued	Date Due	Amount Issued	Consolidated Balance Sheet Amount	Fair Value	Consolidated Balance Sheet Amount	Fair Value
(Dollars in thousands)							
6.20% Junior subordinated debt securities	03/29/2004	03/29/2034	\$ 329,897	\$ 329,897	\$ 333,225	\$ 329,897	\$ 326,313

Holdings may redeem the junior subordinated debt securities before their maturity at 100% of their principal amount plus accrued interest as of the date of redemption. The securities may be redeemed, in whole or in part, on one or more occasions at any time on or after March 30, 2009; or at any time, in whole, but not in part, within 90 days of the occurrence and continuation of a determination that the Trust may become subject to tax or the Investment Company Act.

Interest expense incurred in connection with these junior subordinated debt securities is as follows for the periods indicated:

	Years Ended December 31,		
	2012	2011	2010
(Dollars in thousands)			
Interest expense incurred	\$ 20,454	\$ 20,454	\$ 20,454

Holdings considers that the mechanisms and obligations relating to the trust preferred securities, taken together, constitute a full and unconditional guarantee by Holdings of Capital Trust II's payment obligations with respect to their trust preferred securities.

Capital Trust II will redeem all of the outstanding trust preferred securities when the junior subordinated debt securities are paid at maturity on March 29, 2034. The Company may elect to redeem the junior subordinated debt securities, in whole or in part, at any time on or after March 30, 2009. If such an early redemption occurs, the outstanding trust preferred securities would also be proportionately redeemed.

There are certain regulatory and contractual restrictions on the ability of Holdings' operating subsidiaries to transfer funds to Holdings in the form of cash dividends, loans or advances. The insurance laws of the State of Delaware, where Holdings' direct insurance subsidiaries are domiciled, require regulatory approval before those subsidiaries can pay dividends or make loans or advances to Holdings that exceed certain statutory thresholds. In addition, the terms of Holdings Credit Facility (discussed in Note 5) require Everest Re, Holdings' principal insurance subsidiary, to maintain a certain statutory surplus level as measured at the end of each fiscal year. At December 31, 2012, \$2,272,346 thousand of the \$3,068,916 thousand in net assets of Holdings' consolidated subsidiaries were subject to the foregoing regulatory restrictions.

## 9. TRUST AGREEMENTS

Certain subsidiaries of Group have established trust agreements, which effectively use the Company's investments as collateral, as security for assumed losses payable to certain non-affiliated ceding companies. At December 31, 2012, the total amount on deposit in trust accounts was \$213,696 thousand.

## 10. OPERATING LEASE AGREEMENTS

The future minimum rental commitments, exclusive of cost escalation clauses, at December 31, 2012, for all of the Company's operating leases with remaining non-cancelable terms in excess of one year are as follows:

(Dollars in thousands)	
2013	\$ 11,450
2014	11,220
2015	11,847
2016	11,850
2017	10,812
Thereafter	36,365
Net commitments	<u>\$ 93,544</u>

All of these leases, the expiration terms of which range from 2013 to 2024, are for the rental of office space. Rental expense was \$14,169 thousand, \$14,148 thousand and \$13,124 thousand for the years ended December 31, 2012, 2011 and 2010, respectively.

## 11. INCOME TAXES

Under Bermuda law, no income or capital gains taxes are imposed on Group and its Bermuda subsidiaries. The Minister of Finance of Bermuda has assured Group and its Bermuda subsidiaries that, pursuant to The Exempted Undertakings Tax Protection Amendment Act of 2011, they will be exempt until 2035 from imposition of any such taxes.

All the income of Group's non-Bermuda subsidiaries is subject to the applicable federal, foreign, state and local taxes on corporations. Additionally, the income of foreign branches of the Company's insurance operating companies, in particular the UK branch of Bermuda Re, is subject to various rates of income tax. The provision for income taxes in the consolidated statement of operations and comprehensive income (loss) has been determined in accordance with the individual income of each entity and the respective applicable tax laws. The provision reflects the permanent differences between financial and taxable income relevant to each entity. The significant components of the provision are as follows for the periods indicated:

(Dollars in thousands)	Years Ended December 31,		
	2012	2011	2010
Current tax expense (benefit):			
U.S.	\$ 46,723	\$ 27,257	\$ (57,073)
Non-U.S.	14,131	14,388	35,056
Total current tax expense (benefit)	<u>60,854</u>	<u>41,645</u>	<u>(22,016)</u>
Total deferred U.S. tax expense (benefit)	49,718	(195,106)	2,500
Total income tax expense (benefit)	<u>\$ 110,572</u>	<u>\$ (153,461)</u>	<u>\$ (19,516)</u>

(Some amounts may not reconcile due to rounding.)

The weighted average expected tax provision has been calculated using the pre-tax income (loss) in each jurisdiction multiplied by that jurisdiction's applicable statutory tax rate. Reconciliation of the difference between the provision for income taxes and the expected tax provision at the weighted average tax rate for the periods indicated is provided below:

(Dollars in thousands)	Years Ended December 31,					
	2012		2011		2010	
	U.S.	Non-U.S.	U.S.	Non-U.S.	U.S.	Non-U.S.
Pre-tax income (loss)	\$ 432,332	\$ 507,194	\$ (395,206)	\$ 161,260	\$ 141,142	\$ 450,097
Expected tax provision at the applicable statutory rate(s)	151,316	11,013	(138,322)	12,216	49,436	33,716
Increase (decrease) in taxes resulting from:						
Tax exempt income	(20,623)	-	(33,672)	-	(56,457)	-
Dividend received deduction	(8,351)	-	(6,893)	-	(2,784)	-
Proration	3,138	-	5,080	-	8,510	-
Tax audit settlement	(2,508)	-	(710)	-	(36,511)	-
Uncertain tax positions	(31,912)	-	8,139	-	(5,237)	-
Other	5,377	3,123	(1,471)	2,172	(11,529)	1,340
Total income tax provision	\$ 96,437	\$ 14,136	\$ (167,849)	\$ 14,388	\$ (54,572)	\$ 35,056

During 2012, the Internal Revenue Service ("IRS") completed its audit of the Company for the 2007 and 2008 tax years. At the conclusion of the audit, the Company paid additional federal income taxes of \$12,747 thousand plus interest of \$1,702 thousand. The additional tax liability resulted primarily from adjustments to the timing of the Company's utilization of foreign tax credits and, therefore, including interest but net of a permanent benefit from previously unrecorded tax exempt income, this resulted in a \$354 thousand income tax benefit. Also as a result of closing the IRS audit, the Company was able to re-measure its exposure and take down its reserve for uncertain tax positions by \$31,912 thousand and related interest by \$2,154 thousand, resulting in an income tax benefit of \$34,067 thousand.

The Company identified net understatements in its Deferred tax asset account of \$17,520 thousand during 2012. The understatements resulted from differences between filed and recorded amounts that had accumulated over several prior periods. The Company corrected these understatements, resulting in a \$17,520 thousand income tax benefit included in the income tax expense (benefit) caption in the Consolidated Statements of Operations and Comprehensive Income (Loss) and increased net income for the same amount. The Company also increased its Deferred tax asset in its Consolidated Balance Sheets by \$17,520 thousand. The Company believes that the out of period adjustments are immaterial to these financial statements and to all prior periods. As such, the Company has not restated any prior period amounts.

Deferred income taxes reflect the tax effect of the temporary differences between the value of assets and liabilities for financial statement purposes and such values as measured by the U.S. tax laws and regulations. The principal items making up the net deferred income tax asset are as follows for the periods indicated:

(Dollars in thousands)	Years Ended December 31,	
	2012	2011
Deferred tax assets:		
Loss reserve	\$ 159,320	\$ 183,883
Foreign tax credits	90,941	74,253
Net operating loss carryforward	64,353	167,089
Alternative minimum tax credits	64,088	21,438
Deferred expenses	40,200	19,351
Unearned premium reserve	37,558	43,020
Unfunded pension liability	33,660	29,903
Deferred compensation	12,557	15,437
Uncollectible reinsurance reserve	5,675	5,675
Investment impairments	3,151	4,620
Other assets	9,630	17,724
Total deferred tax assets	<u>521,133</u>	<u>582,393</u>
Deferred tax liabilities:		
Net unrealized investment gains	87,524	79,450
Net unrealized fair value income	61,211	29,633
Net unrealized foreign currency gains	42,742	46,738
Deferred acquisition costs	33,969	58,571
Deferred gain on tender of debt	27,395	27,395
Accrued market discount on bonds	2,002	2,183
Other liabilities	2,515	5,640
Total deferred tax liabilities	<u>257,357</u>	<u>249,610</u>
Net deferred tax assets	263,776	332,783
Valuation allowance	(1,752)	-
Total net deferred tax assets	<u>\$ 262,024</u>	<u>\$ 332,783</u>

A reconciliation of the beginning and ending amount of unrecognized tax benefits is as follows:

(Dollars in thousands)	2012	2011	2010
Balance at January 1	\$ 31,912	\$ 23,773	\$ 29,010
Additions based on tax positions related to the current year	-	8,139	7,119
Additions for tax positions of prior years	-	-	-
Reductions for tax positions of prior years	(31,912)	-	-
Settlements with taxing authorities	-	-	(12,356)
Lapses of applicable statutes of limitations	-	-	-
Balance at December 31	<u>\$ -</u>	<u>\$ 31,912</u>	<u>\$ 23,773</u>

As a result of closing the 2007 and 2008 IRS audit during 2012, the Company was able to re-measure its exposure and take down its reserve for uncertain tax positions by \$31,912 thousand and accrued interest of \$2,154 thousand. Thus, the entire amount of unrecognized tax benefits at December 31, 2011 and 2010 were recognized and beneficially affected the effective tax rate in 2012. The Company is no longer subject to U.S federal, state and local or foreign income tax examinations by tax authorities for years before 2009.

In 2010, the Company favorably settled a 2003 and 2004 IRS audit. During the years ended December 31, 2011 and 2010, the Company recorded a net overall tax benefit including accrued interest of \$710 thousand and \$25,920 thousand respectively. In addition, in 2010, the Company was able to take down a \$12,356 thousand reserve for uncertain tax positions that had been established with respect to 2003 and 2004.

The Company recognizes accrued interest related to net unrecognized tax benefits and penalties in income taxes. During the year ended December 31, 2012, 2011 and 2010 the Company accrued and recognized a net expense/(benefit) of approximately \$(2,154) thousand, \$957 thousand and \$(9,938) thousand, respectively, in interest and penalties. Included within the 2010 net expense (benefit) of \$(9,938) thousand is \$(10,591) thousand of accrued interest related to the 2003 and 2004 IRS audit.

For U.S. income tax purposes the Company has foreign tax credit carry forwards of \$90,941 thousand that begin to expire in 2017 and a net operating loss carryforward of \$183,866 thousand that expires in 2031. In addition, for U.S. income tax purposes the Company has \$64,088 thousand of Alternative Minimum Tax credits that do not expire. Management believes that it is more likely than not that the Company will realize the benefits of its net deferred tax assets, however, a valuation allowance of \$1,752 thousand has been recorded in 2012 against a net operating loss carryforward in its Canadian subsidiary.

The Company has recorded tax benefits related to share-based compensation deductions for dividends on restricted stock, vestings of restricted stock and exercised stock options in 2012 and 2011 respectively of \$555 thousand and \$10 thousand in additional paid-in capital the shareholders' equity section of the consolidated balance sheets.

## 12. REINSURANCE

The Company utilizes reinsurance agreements to reduce its exposure to large claims and catastrophic loss occurrences. These agreements provide for recovery from reinsurers of a portion of losses and LAE under certain circumstances without relieving the ceding company of its obligations to the policyholders. Losses and LAE incurred and premiums earned are reported after deduction for reinsurance. In the event that one or more of the reinsurers were unable to meet their obligations under these reinsurance agreements, the Company would not realize the full value of the reinsurance recoverable balances. The Company may hold partial collateral, including letters of credit and funds held, under these agreements. See also Note 1C and Note 3.

Premiums written and earned and incurred losses and LAE are comprised of the following for the periods indicated:

(Dollars in thousands)	Years Ended December 31,		
	2012	2011	2010
Written premiums:			
Direct	\$ 1,074,206	\$ 815,087	\$ 823,378
Assumed	3,236,331	3,471,087	3,377,341
Ceded	(229,466)	(177,275)	(255,141)
Net written premiums	<u>\$ 4,081,071</u>	<u>\$ 4,108,899</u>	<u>\$ 3,945,578</u>
Premiums earned:			
Direct	\$ 1,054,707	\$ 871,598	\$ 823,811
Assumed	3,353,667	3,454,622	3,340,977
Ceded	(243,746)	(224,873)	(230,163)
Net premiums earned	<u>\$ 4,164,628</u>	<u>\$ 4,101,347</u>	<u>\$ 3,934,625</u>
Incurred losses and LAE:			
Direct	\$ 926,364	\$ 744,017	\$ 708,212
Assumed	2,017,526	3,099,787	2,392,758
Ceded	(198,625)	(117,600)	(155,258)
Net incurred losses and LAE	<u>\$ 2,745,265</u>	<u>\$ 3,726,204</u>	<u>\$ 2,945,712</u>

### 13. COMPREHENSIVE INCOME (LOSS)

The following table presents the components of comprehensive income (loss) in the consolidated statements of operations for the periods indicated:

(Dollars in thousands)	Years Ended December 31,		
	2012	2011	2010
Net income (loss)	\$ 828,954	\$ (80,486)	\$ 610,754
Other comprehensive income (loss), before tax:			
Unrealized appreciation (depreciation) ("URA(D)") on securities arising during the period			
URA(D) of investments - temporary	178,405	109,928	65,199
URA(D) of investments - non-credit OTTI	2,181	824	7,831
URA(D) on securities arising during the period	180,586	110,752	73,030
Less: reclassification adjustment for realized losses (gains) included in net income (loss)	(19,606)	(4,193)	(24,593)
Total URA(D) on securities arising during the period	160,980	106,559	48,437
Foreign currency translation adjustments	26,484	(16,429)	16,429
Pension adjustments	(10,732)	(45,310)	(2,792)
Total other comprehensive income (loss), before tax	176,732	44,820	62,074
Income tax benefit (expense) related to items of other comprehensive income (loss):			
Tax benefit (expense) on URA(D) arising during the period			
Tax benefit (expense) on URA(D) of investments - temporary	(6,644)	(19,338)	30,504
Tax benefit (expense) on URA(D) of investments - non-credit OTTI	83	66	(1,002)
Tax benefit (expense) on URA(D) on securities arising during the period	(6,561)	(19,272)	29,502
Less: reclassification of tax expense (benefit) on realized losses (gains) included in net income (loss)	(70)	(7,146)	(17,775)
Total tax benefit (expense) from URA(D) arising during the period	(6,631)	(26,418)	11,727
Tax benefit (expense) from foreign currency translation	(3,786)	460	(14,558)
Tax benefit (expense) on pension	3,756	15,858	977
Total income tax benefit (expense) related to items of other comprehensive income (loss):	(6,661)	(10,100)	(1,854)
Other comprehensive income (loss), net of tax	170,071	34,720	60,220
Comprehensive income (loss)	\$ 999,025	\$ (45,766)	\$ 670,974

The following table presents the components of accumulated other comprehensive income (loss), net of tax, in the consolidated balance sheets for the periods indicated:

(Dollars in thousands)	Years Ended December 31,	
	2012	2011
Beginning balance of URA (D) on securities	\$ 449,579	\$ 369,438
Current period change in URA (D) of investments - temporary	152,086	79,251
Current period change in URA (D) of investments - non-credit OTTI	2,263	890
Ending balance of URA (D) on securities	603,928	449,579
Beginning balance of foreign currency translation adjustments	(27,066)	(11,097)
Current period change in foreign currency translation adjustments	22,698	(15,969)
Ending balance of foreign currency translation adjustments	(4,368)	(27,066)
Beginning balance of pension	(55,535)	(26,083)
Current period change in pension	(6,976)	(29,452)
Ending balance of pension	(62,511)	(55,535)
Ending balance of accumulated other comprehensive income (loss)	\$ 537,049	\$ 366,978

## 14. EMPLOYEE BENEFIT PLANS

### Defined Benefit Pension Plans.

The Company maintains both qualified and non-qualified defined benefit pension plans for its U.S. employees employed prior to April 1, 2010. Generally, the Company computes the benefits based on average earnings over a period prescribed by the plans and credited length of service. The Company's non-qualified defined benefit pension plan, affected in October 1995, provides compensating pension benefits for participants whose benefits have been curtailed under the qualified plan due to Internal Revenue Code limitations.

Although not required to make contributions under IRS regulations, the following table summarizes the Company's contributions to the defined benefit pension plans for the periods indicated:

(Dollars in thousands)	Years Ended December 31,		
	2012	2011	2010
Company contributions	\$ 267	\$ 3,223	\$ 6,759

The following table summarizes the Company's pension expense for the periods indicated:

(Dollars in thousands)	Years Ended December 31,		
	2012	2011	2010
Pension expense	\$ 16,542	\$ 10,874	\$ 10,783

The following table summarizes the status of these defined benefit plans for U.S. employees for the periods indicated:

(Dollars in thousands)	Years Ended December 31,	
	2012	2011
Change in projected benefit obligation:		
Benefit obligation at beginning of year	\$ 175,364	\$ 138,392
Service cost	9,370	7,548
Interest cost	7,971	7,702
Actuarial loss	21,786	26,802
Benefits paid	(2,332)	(5,080)
Projected benefit obligation at end of year	212,159	175,364
Change in plan assets:		
Fair value of plan assets at beginning of year	101,304	114,470
Actual return on plan assets	15,568	(11,309)
Actual contributions during the year	267	3,223
Benefits paid	(2,332)	(5,080)
Fair value of plan assets at end of year	114,807	101,304
Funded status at end of year	\$ (97,352)	\$ (74,060)

Amounts recognized in the consolidated balance sheets for the periods indicated:

(Dollars in thousands)	At December 31,	
	2012	2011
Other assets (due beyond one year)	\$ -	\$ -
Other liabilities (due within one year)	(5,497)	(3,497)
Other liabilities (due beyond one year)	(91,855)	(70,563)
Net amount recognized in the consolidated balance sheets	\$ (97,352)	\$ (74,060)

Amounts not yet reflected in net periodic benefit cost and included in accumulated other comprehensive income (loss) for the periods indicated:

(Dollars in thousands)	At December 31,	
	2012	2011
Prior service cost	\$ (119)	\$ (168)
Accumulated income (loss)	(85,820)	(78,755)
Accumulated other comprehensive income (loss)	\$ (85,939)	\$ (78,923)

Other changes in other comprehensive income (loss) for the periods indicated are as follows:

(Dollars in thousands)	Years Ended December 31,	
	2012	2011
Other comprehensive income (loss) at December 31, prior year	\$ (78,923)	\$ (36,436)
Net gain (loss) arising during period	(13,961)	(47,177)
Recognition of amortizations in net periodic benefit cost:		
Prior service cost	49	49
Actuarial loss	6,896	4,641
Other comprehensive income (loss) at December 31, current year	\$ (85,939)	\$ (78,923)

Net periodic benefit cost for U.S. employees included the following components for the periods indicated:

(Dollars in thousands)	Years Ended December 31,		
	2012	2011	2010
Service cost	\$ 9,370	\$ 7,548	\$ 6,944
Interest cost	7,971	7,702	7,052
Expected return on assets	(7,743)	(9,067)	(7,971)
Amortization of actuarial loss from earlier periods	6,896	3,367	2,467
Amortization of unrecognized prior service cost	49	49	49
Settlement	-	1,275	2,242
Net periodic benefit cost	\$ 16,542	\$ 10,874	\$ 10,783
Other changes recognized in other comprehensive income (loss):			
Other comprehensive income (loss) attributable to change from prior year	7,017	42,487	
Total recognized in net periodic benefit cost and other comprehensive income (loss)	\$ 23,559	\$ 53,361	

(Some amounts may not reconcile due to rounding.)

The estimated transition obligation, actuarial loss and prior service cost that will be amortized from accumulated other comprehensive income into net periodic benefit cost over the next year are \$0 thousand, \$7,415 thousand and \$49 thousand, respectively.

The weighted average discount rates used to determine net periodic benefit cost for 2012, 2011 and 2010 were 4.60%, 5.60% and 6.10%, respectively. The rate of compensation increase used to determine the net periodic benefit cost for 2012, 2011 and 2010 was 4.0%. The expected long-term rate of return on plan assets for 2012, 2011 and 2010 was 7.75%, 8.0% and 8.0%, respectively, and was based on expected portfolio returns and allocations.

The weighted average discount rates used to determine the actuarial present value of the projected benefit obligation for year end 2012, 2011 and 2010 were 4.00%, 4.60% and 5.60%, respectively.

The following table summarizes the accumulated benefit obligation for the periods indicated:

(Dollars in thousands)	At December 31,	
	2012	2011
Qualified Plan	\$ 148,107	\$ 118,981
Non-qualified Plan	25,579	21,231
Total	\$ 173,686	\$ 140,212

The following table displays the plans with projected benefit obligations in excess of plan assets for the periods indicated:

(Dollars in thousands)	At December 31,	
	2012	2011
Qualified Plan		
Projected benefit obligation	\$ 181,617	\$ 146,350
Fair value of plan assets	114,807	101,304
Non-qualified Plan		
Projected benefit obligation	\$ 30,542	\$ 29,014
Fair value of plan assets	-	-

The following table displays the plans with accumulated benefit obligations in excess of plan assets for the periods indicated:

(Dollars in thousands)	At December 31,	
	2012	2011
Qualified Plan		
Accumulated benefit obligation	\$ 148,107	\$ 118,981
Fair value of plan assets	114,807	101,304
Non-qualified Plan		
Accumulated benefit obligation	\$ 25,579	\$ 21,231
Fair value of plan assets	-	-

The following table displays the expected benefit payments in the periods indicated:

(Dollars in thousands)	
2013	\$ 8,567
2014	7,233
2015	6,582
2016	6,759
2017	7,299
Next 5 years	48,914

Plan assets consist of shares in investment trusts with approximately 68%, 29% and 3% of the underlying assets consisting of equity securities, fixed maturities and cash, respectively. The Company manages the qualified plan investments for U.S. employees. The assets in the plan consist of debt and equity mutual funds. Due to the long term nature of the plan, the target asset allocation has historically been 70% equities and 30% bonds.

The following tables present the fair value measurement levels for the qualified plan assets at fair value for the periods indicated:

	December 31, 2012	Fair Value Measurement Using:		
		Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
(Dollars in thousands)				
Assets:				
Cash	\$ -	\$ -	\$ -	\$ -
Short-term investments, which approximates fair value (a)	3,343	3,343	-	-
Mutual funds, fair value				
Fixed income (b)	33,783	33,783	-	-
Equities (c)	63,065	63,065	-	-

The following table presents the activity under Level 3, fair value measurements using significant unobservable inputs for fixed maturity investments, for the period indicated:

(Dollars in thousands)	Year Ended December 31,	
	2012	2011
Assets:		
Balance, beginning of period	\$ 8,882	\$ 10,259
Actual return on plan assets:		
Realized gains (losses)	(22)	21
Unrealized gains (losses)	997	(2,380)
Purchases and capital contributions	5,955	1,200
Investment income earned on assets	118	(95)
Sales and capital distributions	(1,314)	(123)
Transfers in and/or (out) of Level 3	-	-
Balance, end of period	\$ 14,616	\$ 8,882

The amount of total gains (losses) for the period included in changes in net assets attributable to the change in unrealized gains (losses) relating to assets still held at the reporting date	\$ 1,019	\$ (2,401)
---	----------	------------

(Some amounts may not reconcile due to rounding.)

The Company does not expect to make any contributions to the qualified plan in 2013.

#### Defined Contribution Plans.

The Company also maintains both qualified and non-qualified defined contribution plans (“Savings Plan” and “Non-Qualified Savings Plan”, respectively) covering U.S. employees. Under the plans, the Company contributes up to a maximum 3% of the participants’ compensation based on the contribution percentage of the employee. The Non-Qualified Savings Plan provides compensating savings plan benefits for participants whose benefits have been curtailed under the Savings Plan due to Internal Revenue Code limitations. In addition, effective for new hires (and rehires) on or after April 1, 2010, the Company will contribute between 3% and 8% of an employee’s earnings for each payroll period based on the employee’s age. These contributions will be 100% vested after three years.

The following table presents the Company’s incurred expenses related to these plans for the periods indicated:

(Dollars in thousands)	Years Ended December 31,		
	2012	2011	2010
Incurred expenses	\$ 3,209	\$ 2,062	\$ 1,801

In addition, the Company maintains several defined contribution pension plans covering non-U.S. employees. Each non-U.S. office (Brazil, Canada, London, Belgium, Singapore, Ireland and Bermuda) maintains a separate plan for the non-U.S. employees working in that location. The Company contributes various amounts based on salary, age and/or years of service. The contributions as a percentage of salary for the branch offices range from 5.3% to 12.0%. The contributions are generally used to purchase pension benefits from local insurance providers. The following table presents the Company’s incurred expenses related to these plans for the periods indicated:

(Dollars in thousands)	Years Ended December 31,		
	2012	2011	2010
Incurred expenses	\$ 1,064	\$ 1,031	\$ 995

**Post-Retirement Plan.**

The Company sponsors a Retiree Health Plan for employees employed prior to April 1, 2010. This plan provides healthcare benefits for eligible retired employees (and their eligible dependants), who have elected coverage. The Company anticipates that most covered employees will become eligible for these benefits if they retire while working for the Company. The cost of these benefits is shared with the retiree. The Company accrues the post-retirement benefit expense during the period of the employee's service.

The following medical cost trend rates were used to determine net cost and benefit obligations: a healthcare inflation rate for pre-Medicare claims of 7.7% in 2012 was assumed to decrease gradually to 4.5% in 2027 and then remain at that level; and a healthcare inflation rate for post-Medicare claims of 6.3% in 2012 was assumed to decrease gradually to 4.5% in 2027 and then remain at that level.

Changes in the assumed healthcare cost trend can have a significant effect on the amounts reported for the healthcare plans. A one percent change in the rate would have the following effects on:

(Dollars in thousands)	Percentage Point Increase (\$ Impact)	Percentage Point Decrease (\$ Impact)
a. Effect on total service and interest cost components	\$ 617	\$ (478)
b. Effect on accumulated post-retirement benefit obligation	5,905	(4,611)

The following table presents the post-retirement benefit expenses for the periods indicated:

(Dollars in thousands)	Years Ended December 31,		
	2012	2011	2010
Post-retirement benefit expenses	\$ 3,141	\$ 2,258	\$ 1,947

The following table summarizes the status of this plan for the periods indicated:

(Dollars in thousands)	At December 31,	
	2012	2011
Change in projected benefit obligation:		
Benefit obligation at beginning of year	\$ 21,462	\$ 16,754
Service cost	1,677	1,165
Interest cost	1,033	934
Actuarial loss	4,136	2,930
Excise tax cost	11	53
Benefits paid	(381)	(374)
Benefit obligation at end of year	<u>27,938</u>	<u>21,462</u>
Change in plan assets:		
Fair value of plan assets at beginning of year	-	-
Employer contributions	381	374
Benefits paid	(381)	(374)
Fair value of plan assets at end of year	<u>-</u>	<u>-</u>
Funded status at end of year	<u>\$ (27,938)</u>	<u>\$ (21,462)</u>

Amounts recognized in the consolidated balance sheets for the periods indicated:

(Dollars in thousands)	At December 31,	
	2012	2011
Other liabilities (due within one year)	\$ (472)	\$ (470)
Other liabilities (due beyond one year)	(27,466)	(20,992)
Net amount recognized in the consolidated balance sheets	<u>\$ (27,938)</u>	<u>\$ (21,462)</u>

Amounts not yet reflected in net periodic benefit cost and included in accumulated other comprehensive income (loss) for the periods indicated:

(Dollars in thousands)	At December 31,	
	2012	2011
Accumulated income (loss)	\$ (10,231)	\$ (6,516)
Accumulated other comprehensive income (loss)	\$ (10,231)	\$ (6,516)

Other changes in other comprehensive income (loss) for the periods indicated are as follows:

(Dollars in thousands)	Years Ended December 31,	
	2012	2011
Other comprehensive income (loss) at December 31, prior year	\$ (6,516)	\$ (3,692)
Net gain (loss) arising during period	(4,147)	(2,983)
Recognition of amortizations in net periodic benefit cost:		
Actuarial loss (gain)	432	159
Other comprehensive income (loss) at December 31, current year	\$ (10,231)	\$ (6,516)

Net periodic benefit cost included the following components for the periods indicated:

(Dollars in thousands)	Years Ended December 31,		
	2012	2011	2010
Service cost	\$ 1,677	\$ 1,165	\$ 1,017
Interest cost	1,033	934	849
Net loss recognition	432	159	81
Net periodic cost	\$ 3,142	\$ 2,258	\$ 1,947
Other changes recognized in other comprehensive income (loss):			
Other comprehensive gain (loss) attributable to change from prior year	3,715	2,823	
Total recognized in net periodic benefit cost and other comprehensive income (loss)	\$ 6,857	\$ 5,081	

The estimated transition obligation, actuarial loss and prior service cost that will be amortized from accumulated other comprehensive income (loss) into net periodic benefit cost over the next fiscal year are \$0 thousand, \$614 thousand and \$0 thousand, respectively.

The weighted average discount rates used to determine net periodic benefit cost for 2012, 2011 and 2010 were 4.60%, 5.60% and 6.10%, respectively.

The weighted average discount rates used to determine the actuarial present value of the projected benefit obligation at year end 2012, 2011 and 2010 were 4.00%, 4.60% and 5.60%, respectively.

The following table displays the expected benefit payments in the years indicated:

(Dollars in thousands)	
2013	\$ 472
2014	538
2015	672
2016	760
2017	820
Next 5 years	6,403

## 15. DIVIDEND RESTRICTIONS AND STATUTORY FINANCIAL INFORMATION

### **Dividend Restrictions.**

Under Bermuda law, Group is prohibited from declaring or paying a dividend if such payment would reduce the realizable value of its assets to an amount less than the aggregate value of its liabilities and its issued share capital and share premium (additional paid-in capital) accounts. Group's ability to pay dividends and its operating expenses is dependent upon dividends from its subsidiaries. The payment of such dividends by insurer subsidiaries is limited under Bermuda law and the laws of the various U.S. states in which Group's insurance and reinsurance subsidiaries are domiciled or deemed domiciled. The limitations are generally based upon net income and compliance with applicable policyholders' surplus or minimum solvency margin and liquidity ratio requirements as determined in accordance with the relevant statutory accounting practices.

Under Bermuda law, Bermuda Re and Everest International are prohibited from declaring or making payment of a dividend if they fail to meet their minimum solvency margin or minimum liquidity ratio. As a long term insurer, Bermuda Re is also unable to declare or pay a dividend to anyone who is not a policyholder unless, after payment of the dividend, the value of the assets in their long term business fund, as certified by their approved actuary, exceeds their liabilities for long term business by at least the \$250 thousand minimum solvency margin. Prior approval of the Bermuda Monetary Authority is required if Bermuda Re's or Everest International's dividend payments would exceed 25% of their prior year-end total statutory capital and surplus.

Under Irish corporate and regulatory law, Holdings Ireland and its subsidiaries are limited as to the dividends they can pay based on retained earnings and net income (loss) and/or capital and minimum solvency requirements.

Delaware law provides that an insurance company which is a member of an insurance holding company system and is domiciled in the state shall not pay dividends without giving prior notice to the Insurance Commissioner of Delaware and may not pay dividends without the approval of the Insurance Commissioner if the value of the proposed dividend, together with all other dividends and distributions made in the preceding twelve months, exceeds the greater of (1) 10% of statutory surplus or (2) net income, not including realized capital gains, each as reported in the prior year's statutory annual statement. In addition, no dividend may be paid in excess of unassigned earned surplus. At December 31, 2012, Everest Re has \$359,026 thousand available for payment of dividends in 2013 without the need for prior regulatory approval.

### **Statutory Financial Information.**

Everest Re prepares its statutory financial statements in accordance with accounting practices prescribed or permitted by the National Association of Insurance Commissioners ("NAIC") and the Delaware Insurance Department. Prescribed statutory accounting practices are set forth in the NAIC Accounting Practices and Procedures Manual. The capital and statutory surplus of Everest Re was \$2,612,995 thousand and \$2,322,115 thousand at December 31, 2012 and 2011, respectively. The statutory net income of Everest Re was \$359,816 thousand for the year ended December 31, 2012, the statutory net loss of Everest Re was \$326,400 thousand for the year ended December 31, 2011 and the statutory net income of Everest Re was \$218,452 thousand for the year ended December 31, 2010.

Bermuda Re prepares its statutory financial statements in conformity with the accounting principles set forth in Bermuda in The Insurance Act 1978, amendments thereto and related regulations. The statutory capital and surplus of Bermuda Re was \$2,904,406 thousand and \$2,736,599 thousand at December 31, 2012 and 2011, respectively. The statutory net income of Bermuda Re was \$475,353 thousand, \$97,359 thousand and \$391,862 thousand for the years ended December 31, 2012, 2011 and 2010, respectively.

## 16. CONTINGENCIES

In the ordinary course of business, the Company is involved in lawsuits, arbitrations and other formal and informal dispute resolution procedures, the outcomes of which will determine the Company's rights and obligations under insurance and reinsurance agreements. In some disputes, the Company seeks to enforce its rights under an agreement or to collect funds owing to it. In other matters, the Company is resisting attempts by others to collect funds or enforce alleged rights. These disputes arise from time to time and are ultimately resolved through both informal and formal means, including negotiated resolution, arbitration and litigation. In all such matters, the Company believes that its positions are legally and commercially reasonable. The Company considers the statuses of these proceedings when determining its reserves for unpaid loss and loss adjustment expenses.

Aside from litigation and arbitrations related to these insurance and reinsurance agreements, the Company is not a party to any other material litigation or arbitration.

In 1993 and prior, the Company had a business arrangement with The Prudential Insurance Company of America ("The Prudential") wherein, for a fee, the Company accepted settled claim payment obligations of certain property and casualty insurers, and, concurrently, became the owner of the annuity or assignee of the annuity proceeds funded by the property and casualty insurers specifically to fulfill these fully settled obligations. In these circumstances, the Company would be liable if The Prudential, which has an A+ (Superior) financial strength rating from A.M. Best Company ("A.M. Best"), was unable to make the annuity payments. The table below presents the estimated cost to replace all such annuities for which the Company was contingently liable for the periods indicated:

(Dollars in thousands)

At December 31,	
2012	2011
\$ 144,628	\$ 143,447

Prior to its 1995 initial public offering, the Company purchased annuities from an unaffiliated life insurance company with an A+ (Superior) financial strength rating from A.M. Best to settle certain claim liabilities of the company. Should the life insurance company become unable to make the annuity payments, the Company would be liable for those claim liabilities. The table below presents the estimated cost to replace all such annuities for which the Company was contingently liable for the periods indicated:

(Dollars in thousands)

At December 31,	
2012	2011
\$ 29,132	\$ 27,634

## 17. SHARE-BASED COMPENSATION PLANS

The Company has a 2010 Stock Incentive Plan ("2010 Employee Plan"), a 2002 Stock Incentive Plan ("2002 Employee Plan"), a 1995 Stock Incentive Plan ("1995 Employee Plan"), a 2009 Non-Employee Director Stock Option and Restricted Stock Plan ("2009 Director Plan"), a 2003 Non-Employee Director Equity Compensation Plan ("2003 Director Plan") and a 1995 Stock Option Plan for Non-Employee Directors ("1995 Director Plan"). In addition, the Company has awarded options to non-employee directors in Board actions in 2001, 2000 and 1999.

Under the 2010 Employee Plan, 4,000,000 common shares have been authorized to be granted as non-qualified share options, incentive share options, share appreciation rights or restricted share and share awards to officers and key employees of the Company. At December 31, 2012, there were 2,989,748 remaining shares available to be granted under the 2010 Employee Plan. The 2010 Employee Plan replaced the 2002 Employee Plan, which replaced the 1995 Employee Plan; therefore, no further awards will be granted under the 2002 Employee Plan or the 1995 Employee Plan. Through December 31, 2012, only non-qualified share options and restricted share awards had been granted under the employee plans. Under the 2009 Director Plan, 37,439 common shares have been authorized to be granted as share options or restricted share awards to non-employee directors of the Company. At December 31, 2012, there were 34,738 remaining shares available to be granted under the 2009 Director Plan. The 2009 Director Plan replaced the 1995 Director Plan, which expired. Under the 2003 Director Plan, 500,000 common shares

have been authorized to be granted as share options or share awards to non-employee directors of the Company. At December 31, 2012 there were 415,638 remaining shares available to be granted under the 2003 Director Plan.

Board actions in 2001, 2000 and 1999, which were not approved by shareholders, awarded options to non-employee directors. The Board actions were designed to award non-employee directors, whose services are considered essential to the Company's continued success, with the option to purchase common shares to increase their ownership interest in the Company and to align such interests with those of the shareholders of the Company. Under Board actions in 2001, 2000 and 1999; 40,000, 30,000 and 26,000 common shares, respectively, were granted as share options to non-employee directors of the Company.

Options and restricted shares granted under the 2010 Employee Plan, the 2002 Employee Plan and the 1995 Employee Plan vest at the earliest of 20% per year over five years or in accordance with any applicable employment agreement. Options granted under the 1995 Director Plan vested at 50% per year over two years. Options and restricted shares granted under the 2003 Director Plan generally vest at 33% per year over three years, unless an alternate vesting period is authorized by the Board. Options and restricted shares granted under the 2009 Director Plan will vest as provided in the award agreement. The 2001, 2000 and 1999 Board actions vest at 33% per year over three years. All options are exercisable at fair market value of the stock at the date of grant and expire ten years after the date of grant.

For share options and restricted shares granted under the 2010 Employee Plan, the 2002 Employee Plan, the 1995 Employee Plan, the 2009 Director Plan, the 2003 Director Plan and the 1995 Director Plan, share-based compensation expense recognized in the consolidated statements of operations and comprehensive income (loss) was \$31,984 thousand, \$17,693 thousand and \$14,726 thousand for the years ended December 31, 2012, 2011 and 2010, respectively. The corresponding income tax benefit recorded in the consolidated statements of operations and comprehensive income (loss) for share-based compensation was \$2,792 thousand, \$4,164 thousand and \$3,684 thousand for the years ended December 31, 2012, 2011 and 2010, respectively.

For the year ended December 31, 2012, share-based compensation awards granted were 310,370 restricted shares; and 320,454 options, granted on February 22, 2012 and September 19, 2012, with a grant exercise price of \$88.32 and \$110.13, respectively, per share and a per option fair value of \$19.20 and \$22.55, respectively. The fair value per option was calculated on the date of the grant using the Black-Scholes option valuation model. The following assumptions were used in calculating the fair value of the options granted:

	Years Ended December 31,		
	2012	2011	2010
Weighted-average volatility	26.16%	26.46%	26.82%
Weighted-average dividend yield	2.00%	2.00%	2.00%
Weighted-average expected term	6.69 years	6.73 years	6.74 years
Weighted-average risk-free rate	1.33%	2.80%	3.04%

In 2008, the Company adopted the required FASB accounting guidance that recognizes, as an increase to additional paid-in capital, a realized income tax benefit from dividends, charged to retained earnings and paid to employees on equity classified non-vested equity shares. In addition, the amount recognized in additional paid-in capital for the realized income tax benefit from dividends on those awards should be included in the pool of excess tax benefits available to absorb tax deficiencies on share-based payment awards. For the years ended December 31, 2012, 2011 and 2010, the Company recognized \$162 thousand, \$136 thousand and \$124 thousand, respectively, of additional paid-in capital due to tax benefits from dividends on restricted shares.

A summary of the option activity under the Company's shareholder approved and non-approved plans as of December 31, 2012, 2011 and 2010, and changes during the year then ended is presented in the following tables:

Compensation plans approved by shareholders:

(Aggregate Intrinsic Value in thousands)

As of December 31, 2012, there was \$25,726 thousand of total unrecognized compensation cost related to non-vested share-based compensation expense. That cost is expected to be recognized over a weighted-average period of 3.5 years. The total fair value of shares vested during the years ended December 31, 2012, 2011 and 2010, was \$28,003 thousand, \$5,981 thousand and \$5,057 thousand, respectively. The tax benefit realized from the shares vested for the year ended December 31, 2012 was \$1,632 thousand.

In addition to the 2010 Employee Plan, the 2002 Employee Plan, the 1995 Employee Plan, the 2009 Director Plan, the 2003 Director Plan and the 1995 Director Plan, Group issued 518 common shares in 2012, 668 common shares in 2011 and 0 common shares in 2010 to the Company's non-employee directors as compensation for their service as directors. These issuances had aggregate values of approximately \$48 thousand, \$56 thousand and \$0, respectively.

Since its 1995 initial public offering, the Company has issued to certain key employees of the Company 1,272,988 restricted common shares, of which 171,660 restricted shares have been cancelled. The Company has issued to non-employee directors of the Company 73,519 restricted common shares, of which no restricted shares have been cancelled. The Company acquired 148,962, 53,474 and 21,005 common shares at a cost of \$15,307 thousand, \$4,730 thousand and \$1,778 thousand in 2012, 2011 and 2010, respectively, from employees who chose to pay required withholding taxes with shares exercised or restricted shares vested. The Company acquired 79,086, 201,287 and 7,281 common shares at a cost of \$8,322 thousand, \$17,951 thousand and \$618 thousand in 2012, 2011 and 2010, respectively, from employees and non-employee directors who chose to pay the option grant price with shares.

## 18. RELATED-PARTY TRANSACTIONS

During the normal course of business, the Company, through its affiliates, engages in reinsurance and brokerage and commission business transactions with companies controlled by or affiliated with one or more of its outside directors. Such transactions, individually and in the aggregate, are not material to the Company's financial condition, results of operations and cash flows.

## 19. SEGMENT REPORTING

During the quarter ended September 30, 2011, the Company realigned its reporting segments to reflect recent changes in the type and volume of business written. The Company previously reported the results of Marine & Aviation, Surety, Accident and Health ("A&H") Reinsurance and A&H Primary operations as a separate segment—Specialty Underwriting. The A&H primary business, which is a relatively new line of business for the Company, has increased significantly, representing approximately 2% of premiums earned and is projected to continue to grow. The A&H primary business is better aligned with the Insurance reporting segment based on the similarities of this business with those businesses already reflected in the Insurance segment. The other operating units included in the Specialty Underwriting segment would have encompassed less than 5% of the Company's premiums earned and their volume is projected to remain less than 5%. As a result of the size of these remaining operating units and their similarity to the business reported within U.S. Reinsurance, they have been reclassified to the U.S. Reinsurance segment. There has been no change to the International and Bermuda reporting segments. The Company has restated all segment information for prior years to conform to the new reporting segment structure.

The U.S. Reinsurance operation writes property and casualty reinsurance and specialty lines of business, including Marine, Aviation, Surety and A&H business, on both a treaty and facultative basis, through reinsurance brokers, as well as directly with ceding companies primarily within the U.S. The International operation writes non-U.S. property and casualty reinsurance through Everest Re's branches in Canada and Singapore and through offices in Brazil, Miami and New Jersey. The Bermuda operation provides reinsurance and insurance to worldwide property and casualty markets through brokers and directly with ceding companies from its Bermuda office and reinsurance to the United Kingdom and European markets through its UK branch and Ireland Re. The Insurance operation writes property and casualty insurance, including medical stop loss insurance, directly and through general agents, brokers and surplus lines brokers within the U.S. and Canada.

These segments are managed independently, but conform with corporate guidelines with respect to pricing, risk management, control of aggregate catastrophe exposures, capital, investments and support operations. Management generally monitors and evaluates the financial performance of these operating segments based upon their underwriting results.

Underwriting results include earned premium less losses and LAE incurred, commission and brokerage expenses and other underwriting expenses. We measure our underwriting results using ratios, in particular loss, commission and brokerage and other underwriting expense ratios, which respectively, divide incurred losses, commissions and brokerage and other underwriting expenses by premiums earned. We utilize inter-affiliate reinsurance, although such reinsurance does not materially impact segment results, as business is generally reported within the segment in which the business was first produced.

The Company does not maintain separate balance sheet data for its operating segments. Accordingly, the Company does not review and evaluate the financial results of its operating segments based upon balance sheet data.

The following tables present the underwriting results for the operating segments for the periods indicated:

U.S. Reinsurance

(Dollars in thousands)

	Years Ended December 31,		
	2012	2011	2010

Net derivative gain (loss)	(9,738)	(11,261)	(1,119)
Corporate expenses	(23,976)	(16,461)	(14,914)
Interest, fee and bond issue cost amortization expense	(53,683)	(52,319)	(55,830)
Other income (expense)	3,318	(23,089)	16,927
Income (loss) before taxes	<u>\$ 939,526</u>	<u>\$ (233,947)</u>	<u>\$ 591,238</u>

The Company produces business in the U.S., Bermuda and internationally. The net income deriving from and assets residing in the individual foreign countries in which the Company writes business are not identifiable in the Company's financial records. Based on gross written premium, the table below presents the largest country, other than the U.S., in which the Company writes business, for the period indicated:

(Dollars in thousands)	Years Ended December 31,		
	2012	2011	2010
United Kingdom	\$ 456,724	\$ 453,169	\$ 498,437

Approximately 21.1%, 24.8% and 22.3% of the Company's gross written premiums in 2012, 2011 and 2010, respectively, were sourced through the Company's largest intermediary.

## 20. ACQUISITIONS

During the first quarter of 2011, the Company made several acquisitions to expand its domestic and Canadian insurance operations. Below are descriptions of the transactions.

On January 2, 2011, the Company acquired the entire business and operations of Heartland of Topeka, Kansas for \$55,000 thousand in cash, plus contingent payments in future periods based upon achievement of performance targets. Heartland is a managing general agent specializing in crop insurance.

On January 28, 2011, the Company acquired the entire business and operations of Premiere of Toronto, Canada. Premiere is a managing general agent specializing in entertainment and sports and leisure risks. On January 31, 2011, the Company acquired the renewal rights and operations of the financial lines business of Executive Risk Insurance Services, Ltd. ("Executive Risk") of Toronto, Canada. The financial lines business of Executive Risk mainly underwrites Directors and Officers Liability, Fidelity, and Errors and Omissions Liability.

Overall, the Company recorded \$46,215 thousand of goodwill and \$26,903 thousand of intangible assets related to these acquisitions, which are reported as part of other assets within the consolidated balance sheets. All intangible assets recorded as part of these acquisitions will be amortized on a straight line basis over seven years, subject to recoverability tests.

## 21. SUBSEQUENT EVENTS

The Company has evaluated known recognized and non-recognized subsequent events. The Company does not have any subsequent events to report.

## 22. UNAUDITED QUARTERLY FINANCIAL DATA
